3. csaxton 9/16/2012 Field Examination Report
Comment: SPF beneficial use field report provides the necessary information for licensing.
4. csaxton 9/13/2012 Watermaster reporting
Comment: Condition #4 of the permit has been sufficiently addressed through contact with the watermaster. At this time, diversions of this size are not being regulated by the district.

7. csaxton 9/13/2012 8:07:58 AM POD
Comment: PODID 819754 correlated from SpatialDataID 434004 to SpatialDataID 463905
8. scurtis 10/19/2011 Comment/Analysis
Comment: Assuming no protests are received and no information is presented to the contrary, this application appears approvable based on domestic use for irrigation of lawn/garden use only. Standard condition 185 will be placed on the permit because it is within the Payette River basin.
