Subject: Horizon Water Rights

Monica,

I need to update the location of 26.9 acres of water rights 36-8402, 36-2430 and 36-8008. These water rights are included in transfer 77952. The currently leased POU of the 26.9 acres is outside of the proposed POU of transfer 77952 but within the proposed PPU. So I have identified 26.9 acres within the proposed POU and not irrigated that will be the POU of the leased acres.

I will send you some shape files and maps.

Subject: Horizon (again)

WSB lease 36-2340, 8008, 8402 was approved for 26.9 acres for a 10-yr period ending 2016. The leased acres are presently located in corners in the S1/2 Sec 16, 9S 21E. There is a transfer pending on this system which combines it with two other systems in a PPU with total authorized acres of 1018.6. (this is one of the ones we met about. The other 2 are approved.) When Brockway submitted the 206 map, it was exactly 1018.6 acres but did NOT include the original 26.9 WSB acres, and didn't note what may have happened to them. I asked Greg about it and he is going to check for sure, but the bottom line question is: Once acres are leased, and then the rights are transferred to change the POU, can't the location of the dried acres also be changed, so long as we know where they are? I don't have a big problem with this so long as they are tracked somewhere.

I've asked Greg to either change the 206 map to include the original leased acres, or identify a new location for them within the present 206 shape of 1018.6 authorized acres. I will be sure you get a copy of that map. Please let me know if you have issue with this approach.
