G. NARRATIVE/REMARKS/COMMENTS

Water right 72-7561 was originally filled for domestic and irrigation. However during the field exam it was found that the irrigation portion of the water right was never developed to exceed ½ acre. The property has a home, garage, and small shed. The well was drilled in July of 1998 under tag D0004856. The well is used for in-house use and is attached to a drip system for watering the trees and shrubs around the property. It is recommended that the irrigation portion be taken off of the right since the domestic use will allow for the developed in-house use and less than ½ acre of irrigation that has been developed. The water right should be licensed for 0.04 cfs and the conditions associated with domestic use.
