RE: Water Right Permit No. 36-8792

Dear Brad:

As we discussed Wednesday afternoon, our office has recently started the process of licensing permit 36-8791 and 36-8792. The first permit (36-8791) will be licensed as permitted. The second permit (36-8792) will need to be amended to reflect the actual use at the time proof was filed. During our discussion you indicated that the pump and washing station were occasionally moved from tract to tract. An amendment needs to be filed to reflect the actual locations of the pump and places of use in 2009.

Our office has drafted an Application for Amendment that indicates the change that will correct the second permit. The amendment will add the legal description of SWSE of SEC 7 TWP 9S RNG 25E as a place of use and also as a point of diversion.

The enclosed Application for Amendment will depict the water right as it will appear on the license when it is issued. Please review the amendment form carefully. If you have any questions please feel free to call me. Otherwise, please sign the Application for Amendment and return it with a \$100.00 filing fee.

Again, if you have any questions or need further assistance, please feel free to call me at 208-736-3033.

Sincerely,

Jana Reeder
Water Resource Agent
