RE: CHARTER MOUNTAIN/COLD SPRINGS RANCH TRANSFER

Dear Bruce:

The transfer, assignment and adjudication information that you provided with your August 7, 1998 letter regarding the above referenced site has undergone a preliminary review. Please note the following items.

1. Please remit \$125 as soon as possible. This includes \$100 for SRBA claims A61-11885 and A61-11887 (at the minimum flat fee of \$50 per claim). Payment for those claims is necessary in order for the claims to be recommended in the Director's Report. The deadline is quickly approaching for that.

The remaining \$25 will cover the assignment of permit 61-07288. An assignment fee is not required for the remaining three applications (nos. 61-07617, 61-07725 and 61-07732).

2. Once the SRBA recommendations have undergone the notice of error process, the transfer application will be processed. Premature processing of the transfer might result in re-publication of the transfer, thereby exposing your client to a longer protest period. Additionally, the transfer must be advertised in five newspapers (local plus statewide) due to the size of the proposal. It is more practical to wait until the adjudication recommendations have cleared the notice of error process to avoid possible re-publication due to adjustments that might occur in the notice of error period.

I hope to hear from you soon. This letter is being faxed to you in addition to regular mail.

Sincerely,

Steve Lester
Water Rights Supervisor
