RE: Application for Permit No. 63-33678

Dear Mr. and Mrs. Eilers:

We are in the process of reviewing the above referenced application for permit and find we need additional information. Enclosed, for your convenience is a copy of the application as it was submitted.

Your application describes two systems as far as we can tell. You have applied for two wells, one existing domestic well and a proposed irrigation well. Will these two wells be interconnected or separate systems? If they are separate systems we will require that you file one application for your irrigation use and a second application for the domestic uses. If the wells are to be tied together then we need to have information stating that.

We also need to know what water bearing zone you plan to appropriate under the wells. This is the zone in the well that the pump will be placed once it is completed. You may need to discuss this with a driller to get a proposed water bearing zone.

On the application form, we need to know where the domestic uses will occur. You have indicated the place of use for irrigation purposes but not the location of the domestic uses.

Please provide the requested information within the next thirty (30) days. Alternately, you may seek up to six months additional time to provide the information. The application will be voided if a timely written response is not received. A refund of the filing fee will not be issued for a voided application.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at (208)334-2190 if you have any questions. Thank you for your attention to this matter.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
