CONDITIONS OF APPROVAL

1. This right, when considered with all other rights common to the same grazing allotment, is limited to the quantity of water beneficially used by the number of stock within the allotment.
2. Upon specific notification by the Department, the right holder shall install a lockable device of a type acceptable to the Department in a manner that will provide the watermaster suitable control of the diversion.
3. Use of water under this right will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 73.

State of Idaho
Department of Water Resources
Water Right License

WATER RIGHT NO. 73-11973

4. A float or sensor shut-off system shall be maintained on each of the water troughs described as a place of use by right nos. 73-11973 and 73-2209. When the water level in the water trough reaches a level considered full but not overflowing, the float or sensor associated with each water trough shall activate the necessary mechanism to close a valve in the pipe delivering water to the trough.
5. Rights 73-2209 and 73-11973 when combined shall not exceed a total diversion rate of 0.02 cfs.

This license is issued pursuant to the provisions of Section 42-219, Idaho Code. The water right confirmed by this license is subject to all prior water rights and shall be used in accordance with Idaho law and applicable rules of the Department of Water Resources.

Signed this 16th day of September, 2012.
