RE: Water Right Permit No. 11-7411 (renumbered as 13-07867)

Dear Permit Holder:

The Idaho Department of Water Resources is currently reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that was established in compliance with the terms of the permit. During our review, we discovered that the permit is actually located in Basin 13 (Bear River below Soda Springs) and have updated the water right number to be in Basin 13. The new water right number is **13-7867**.

The field examiner who verified your water use reported that certain elements of the permit were developed differently than described on your permit. The place of use listed on the permit was in the SWNW of Section 20, T13S, R41E. The home receiving water from the spring is actually located in the NENW of Section 20. Please refer to the enclosed map. Before a water right license can be issued, your permit must be amended to depict your water use as it was actually developed.

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. I have also included a copy of the field exam for your reference. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days. If you have any questions, please feel free to contact me at (208) 525-7161.

Sincerely,

James Cefalo
Water Resources Program Manager
