**CONDITIONS OF APPROVAL**

1. Rights 57-1B, 57-2236, 57-2295, 57-11621 and 57-11622 when combined shall not exceed a total diversion rate of 5.14 cfs, a total annual maximum diversion volume of 1177 af and the irrigation of 261.6 acres.
2. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
3. When ordered by the Director, the right holder shall provide mitigation acceptable to the Director to offset depletion of lower Snake River flows needed for migrating anadromous fish. The amount of water required for mitigation, which is to be released into the Snake River or a tributary for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this right. Any order of the Director issued in accordance with this paragraph shall be in conformance with applicable rules allowing the right holder due process as the need for mitigation and the amount of mitigation are determined.
4. The right holder shall make full beneficial use of surface water rights 57-1B and 57-11622 for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
5. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the place of use.
6. This right is limited to the irrigation of 70.6 acres within the authorized place of use in a single irrigation season.
7. If the surface water right(s) 57-1B and 57-11622 are sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used for irrigation purposes without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
8. The stockwater use under this right shall not exceed 2.7 af per year.
