Subject: RE: Bittercreek Meadows - Water Right Transfer

Tim,

Just want to send an email to follow up on my phone call this afternoon with where things currently stand. Mrs. Bricker came in this morning and officially filed a protest of this transfer application, as you are aware. From my discussion with Mrs. Bricker, it sounds like you are well on your way to reaching an agreement to alleviate her concerns. Once an agreement is reached and the protest is withdrawn, I will continue processing the transfer application.

In the meantime, I wanted to ask you about the status of the ownership documentation and associated filing fee Steve (IDWR) initially requested and discussed with you via his email of 9/19/11. The last correspondence I see in the file here regarding the ownership change proposed was an email from Steve to the City of Meridian indicating the City's proposed change to the original Quitclaim Deed would be sufficient to change the ownership of the right. Has the Amended deed been signed and recorded yet? I just wanted to ask about the deed and \$25 fee necessary to change the ownership now, while I'm thinking of it, to hopefully help in our attempts to expedite this application. Please let me know the status of the deed changes and ownership change fee submittal when you have a minute.

Thanks,
Angie

Subject: Bittercreek Meadows - Water Right Transfer

Good Morning Angie,

Just checking in to discuss the Bitter Creek Transfer. As I explained in a voice mail messaged, we originally looked at three water bearing zones for development of the first well. The zones 216 to 256 feet, 454 to 470 feet, 544 to 560 feet, and 598 to 614 feet were identified during drilling and the lower two zones were developed due to high productive capacity. We are proposing a new low capacity well in the range of 150 gpm in the 420-480 foot zone. This well is significantly deeper than other domestic wells in the area.

Questions:

1. As you have discussed this application with the protestant does my client need to contact or write him?
2. How do we proceed with the transfer application.

Your help is greatly appreciated, and the homeowners and water users of Bittercreek Meadows are anxiously awaiting approval of this transfer and drilling of a new well to improve poor water quality being supplied from the existing well.

Thanks again for your help!

Tim,

Here is the previous pump test results as submitted to the Department, including a copy of the agreement between the protestants and your client. I will email you as soon as Mrs. Bricker officially files a protest, assuming she comes into the office to do so as she indicated to me she planned to do. Please let me know if you have any questions or need more information from me.

Sincerely,

Angela M. Grimm, P.G.
