RE: Transfer Application 70343

This transfer application includes Black Mesa's portion of the original Cottonwood Canal Company right (parent right 2-2209).

Although the transfer application does not have many documents, the department invested many hours in dealing with this application for almost ten years. The delay was primarily due to Snake River Basin Adjudication factors as multiple parties worked their way thru Cottonwood Canal Company issues.

The transfer application withdrawal did not include a refund request. Any future request should be denied based on the amount of work staff devoted to this.
