3. csaxton 9/13/2012 Watermaster Reporting
Comment: Condition #5 of the permit has been sufficiently addressed through contact with the watermaster. At this time, diversions of this size are not being regulated by the district.
4. csaxton 9/13/2012 Domestic Use
Comment: Permitted for two domestic uses, but SPF found only one was developed.
5. csaxton 9/13/2012 Field Exam Report
Comment: SPF beneficial use field report provides the necessary information for licensing.

8. csaxton 9/13/2012 9:22:53 AM POD
Comment: PODID 819753 correlated from SpatialDataID 434005 to SpatialDataID 463909
9. scurtis 10/19/2011 Comment/Analysis
Comment: Assuming no protests are received and no information is presented to the contrary, this application appears approvable based on in-house use only. Standard condition 185 will be placed on the permit because it is within the Payette River basin.
