RE: Licensing Review Memo

Timeline

Application Received: March 2, 1995

Permit Issued: June 5, 1995

Proof of Beneficial Use: August 26, 1996

Field Examination: September 2, 1997

POU: The place of use consists of a Laundromat and a store. The water under this right is used for refrigeration in the store, heating of the store/Laundromat, and to run the washing machines. No other water rights belong to the POU.

Point of Diversion: There is one well as the PD for this right. No other rights are diverted from the well.

Diversion Rate: The field examiner recommended 0.04 cfs based on the hp equation. The field examiner used 80 feet as depth to water in the equation according to the field examiner's report. However, the well log lists the static water level at 42 feet. I cannot find where 80 feet came from so I will re-calculate the hp equation using 42 feet as depth to water.

$$1 \text{ hp} \times 8.8 \times 0.7/42 + (30\text{psi} \times 2.31) = 6.16/111.3 \text{ or } 0.06 \text{ cfs}$$

Volume: The volume will be based on the amount of water necessary for the washing machines and the amount that is required to run the cooling system. The water that is used for heating purposes is first used for the refrigeration system before running through an exchange system used for heating purposes; the volume for the cooling and heating systems is duplicative.

Washing machines	3.1 af
Cooling System -	<u>15.0 af</u>
	18.1 afa

Ownership: Currently this right is listed to John Larson of McCall. According to 2012 taxlot data, Old Town Ventures LLC owns the lot where the POU is located. I confirmed their mailing address with the IDSOS and I will cc a copy of the licensing amendment to them with an o/c form.

Amendment?: Yes, the POU and PD are within the SESW not the NESW of Section 9.
