Subject: Permit 74-15636 - Dale Peterson

Hey Debbie,

I called Dale back and reaffirmed what you told him which was that we can't change the condition on the permit and that he would have to file for a new permit. I warned him too that he was in the Wild and Scenic area so there will be more conditions probably on his new application for irrigation.

We also spoke about the possible exemption under 42-111(b), which, if his fire defense perimeter was very small, he might qualify for.

After talking it sounds like he is going to file a new application for permit. I am sending him a permit application with instructions. In the mean time, he is going to send in the amendment with the pictures confirming the installation of a measuring device and lockable controlling works.

He was concerned that he was past the 14 day limit so I told him that I would document we spoke with him and that he said he will get the amendment in the mail today or tomorrow.

Thanks,
Craig
