Re: Water Right Nos. 77-2035, 77-14345, 77-14346 & 77-14347

Dear Water Right Owner:

Thank you for the September 21, 2012 information documenting that at least partial beneficial use of water under the above referenced rights recently resumed. The recent approvals of extensions of time to avoid forfeiture included a resumption date of July 1, 2018.

As you noted, the combined rights authorize irrigation, domestic and stockwater uses. Your September information confirms an unspecified number of acres being irrigated. It does not necessarily confirm full irrigation use or any domestic or stockwater uses.

The department will honor the July 1, 2018 resumption date to cover the possibility that full beneficial use might not resume before then. You may use the enclosed form to document full use of these rights prior to the 2018 date if you prefer. Additional forms are found on the department website as noted in the enclosed information.

You will be notified about 60 days before the resumption deadline if the department does not hear from you in this matter before then. Meanwhile, your recent information will be added to the water right files to ensure recognition of your recent diversion and beneficial use of water.

Please contact me at 208-334-2190 if you need more information or have any questions.

Sincerely,

A handwritten signature in black ink, appearing to read 'Steve Lester'.

Steve Lester  
Water Rights Supervisor

Re: Water Right Nos. 77-02035, 77-14345, 77-14346 and 77-14347

Dear Sir or Madam:

I received the four approvals extending the time to avoid forfeiture of the above water rights with your cover letter to me of September 14, 2012. The owners of the water rights are required to notify you when use of water under the right has been resumed. The purpose of this letter is to do that.

Through a considerable amount of work and good fortune, the owners of the rights were able to relocate the temporary diversion structure in Parks Creek and were able to start taking water through the new pipeline and the ditch to the place of use the latter part of July and finished the work in August. It was not thought that they would be successful in doing this. Use under these four rights varies but comprises domestic, stock water and irrigation. I am enclosing two photos that were given to me by one of the water right holders showing the irrigation use.

Very truly yours,

WESTBERG, McCABE & COLLINS, Chtd.

William D. Collins
