

## MEMORANDUM

TO: 61-7738 File

FROM: Chad. F Hersley

DATE: September 5, 2012

SUBJECT: Removal of 11.2 acres from field exam report to licensing

During water right review we discovered in the extension of time document that a pump had not been installed prior to 2003 for this irrigation system. Without a pump on this system irrigation could not take place. The same extension of time document states that all the irrigation pipe had been purchased and installed. This explains why we saw the pipe in place during the field exam but could not find evidence of irrigation.

Landsat photos suggest that no irrigation took place on the 11.2 acres on the hill after the 2003 extension of time document was submitted therefore we were instructed y Shelley Keen to not include those acres even though irrigation system was in place.
