RE: Water Right No. 67-10455

Dear Ms. Sommer:

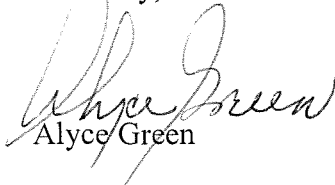

In response to your inquiry in regards to the partial ownership change request on the above referenced water right, it continues to be my intent to split said water right.

Parcels RP14N01W116077A and RP14N01W143200A were purchased at one time and, now, have been sold as 'one'. There is only one home (on parcel RP14N01W116077A – circled on map), while the other portion is empty except for a portable storage shed, parking for a travel trailer and storage. Adams County has assigned two separate parcel numbers for the property that has been sold as there is a strip of land owned by another party (actually an unknown owner) lying in between the two pieces and dividing the property.

This water right was not serving two 'parcels' prior to the sale of property and I ask that you process the water right split as requested. The home on the adjacent property, parcel number RP14N01W116060A, and the home on parcel number RP14N01W116077A share this well very satisfactorily. Please feel free to contact me for further information or conduct an inspection.

Thank you.

Sincerely,

Alyce Green
