Subject: Additional information requested for Field Exam 63-31481

Dear Gordon,

Thank you for taking the time to discuss our field exam process with you last week. As Dan Nelson and I described to you on the phone, we are in the process of licensing the water right for the City of Kuna's Well #6 (WR # 63-31481). As part of the license development, we need to document the maximum sustainable diversion rate for the well. You provided me photos of the pump rate taken the morning of August 10, 2012. Thank you for sending those photos in, they are beneficial to this process. However, we also need additional documentation (pressure on system and pumping levels) to confirm the flow rate represents operational conditions. If these items of information are not available, could you provide me with some documentation to indicate the flow rates from this well are of operational conditions (metered flow rates, power records, etc.).

Without the information noted above, we will have to continue the license process with the sustained flow rate that was observed during the time of the field exam. If you could provide me this additional requested information by next Friday, September 21st, I can use the submitted documentation to finish the licensing process.

If you have any questions or comments, feel free to contact me at (208) 287-4855.

Thank you
