Subject: Amendment for stock water right 73-12048

The Department of Water Resources has been working on our backlog of water right applications this summer. I completed an in-house exam of a stock water permit east of Challis on Forest Service land last month which requires an amendment to change the Point of Diversion and Place of Use. Do you know if your Salmon office received this paperwork?

For reference, the Water Right number is 73-12048, located at T14N, R20E, Sec 31 and Sec 36. This is a three-trough system for stock water. If you have any questions, please contact me at 208-287-4872 in Boise.

Thank you.
