BEFORE THE DEPARTMENT OF WATER RESOURCES

OF THE

STATE OF IDAHO

In the Matter of Application for Extension of Time to Avoid Forfeiture of a Water Right - Claim No. 37-4112 in the Name of King Hill Irrigation District	ORDER

This matter having come before the Department of Water Resources (department), the department finds, concludes and orders as follows:

FINDINGS OF FACT

1. On June 13, 1983, King Hill Irrigation District (applicant) filed an Application For Extension of Time To Avoid Forfeiture of a Water Right (application) in connection with Claim To a Water Right No. 37-4112.

2. The department approved the application with a condition that use of water under the right was to resume on or before August 1, 1988.

3. Section 42-222, Idaho Code, provides that sixty (60) days prior to the date set for the resumption of use, the department shall forward a notice by certified mail to the applicant setting forth the date on which the use of water is to resume and a form for reporting resumption of the use of the water right.

4. The department did not notify the applicant of the resumption of use as required in Section 42-222, Idaho Code.

CONCLUSIONS OF LAW

1. The applicant was not properly notified by the department of the resumption of use and reporting requirement as required in Section 42-222, Idaho Code.

2. The applicant can not reasonably be expected to comply with the condition of approval on the application requiring resumption of use of the water right.

3. The department should change the condition of approval on the application in connection with the resumption of use of water.

ORDER

IT IS THEREFORE, HEREBY ORDERED that the condition of approval in connection with the resumption of use of water represented by Claim No. 37-4112 be changed to read as follows:

MICROFILMED

SEP 30 1988

"Use of water under this right shall resume on or before June 1, 1989."

Dated this 14th day of September, 1988.

STATE OF IDAHO

DEPARTMENT OF ~~RECLAMATION~~ WATER RESOURCES

Application for Extension of Time to Avoid Forfeiture of a Water Right

Section 42-222 Idaho Code provides that a water right shall be lost and forfeited and the water revert to the state upon the failure of a water user to apply the water to beneficial use for a period of five (5) years. The State Reclamation Engineer may allow an additional five (5) year period of non-use without forfeiture upon a showing of reasonable cause.

Complete fully the following application and submit it to the Department of ~~Reclamation~~ Water Resources Statehouse ~~Annex #2~~, Boise, Idaho 83707, with the statutory fee of $~~10.00~~ $30.00 if the application involves ~~one~~ 0.2 c.f.s. or ~~50~~ 20 acre feet or $~~20.00~~ $50.00 if in excess of these amounts.

1. Name of water right holder King Hill Irrigation District

   Post office address P. O. Box 428, King Hill, Idaho 83633

2. The right was obtained or is evidenced by:

   a. Decree to _____ (Name) in Case of _____

   vs. _____, Dated _____ in _____ (Name of Court)

   Court, County of _____. Fully describe decree _____

   b. License No. _____ issued by the Department of ~~Reclamation~~ Water Resources

   c. Claim No. 37-~~4074~~ 4112 * on file with the Department of ~~Reclamation~~ Water Resources

3. Source of water Malad River (Name of stream or source) tributary to Snake River

4. Date of priority of right March 26, 1902

5. Amount of water a. 65 c.f.s. and/or

   b. _____ acre feet/annum

6. Water is used for irrigation (Purpose) from March 1 (Month-Day) to October 31 (Month-Day)

   stock watering (Purpose) from Jan. 1 (Month-Day) to December 31 (Month-Day)

   domestic from January 1 to December 31

7. Location of point of diversion is NW ¼ NW ¼ of Section 35,

   Township 6 South, Range 13 East, B.M., in Gooding County;

MICROFILMED

*Change Per T.C. w/ Bill Ringett 6/23/83 LK

Total number of acres irrigated _____

PS-66

9. Give last date when water was applied to beneficial use August, 1978
Length of extension of time requested five years, or until _____ (Date)

10. Explain fully your reasons for requesting an extension of time within which to resume the use of your water right and reasons for non-use The District converted from gravity flow to pumping in 1978-79. The pumps have a total capacity of 305 cfs. Additional pumps will have to be installed in order to divert the 65 cfs difference between the capacity of the gravity system and the capacity of the pumps now installed. It is estimated that five years will be required for planning and construction. The total capacity of the gravity system was 370 cfs.

I hereby assert that no one will be injured by such extension. The information contained in this application is true to the best of my knowledge.

Robert A Schamber

NOTICE OF APPLICATION FOR EXTENSION OF TIME TO AVOID FORFEITURE OF A WATER RIGHT PURSUANT TO IDAHO CODE Section 42-222

Notice is hereby given that King Hill Irrigation District, P.O. Box 428, King Hill, Idaho 83633, has applied to the Department of Water Resources for an extension of time to avoid forfeiture through non-use, of a portion of the following described water right:

CLAIM No. 37-4112 (Transfer 2315)

Source: Malad River tributary to Snake River

Priority: March 26, 1902

Amount: 370 cfs

Points of Diversion: NW¼NW¼, Sec. 35, T6S, R13E, Gooding county; NW¼SW¼, Sec. 12, T6S, R12E, Twin Falls county; NW¼SW¼, Sec. 9, T6S, R11E, Elmore county; NW¼SE¼, Sec. 12, T5S, R10E, Elmore county; SW¼NW¼, Sec. 28, T5S, R10E, Elmore county

Place of Use: Lands within the King Hill Irrigation District (11,606 acres)

Extension of time to avoid forfeiture is requested for 65 cfs of water.

REASON FOR EXTENSION:

The irrigation system was converted from gravity to pumps having a capacity of 305 cfs in 1978-1979. Extension is requested to allow 5 years for planning and construction to divert the remaining 65 cfs.

Any protest against the approval of the above proposed change described above must be filed with the Idaho Department of Water Resources, 1041 Blue Lakes Blvd. North, Twin Falls, Idaho 83301, on or before August 1, 1983.

REASONS OF KING HILL IRRIGATION DISTRICT

FOR APPLYING FOR ADDITIONAL POINTS OF DIVERSION

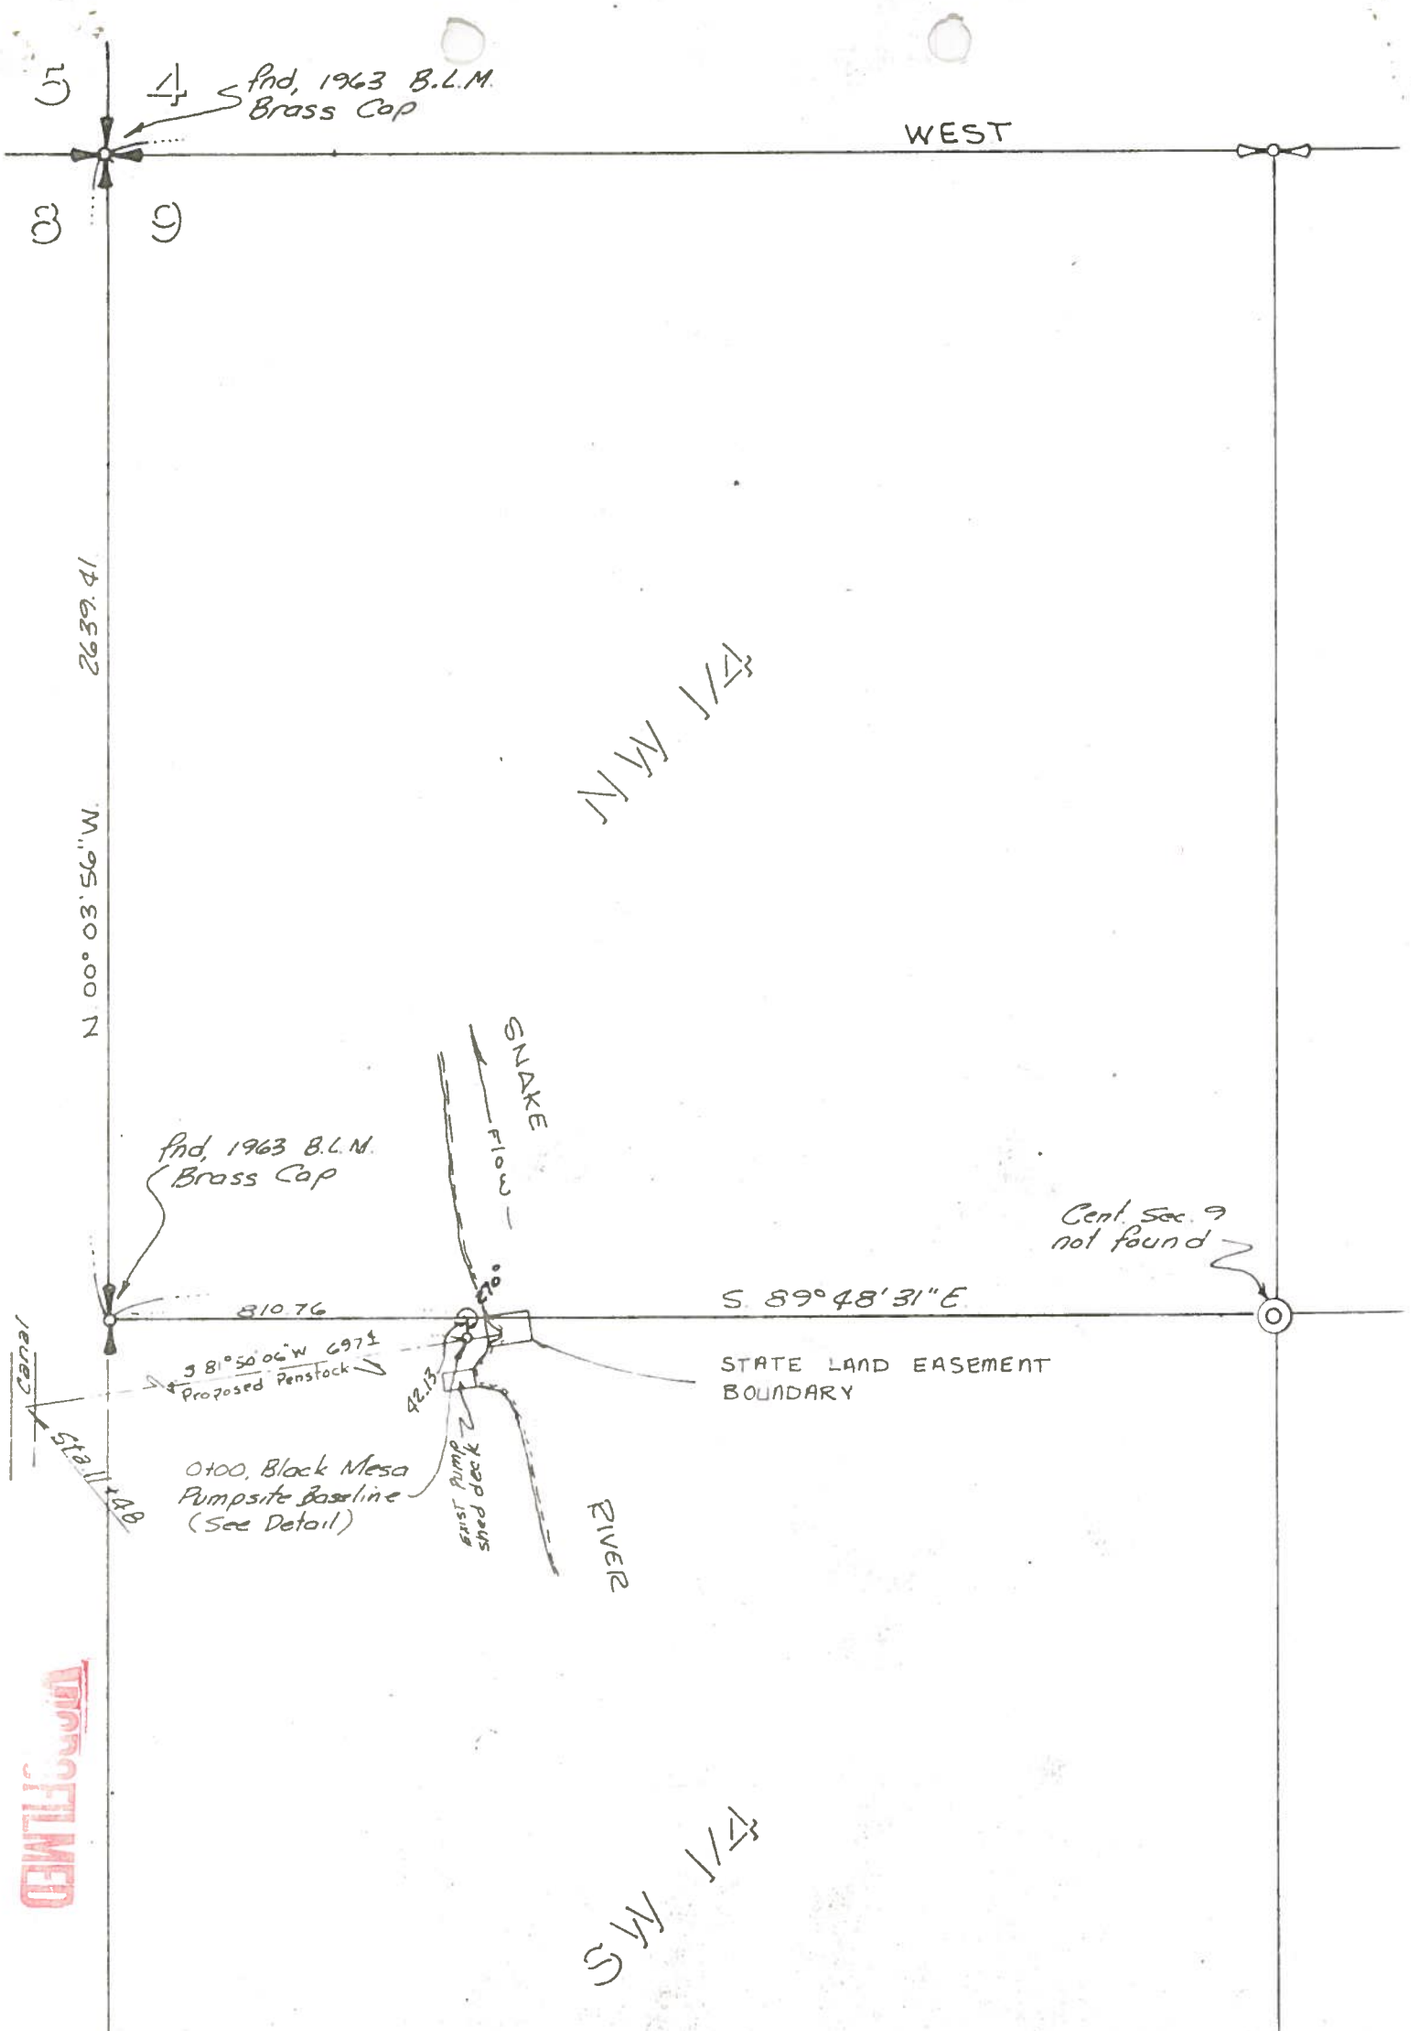

Irreparable damage to the inverted siphon extending from the diversion flume, across Snake River, to the main canal of the District, which occurred in 1978, has necessitated construction of four pumping stations to pump water from Snake River. The original point of diversion is retained, and by agreement with Idaho Power Company the water is diverted at the original point of diversion and used to generate electrical power at the Lower Malad power plant of Idaho Power Company. After passing through the generating facilities of Idaho Power Company, the water is discharged into the Snake River and thence carried in the natural channel of Snake River to the pumping stations located at the points described in the application form. By reason of the provisions of Idaho Code § 42-105, applicant regards this procedure as turning its water into the channel of another stream, mingling the water, and then reclaiming the water at the pump stations, so long as the water is diverted through the Lower Malad power plant of Idaho Power Company.

At such times, if any, as water is not being diverted through the Lower Malad power plant, the pumping stations are regarded as primary points of diversion.

No. 2059

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

Notice is hereby given that King Hill Irrigaiton District of King Hill, Idaho, has applied to the Department of Water Resources for a change of the point of diversion of the waters of Malad River tributary to Snake River. The right sought to be changed is evidenced by Claim No. 37-4074 and is recorded as follows:

Amount: 370 cfs
Priority: March 26, 1902
Point of Diversion: NW¼NW¼, Sec. 35, Twp. 6S, Rge. 13E, B.M., Gooding County. The water is used for domestic and stockwater from January 1 to December 31 and for irrigation purposes of 11,606 acres within the service area of the King Hill Irrigation District.

TO BE CHANGED AS FOLLOWS:

Point of diversion:
NW¼NW¼, Sec. 35, Twp. 6S, Rge. 13E, B.M., Gooding County
NW¼SW¼, Sec. 12, Twp. 6S, Rge. 12E, B.M., Twin Falls County
NW¼SW¼, Sec. 9, Twp. 6S, Rge. 11E, B.M.,
NW¼SE¼, Sec. 12, SWNW, Sec. 28, Twp. 5S, Rge. 10E, B.M., Elmore County

Any protest against approval of the above proposed change of water right must be filed with the Idaho Department of Water Resources, 1041 Blue Lakes Blvd. North, on or before May 7, 1979.

No. 8256

STATE OF IDAHO, } ss.
COUNTY OF TWIN FALLS }

Nola L Laughlin, being first duly sworn upo
oath, depose and say that I am Print Clerk of the TIMES-NEWS, published daily, at Twin Falls, Idaho, and do solemnly swear that a copy of the notice of advertisement, as per clipping attached, was published in the regular and entire issue of said newspaper, and not in any supplement thereof, for two consecutive Thursdays, commencing with the issue dated April 19, 1979, and ending with the issue dated April 26, 1979.

And I do further certify that said newspaper is a consolidation, effective February 16, 1942, of the Idaho Evening Times, published theretofore daily except Sunday, and the Twin Falls News, published theretofore daily except Monday, both of which newspapers prior to consolidation had been published under said names in said city and county continuously and uninterruptedly during a period of more than twelve consecutive months, and said TIMES-NEWS, since such consolidation, has been published as a daily newspaper except Saturday, until July 31, 1978, at which time said newspaper began daily publication under said name in said city and county continuously and uninterruptedly.

And I further certify that pursuant to Section 60-108 Idaho Code, Thursday of each week has been designated as the day on which legal notice by law or by order of any court of competent jurisdiction within the state of Idaho, to be published weekly, will be published; and that at the head of the editorial column of said combined newspapers, and in each issue thereof, Thursday is announced as the day on which said legal notices will be published.

Nola L Laughlin

Subscribed and sworn to before me on this 26th day of April, 1979.

Evelyne Jennings

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES

CLAIM TO A WATER RIGHT

RECEIVED
MAR 21 1979
Department of Water Resources
Southern District Office

Under the provisions of Section 42-243, **Idaho Code**, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), **Idaho Code.** Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

Notice is hereby given that KING HILL IRRIGATION DISTRICT
(Name of Claimant)

P. O. Box 428, King Hill, Idaho 83633 Telephone No. 366-2243
(Mailing Address) (Zip Code)

claims a right to the diversion and beneficial use of the surface or ground water. The extent and nature of said claim is as follows:

(1) Date of priority: (~~When was the water first applied to a beneficial use~~) Location Notice posted under Act of February 25, 1899. March 26, 1902.

A claim is not acceptable on a ground water source with a priority later than March 25, 1963 or on a surface water source with a priority later than May 20, 1971. An exception is that a claim may be filed on single family domestic use from a ground water source.

(2) Describe the source of water: (Name of stream, lake, spring, etc., or ground water)
Malad River tributary to Snake River

(3) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

	(cfs, gpd, AFA)	(Domestic, Irrigation, Stock, Etc.)		(Both dates inclusive) (Mo., Day)		(Mo., Day)
Quantity	370 cfs.	Use	Irrigation	Period of Use From	3/1	To 10/31
Quantity	30 cfs.	Use	Domestic	Period of Use From	1/1	To 12/31
Quantity	30 cfs.	Use	Stock Watering	Period of Use From	1/1	To 12/31
Quantity		Use		Period of Use From		To
Quantity		Use		Period of Use From		To

(4) 370 cfs. (cfs, gpd, AFA) TOTAL QUANTITY USED. (370 cfs. is maximum use for all purposes.)

(5) A) Point of diversion: (Location of point where water is diverted from its source)
NW ¼ NW ¼, Sec. 35 Twp. 6S Rge. 13E B.M., County of Gooding
Additional points of diversion:

B) Describe means of diversion of water: (Pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.). Give sizes and capacities: be as specific as possible. Describe any changes in the system and give the date of the change. Diversion dam, flume, inverted 72" and 78" siphon, main and lateral canals, flumes, siphons and pipelines.

MICROFILMED

(6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

SEE ASSESSMENT OF BENEFITS, LIST AND APPORTIONMENT FILED HEREWITH.

T	R	SEC.	NE¼				NW¼				SW¼				SE¼				TOTAL
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	

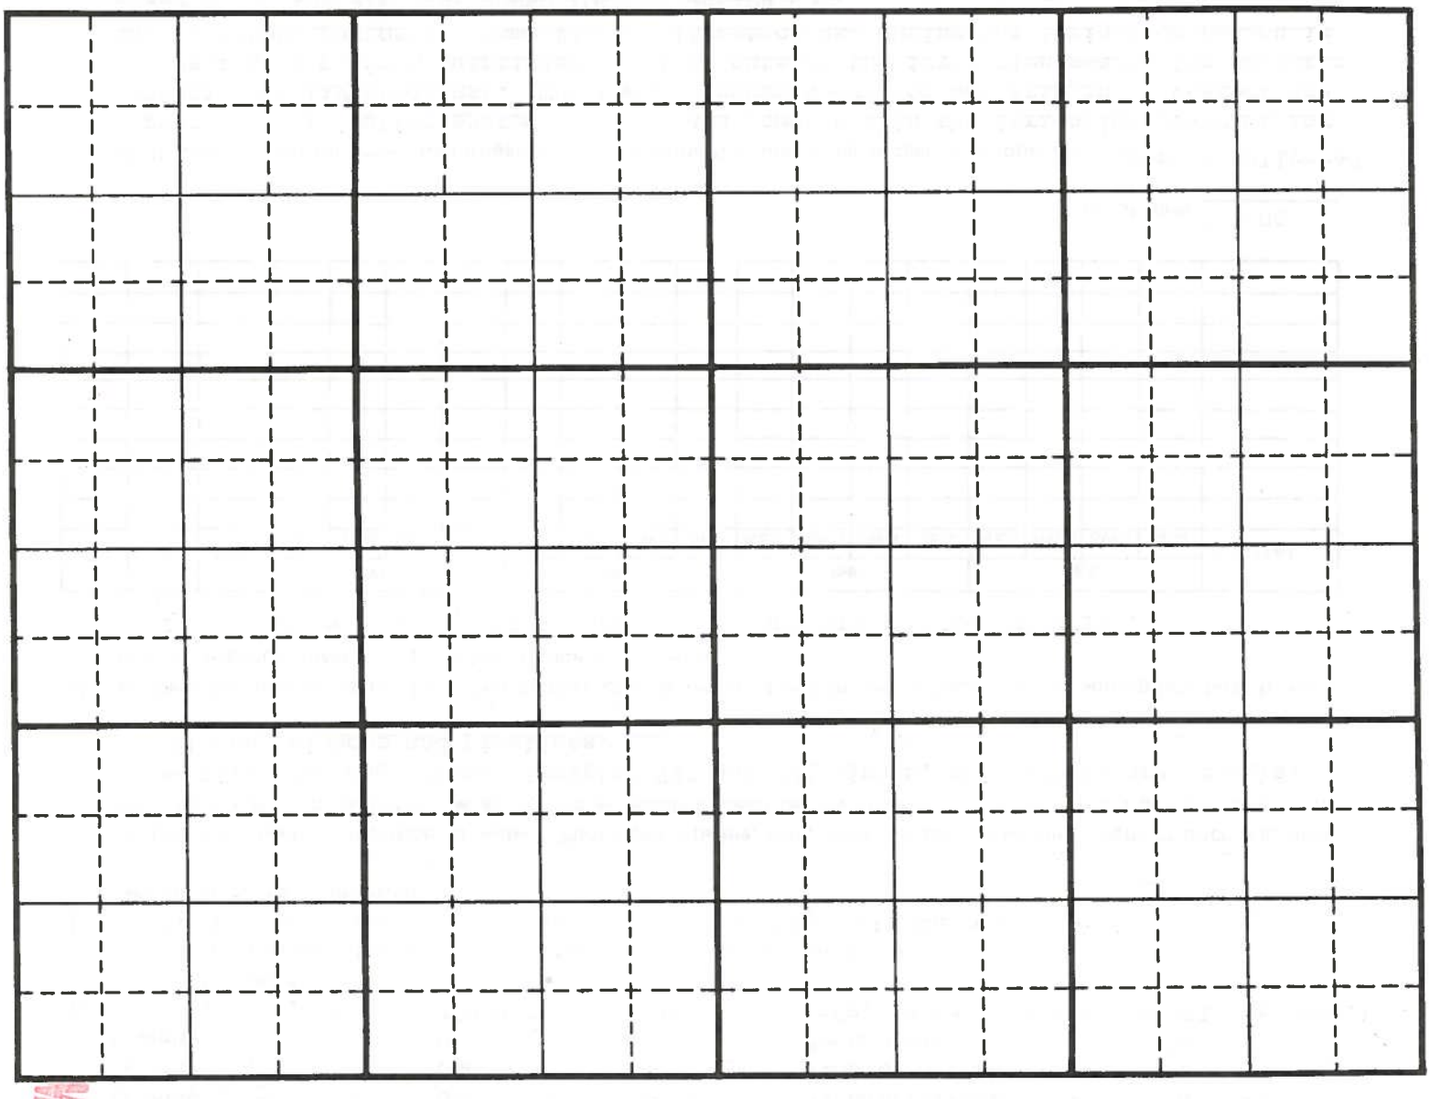

No. of acres 11,606

B) If water is used for other than irrigation, fully describe that use, being as specific as possible: Water is delivered through the irrigation system to farms and homes within the irrigation district for domestic and livestock use. The amounts shown above for domestic and livestock use are estimated maximum quantities required outside the irrigation season for domestic and livestock purposes. Domestic and livestock use during the irrigation season is included in the 370 cfs. shown for irrigation use.

NOTE: Include here the type and number of stock watered Cattle-10,000; horses-550; sheep-12,000 (Estd.)

(7) If you are claiming water as a member of an organization, list name of organization: King Hill Irrigation District.

(8) Remarks SEE ATTACHED REMARKS.

Scale: 2 inches equal 1 mile.

Map should show the location of the point of diversion and the place of use of the water by 40-acre subdivisions, section, township and range of the public land survey system.

REMARKS TO CLAIM TO A WATER RIGHT BY
KING HILL IRRIGATION DISTRICT

1. These water rights were initiated and perfected under a water location made March 29, 1902, by H. G. Rapp and Ernest Pearson, claiming 500 second feet of water from Malad River, recorded in Book 1 of Water Rights at page 248 in the office of the County Recorder of Lincoln County, Idaho, and under a water location made August 7, 1902, by Glenns Ferry Land & Irrigation Co., a corporation, claiming 500 second feet of water from Malad River, recorded in Book 1 of Water Rights at page 251, in the office of said County Recorder, both of said water locations being made pursuant to and in accordance with the provisions of Civil Code, State of Idaho, 1901, Sections 2583 through 2588 (Act of February 25, 1899, S.L. 1899, page 380, §§ 5-8.) The locators of said water rights, and their respective successors in interest, performed the required work and completed construction of the necessary diversion and delivery facilities, and landowners under said system applied the water to beneficial use for irrigation, domestic, and livestock watering purposes, all within the time limits of said Sections 2583-2588, C.C., 1901, as shown, in part, by the certificate made by Jas. Stephenson, Jr., State Engineer of the State of Idaho, dated February 15, 1906, a copy of which is filed herewith as Exhibit No. 1, and as shown in part, by the Contract made May 1, 1908, between the State of Idaho and the Kings Hill Irrigation & Power Company, a copy of which is filed herewith as Exhibit No. 2.

2. Said Exhibit No. 2, and the Amendment to Contract made February 25, 1910, a copy of which is filed herewith as Exhibit No. 3, show the lands for which the irrigation system originally was constructed.

3. The lands upon which waters diverted under this water right were applied to beneficial use in 1978 are described in the Assessment of Benefits, List and Apportionment, a copy of which is filed herewith as Exhibit No. 4.

I, the undersigned, Jas. Stephenson, Jr. of Boise, Idaho, duly appointed and qualified according to law, as the State Engineer of the State of Idaho, do hereby certify that the Malad River (which empties into the Snake River near the town of Bliss, in Lincoln County of said State) and the waters thereof and the conditions surrounding the same are well known to me.

That the laws of the state of Idaho make it my duty to examine from time to time the various water courses in said state upon which water locations have been or may be in the future made, either for mining, reclamation of arid lands or industrial domestic or other purposes.

That in the performance of said duties I have become fully acquainted with the said Malad River, the waters and flow thereof, and the water locations thereon, and the surrounding conditions in relation to the utilization of said waters under and by virtue of said location entries.

I further certify that I have before me Abstract of title to the following:

Right of way, Water Right and property of the Glenns Ferry Land and Irrigation Company, a Corporation.

That there appears in said Abstract a record of Water Locations on said Malad River as follows:

February 6th, 1902, R. A. Goodliffe made a water location on said Malad River, claiming five thousand second feet of water, recorded at page 245 of Book 1 of water rights in the Recorder's office of Lincoln County, Idaho.

EXHIBIT 1

MICROFILMED

March 29, 1902, H. G. Rapp and Ernest Person made a water location on said Malad River, claiming five hundred second feet of water, recorded at page 248 of Book 1 of Water Rights in the Recorder's office of Lincoln County, Idaho.

March 30th, 1902, Ralph A. Goodliffe made a water location on said Malad River claiming five hundred second feet of water, recorded at page 248 of Book 1 of Water Rights in the Recorder's office of Lincoln County, Idaho.

On June 6th, 1902, L. J. Judy made a Water Location on said Malad River, claiming 720 second feet of water, recorded at page 250 of Book 1 of Water Rights, in the Recorder's office of Lincoln County, Idaho.

On August 7th, 1902, the Glenns Ferry Land & Irrigation Co., a corporation organized and existing under and by virtue of the laws of the state of Idaho, made a water location on said Malad River, claiming five hundred second feet of water, recorded at page 251 of Book 1 of Water Rights, in the Recorder's office in Lincoln County, Idaho.

August 31, 1902, J. P. Sullivan and Ralph A. Goodliffe and Lee J. Judy made a water location on said Malad River, claiming 720 second feet of water, recorded at page 252 of Book 1 of Water Rights, in the Recorder's office of Lincoln County, Idaho.

January 15th, 1903, Ralph A. Goodliffe made a water location on said Malad River, claiming seven hundred and twenty second feet of water, recorded at page 254 of Book 1 of Water Rights, in the Recorder's office of Lincoln County, Idaho.

I further certify, according to said Abstract of Title, that on the 23rd day of May, 1902, the said H. G. Rapp and Ernest Pearson sold and conveyed to the said Glenns Ferry Land & Irrigation Company, their said water location for five hundred second feet which was by them made on the said 26th day of March, 1902, and entered of record March 29th, 1902, at said page 248 in said Book 1 of Water Rights, the deed for this conveyance being recorded at page 38 of Book of Deeds 4 in Lincoln County, Idaho.

I further certify that said foregoing mentioned R. A. Goodliffe, Ralph A. Goodliffe, L. J. Judy, P. J. Sullivan and

MICROFILMED

Lee J. Judy have not, nor has either of them, nor has any other person or persons, corporation or corporations for them or either of them done and performed the necessary work or improvements to preserve and protect their aforementioned water locations or either of them.

I further certify that the said Glenns Ferry Land & Irrigation Co., has done and performed all necessary work and labor and made the requisite improvements for the protection, preservation and continuance of the rights obtained by the aforesaid H. G. Rapp and Earnest Pearson, under and by virtue of their said water location made by them on the said 26th day of March, 1902, for five hundred second feet of water on said Malad River, the record of which is entered as aforesaid on page 248 of said Book 1 of Water Rights; in the Recorder's office of Lincoln County, Idaho.

I further certify that the said Glenns Ferry Land & Irrigation Co. has fully protected its said Water Location made as aforesaid by it on the 7th day of August, 1902, for five hundred second feet of water, the entry where of is made at page 251 of Book 1 of Water Rights aforesaid, in the Recorder's office of Lincoln County, Idaho, by doing and performing all the necessary work, labor and improvements therefor.

MICROFILMED

Section 2584 of the Civil Code of the State of Idaho, 1901, provides as follows:

"Within sixty days after the notice is posted, the claimant must commence the excavation or construction of the works, by which he intends to divert the waters, and must prosecute the work diligently and uninterruptedly to completion, unless temporarily interrupted by snow, rain or cold weather."

#4.

Section 2588 provides:

That a failure to comply with such rules deprives the claimant of the right to the use of the water as against a subsequent claimant who complied therewith.

Witness my hand and the seal of my office this 15th day of February, 1906.

(Sig) J. J. Jr

State Engineer.

MICROFILMED

DEPARTMENT OF RECLAMATION
C. A. 7-8

CONTRACT.

THIS AGREEMENT, Made and entered into, in duplicate, this 1st day of May, 1908, by and between the STATE OF IDAHO, the party of the first part, through the State Board of Land Commissioners of said State, said Board consisting of Frank R. Gooding, Governo , Robert Lansdon, Secret ry of State, John J. Guheen, Attorney General, and S. Belle Chamberlain, Superintendent of Public Instruction of said State, and the KINGS HILL IRRIGATION & POWER COMPANY, a corporation organized and existing under the laws of the State of Nevada and doing business in the State of Idaho under and by virtue of a compliance with the laws thereof, the party of the second part, WITNESSETH: THAT,

WHEREAS, the Glenns Ferry Land & Irrigation Company, predecessor in interest of the said party of the second part, did heretofore, to-wit, on the 18th day of May, 1903, file with the said State Board of Land Commissioners of the State of Idaho, a proposal for the construction of certain irrigation works situated in the Counties of Lincoln, Cassia (now Twin Falls), Owyhee and Elmore in said State of Idaho, under the provisions of Section 4 of the Act of Congress approved August 18th, 1894, commonly known as the Carey Act, and the acts amendatory thereof, and the laws enacted by the State of Idaho in pursuance of the power granted by the said Acts of Congress; and,

MICROFILMED

EXHIBIT 2

WHEREAS, at the request of the State of Idaho the lands lying under said irrigation works have been by contract between the United States and the State of Idaho, bearing date the 30th day of March, 1904, set apart by the United States in compliance with the provisions of said Acts of Congress, the said lands being designated as List No. 7 of the State of Idaho, copies of said list being on file in the United States Land Offices at Boise and Hailey, Idaho, and the said lands so set apart and included in said List No. 7 being particularly and fully set out in the said contract between the United States and the State of Idaho, to which reference is hereby had for a full and complete description of said lands; and,

WHEREAS, on the 6th day of May, 1904, the said State Board of Land Commissioners, pursuant to resolution duly passed on said date by said Board, entered into a formal contract with the said Glenns Ferry Land & Irrigation Company, Limited, for the construction of said irrigation works in pursuance to said proposal; and,

WHEREAS, the said Glenns Ferry Land & Irrigation Company, Limited, after expending large sums of money under said contract and partially completing the said irrigation works, sold, transferred and conveyed all its rights, title and interest in such irrigation works and in and to said contract with the State of Idaho, dated May 6th, 1904, to the said Kings Hill Irrigation & Power Company, the party of the second part hereto; and,

MICROFILMED

WHEREAS, on the 22nd day of January, 1908, the said State Board of Land Commissioners, pursuant to resolution theretofore passed by said Board, entered into a contract with the party of the second part for the completion of said irrigation works; and,

WHEREAS, it satisfactorily appearing to said Board from the reports of engineers and others familiar with said irrigation works and the lands situated thereunder and to be irrigated therefrom, that the cost of constructing and completing said works will greatly exceed the estimates of construction upon which the price for water rights was fixed and determined in the said contract of January 22nd, 1908, and the said contract of May 6th, 1904, and that the amount of land that can be irrigated from such irrigation works is considerably less than what is shown by the proposal of the said Glenns Ferry Land & Irrigation Company as susceptible of irrigation therefrom, and that by reason thereof it is now deemed necessary and proper to increase the price at which water rights may be sold by the party of the second part for the irrigation of said lands, and to otherwise change and modify the said contract of January 22nd, 1908, and the said contract of May 6th, 1904; and,

WHEREAS, the said State Board of Land Commissioners have resolved to enter into a new contract with the said party of the second part upon the terms and conditions hereinafter set forth, and have directed the execution of this agreement;

MICROFILMED

NOW, THEREFORE, in consideration of the premises and of the covenants and agreements hereinafter mentioned and to be kept and performed by the respective parties hereto, it is mutually covenanted and agreed, as follows:

I.

PURPOSES OF CONTRACT.

The said party of the second part agrees to construct and build the said irrigation works mentioned in said proposal and hereinafter referred to and more particularly described, and to provide for the sale of shares of water rights in said irrigation works from time to time, as and in the manner hereinafter provided, to persons filing upon portions of the lands hereinbefore described and referred to, and to the purchasers and owners of school and other State lands and to the owners of other lands situated under said irrigation works, or any extension thereof, and which are susceptible of irrigation therefrom; such shares or water rights to be sold on the terms hereinafter specified, and also to finally provide the manner of transferring the ownership, management and control of said works to the purchasers of said shares of water rights as hereinafter provided.

II.

GENERAL SPECIFICATIONS FOR CONSTRUCTION.

It is hereby agreed that the party of the second part shall construct the said irrigation works according to

MICROFILMED

the following specifications:

Point of Diversion. The main canal of said irrigation system diverts water from the Malad River at a point on the right bank of said river near the north and south line between the N. W. 1/4 of the N. W. 1/4 and the N. E. 1/4 of the N. W. 1/4 of Sec. 35, Twp. 6 South of Range 13 East, Boise base and meridian; said point being approximately South 75° 22' East 1,195.5 feet from the southeast corner of Section 27, said Township and Range.

General Course of Canal. From the said point of diversion the canal continues along the right bank of said river for a distance of about 5,600 feet to Snake River; thence across Snake River on a steel span bridge in an inverted syphon wooden pipe 1,400 feet to the south side of Snake River; thence running in a westerly direction along the south side of Snake River for a distance of about twenty miles to a point near the centre of Section 5, Township 6 South of Range 11 East, B. M., which is the end of the main canal, with the lower or north-westerly end of the distribution system extending to a point near the northeast corner of Section 33, Township 5 South of Range 10 East. The said bridge to have a supporting strength four times the weight of the pipe and water resting on it, and the said pipe to be from 5 to 5 1/2 feet in diameter, as may be deemed necessary by the State Engineer in order to carry the water required for the irrigation of the lands herein mentioned. Steel spans and

MICROFILMED

pipe to be constructed and guaranteed by responsible contractors.

Head-Works. The head-works shall consist of a timber crib rock filled overflow diversion dam about 6 feet high; the cribs to be built of 8" x 8" Oregon Fir timber, drift bolted with 3/4" iron, about 80 feet long by 15 feet wide, with four head-gates, each four feet wide, substantially supported into entryway to the canal.

Structures. All fluming, trestle works, pipe lines, bridges, head-gates, waste-gates, pressure boxes and other structures, shall be constructed in accordance with plans filed in the office of the State Engineer; provided, that such structures shall have a minimum capacity of 200 cubic feet per second, as the total delivery through the structures on the main canal line.

Canal. The main canal in earth section shall be on a grade of .00025 and of such section and depth as to provide a minimum carrying capacity of 200 cubic feet per second, to be reduced in capacity and dimensions, as the water is diverted by laterals for irrigation purposes, but always to be of sufficient capacity to fully irrigate the lands herein mentioned and provided for, and to be constructed and built in accordance with the general plans and specifications hereinbefore referred to and filed in the State Engineer's office, and under his general supervision and direction.

MICROFILMED

Laterals. There shall be constructed such subordinate laterals with the necessary weirs and distributing gates as may be required to carry the water of such canal to within one-half mile of each quarter section described in the contract between the United States and the State of Idaho and hereinafter referred to, and the lands of the State of Idaho hereinafter mentioned and all other lands, to be irrigated from said canal, so that the same may be available for use; all of said laterals, works, main canal, flumes, pressure boxes, trestles, bridges and pipe lines and other structures to be used in connection with said irrigation works shall be built and constructed in a good and workmanlike manner, and under the direction of the State Engineer and subject to his approval and the approval of the State Land Board.

It shall be the duty of the said party of the second part to file with the State Engineer of Idaho, notes showing the size and the courses and distances from angle to angle of the canal and main laterals, as soon as the same shall have been finally determined; provided, however, that changes may be made in the plans and specifications from time to time by agreement between the State Engineer and the State Land Board and the said second party, such changes, however, not to be of such character as will in any way impair the efficiency, durability or utility of the

works for the purposes for which they are intended; and said second party shall on demand of said party of the first part, furnish such other and further detailed specifications and plans as said first party may require.

The main canal of this system shall have a carrying capacity, when completed, sufficient to deliver, simultaneously, one cubic foot of water per second of time to every eighty acres of land described in this contract, together with all other lands susceptible of irrigation from said irrigation works and herein specified or referred to, as nearly as the same can be estimated and agreed upon between the State Engineer and the State Land Board and the engineer of said second party.

The plans, specifications and details for the construction of the dams, canals, laterals, head-gates, bridges, trestle work, flumes and other structures required in the construction of such irrigation works, so far as the same are covered by the specifications hereinbefore referred to and to be filed and submitted herein, shall be submitted to the State Engineer and the State Land Board for their approval, prior to the beginning of construction or completion of said works, and the work, when completed, shall be in accordance with the specifications as finally determined upon, and to the satisfaction of the State Engineer and the State Land Board.

MICROFILMED

III.

RIGHT OF WAY.

The said party of the first part grants to the said party of the second part, a right of way across all lands belonging to the State of Idaho, or that may be ceded to the State of Idaho by virtue of the Act of Congress commonly known as the Carey Act, or by any other laws for the construction and operation of said reservoir and irrigation system, which right of way shall be equal to the actual width of the canal, lateral or waste ditch at its base, from toe to toe of the enbankment, together with a strip of land along one side of such canal, lateral or waste ditch and adjacent thereto, not to exceed fifty (50) feet in width along the main canal, thirty (30) feet in width along the laterals leading from said main canal, and a proportionate width along the smaller laterals and waste ditches; said right of way to be located as designated by the Chief Engineer of the party of the second part and approved by the State Engineer, and in all cases to be sufficient or ingress and egress along said canal, lateral or waste ditch, in proportion as the necessity therefor exists, and all water users on lands irrigated from said irrigation system shall have such right of way as may be necessary from the second party's canal or laterals to their own land in order to construct and maintain the necessary service ditches for their own use, and such right of way across said lands as may be necessary for waste ditches. No more laterals,

MICROFILMED

service or waste ditches shall be constructed across any premises than are necessary in the opinion of the Chief Engineer of the Company and the State Engineer, to properly irrigate the land so intended to be irrigated from such ditches and to carry away the waste water therefrom.

The laterals, service and waste ditches shall be constructed under the direction of the Chief Engineer of the Company and subject to his approval and the approval of the State Engineer. In case any land owner is dissatisfied with the location of any service ditch across his premises he shall have the right to appeal to the State Board of Land Commissioners, whose decision shall be final. Detail maps showing the location of laterals and waste ditches constructed by the second party shall be filed with the Board and with the State Engineer, but such filing need not be made prior to the lands being thrown open for settlement.

IV.

APPROPRIATION OF WATER.

It is understood that the said party of the second part is the owner of the right to divert water from the Malad River at the point hereinbefore described, under the following appropriations made by its predecessors in interest: That certain appropriation made on the 26th day of March, 1902, by one Herman Rapp and one Ernest Pearson for the diversion of five hundred (500) cubic feet of water at the point above described to be used for irrigation and power purposes, and under that certain appropriation made by

MICROFILMED

the said Glenns Ferry Land & Irrigation Company, Limited, on the 7th day of August, 1902, for the diversion and appropriation of five hundred (500) cubic feet of water to be used for irrigation purposes, and under that certain permit issued by the State Engineer of the State of Idaho on the 23rd day of January, 1904, to F. J. Hagenbarth and R. J. Shields, being Permit No. 438, for eleven hundred (1100) cubic feet per second of the waters of said river to be diverted at the point of diversion hereinbefore described.

And the said party of the second part hereto agrees to cause to be furnished and delivered to the said canal out of the said appropriations, an amount equal, when measured at the points herein provided, to one-eightieth (1/80) of a cubic foot of water per second of time, for each and every acre of land described in the list of lands attached hereto and marked "Exhibit A" and being a portion of the lands segregated from the public domain and embraced in said contract between the United States and the State of Idaho, generally known as the Carey Act lands and hereinafter referred to as such, and for the irrigation of the lands belonging to the State of Idaho and lying under said irrigation works and susceptible of irrigation therefrom, and for the irrigation of all other lands embraced or mentioned in this contract and lying under and susceptible of irrigation from said canal and irrigation works; said water to be delivered and measured within one half mile of the quarter

MICROFILMED

section in which the land so irrigated or susceptible of irrigation therefrom is situated.

V.

ENTRY OF LANDS.

Upon the execution of this contract and when the said canal shall be so far completed as to ensure the delivery of water for irrigation and reclamation of said lands, the State Board of Land Commissioners of first part shall cause to be opened for settlement as provided by law, the lands described in the list of lands hereto attached as "Exhibit A", and known as the Carey Act lands; provided, however, that second party nor any of its officers or employees shall not be permitted to file on any land under such canal as the agent or attorney-in-fact for any other person; and second party hereby warrants the title to said canal and irrigation system and to the water rights above mentioned, and agrees to defend such title at its own cost and expense in the event of any litigation concerning the same, before such canal and irrigation system is finally transferred and turned over to the corporation to be formed as hereinafter set forth.

VI.

APPLICATION FOR LANDS.

The said party of the first part through its State Board of Land Commissioners, agrees that it will not approve any application for or filing on said Carey Act lands, until

MICROFILMED

the person or persons so applying shall furnish to the said Board a true copy of the contract entered into with the said party of the second part for the purchase of sufficient shares or water rights in said irrigation works, or shares of stock in the corporation to be formed as hereinafter provided, for the irrigation of the lands applied for, it being understood that such applicant shall have acquired a right to at least one-eightieth (1/80) of a cubic foot of water per second of time for each acre filed upon. And the said party of the second part hereby stipulates and agrees that to the extent of the capacity of said irrigation works, after such lands are open for entry and settlement, it will sell or contract to sell water rights or shares for Carey Act lands so to be filed upon, to the qualified entrymen thereof, and to the purchasers of lands belonging to the State of Idaho and embraced within this contract, without preference or partiality other than that based upon priority of application.

VII.

SALE OF LANDS BY THE STATE.

That the said party of the first part, acting through its State Board of Land Commissioners, agrees to sell the Carey Act lands herein mentioned to such persons as are or will be by law entitled to file upon the same, for the sum of fifty cents (50¢) per acre, one-half of which shall be paid at the time of application for the entry of such land

MICROFILMED

made to the said Board, and the remaining one-half paid at the time of making final proof thereon.

VIII.

PRICE OF WATER RIGHTS.

Said party of the second part further agrees and undertakes that it will sell or cause to be sold to the person or persons filing upon any of the lands herein described, or to the owners of other lands not described herein but which are or may be susceptible of irrigation from its canal system, by good and sufficient contract of sale with right of possession and enjoyment by the purchaser pending its fulfillment, a water right or share in said canal for each and every acre filed upon or purchased from the State or acquired from the United States. Each of said shares or water rights shall represent a carrying capacity in said canal sufficient to deliver water at the rate of one-eightieth (1/80) of one (1) second foot per acre per second of time, and each share or water right sold or contracted, as herein provided, shall also represent a proportionate interest in said irrigation works, together with all rights and franchises therein, based upon the number of shares finally sold in said irrigation works. Said irrigation system, however, to be built in accordance with the plans heretofore filed with the Board, which irrigation system, according to said plans, has been determined by the State Engineer to have the carrying capacity hereinbefore mentioned.

Such water rights or shares shall be sold to the

MICROFILMED

person or persons aforesaid for lands included in said segregations and for lands adjacent thereto or that can or may be irrigated therefrom when completed, at a price not exceeding Sixty Five ($65.00) Dollars per share, except as is hereinafter provided, the same to be paid for as follows: Not to exceed ten per cent. (10%) of the purchase price to be paid in cash at the time of sale, and the remainder to be paid in not less than nine annual installments; no such annual installment to exceed ten per cent. (10%) of the purchase price. All deferred payments to bear interest at the rate of six per cent. (6%) per annum, interest payable annually. The number of payments and the amount of each of such payments to be clearly stated in all contracts for the purchase of water rights, which may be entered into between second party and such purchasers. Before any application for entry is received or approved, a copy of the form of water right contract used or to be used by second party in the sale of water rights, shall first be approved by the Board and no other form shall be used than the ones so approved.

To the person or persons purchasing any portion or portions of Sections numbered Sixteen (16) or Thirty-six (36), or any other lands belonging to the State of Idaho and within the exterior limits of said segregations and which are susceptible of irrigation and reclamation from said irrigation system, water rights or shares shall be sold at a price not to exceed Forty ($40.00) Dollars per share; provided, said water rights or shares are purchased

MICROFILMED

within one year after the purchase of the lands from the State, and not exceeding Sixty Five ($65.00) Dollars per share at any time thereafter. Such payments to be made in annual installments as hereinbefore provided in the sale of water rights for Carey Act lands and all deferred payments to draw interest at the rate of six per cent. (6%) per annum, interest payable annually.

In case purchasers or entrymen on lands other than those segregated under the Carey Act, decline to purchase water rights for two years or more after the water is ready for delivery, then Two ($2.00) Dollars may be added to the price of the water right for each year's delay, or fraction thereof.

It is further agreed that no payment other than the initial payment and no interest shall be required under any contract either for Carey Act lands or State or private lands, until the water for the said land is available from said canals for distribution at a point within one-half mile of each legal subdivision of one hundred and sixty (160) acres of the said land, and such water must be available at the beginning of the irrigation season in order to make such payments become due, and all payments and interest provided in said contract shall be advanced in time according to the delay in the delivery of said water as aforesaid.

It is understood and agreed that the said party of the second part shall charge interest at the rate of six per cent. (6%) per annum upon all deferred payments whenever said shares are sold upon a time contract. This agreement shall

MICROFILMED

not, however, be construed to prevent the sale of shares or water rights to purchasers upon terms more favorable than those hereinbefore provided, or to prevent the payment of installments of the purchase price in advance of the maturity of the same at the option of the purchaser. But in no case shall water rights or shares be dedicated to any of the lands aforementioned or sold beyond the carrying capacity of the said canal system or in excess of the appropriation of water as hereinbefore mentioned.

IX.

TRANSFER OF POSSESSION AND MANAGEMENT OF CANAL.

It being necessary to provide a convenient method of transferring the ownership and control of said canal and irrigation works from the said party of the second part herein to the purchasers of said water rights in said canal and for determining their rights among themselves and between said purchasers and the party of the second part herein, and for the purpose of operating and maintaining said canal during the period of construction and afterwards, and for the purpose of levying and collecting tolls, charges and assessments for managing said canal and for the management and operation thereof, it is hereby provided that as soon as said lands are ordered thrown open for settlement, a corporation, to be known as the Glenns Ferry Canal Company, Limited, shall be formed at the expense of the party of the second part, the Articles of Incorporation of said Company to be approved by the Attorney General of the State of Idaho; that the authoriz-

MICROFILMED

ed capital stock of said corporation shall be 18,000 shares, which amount is intended to represent one share for each acre of land which may hereafter be irrigated from said canal. All persons who prior to the formation of such corporation, have purchased or acquired water rights or shares of water from said second party for the irrigation of lands embraced in this contract and being then the owners of such rights or shares, shall be entitled to receive and have issued to them, shares in such corporation so to be formed, equal in number to the water rights or shares of water then owned and held by such persons, and the remainder of the capital stock of such corporation shall be issued to the party of the second part in consideration of the covenants and agreements herein contained, in order to enable it to deliver to purchasers of water rights the shares of stock representing the same. Said shares of stock, however, shall have no voting power and shall be without force or effect until they have been sold or contracted to be sold to the purchasers of land under said irrigation works.

At the time of the purchase of any water right after the formation of said corporation, there shall be issued to the purchaser thereof, one share of the capital stock of said corporation for each acre of land entered or filed upon. That the said party of the second part herein shall in case said water rights or shares of stock are not fully paid for, require the endorsement and delivery to it of said stock, and shall at the same time require of said purchaser

MICROFILMED

an agreement that until thirty five per cent. (35%) of the purchase price of said stock has been paid, the said party of the second part herein shall vote said stock in such manner as it may deem proper at all meetings of the stockholders of said corporation.

But the said second party hereto, nor the said Glenns Ferry Canal Company, Limited, cannot in any manner control any of the said system so as to limit the liability of the second party under the terms of this contract.

The said Glenns Ferry Canal Company, Limited, shall have the management, ownership and control, as above set out, of the said irrigation system as fast as the same is completed and turned over to it for operation by the said party of the second part, as hereinafter provided. Whenever it is certified by the Chief Engineer of the Company and the State Engineer of Idaho, that certain portions of the said irrigation works have been so far completed as to permit the operation thereof for delivery of water to purchasers of water rights, the same may, with the consent of the State Land Board, be transferred and turned over to the said Glenns Ferry Canal Company, Limited, for operation. Such transfer and operation, however, shall not in any manner lessen the responsibility of the said second party with reference to the terms of this contract, nor shall such consent upon the part of the State Land Board be construed as a final acceptance of such portion of such canal, it being always understood that the acceptance of said irrigation system must be

MICROFILMED

in its entirety, and that the bond given for the faithful performance of said contract must be made and be liable for the substantial completion of the entire irrigation system.

X.

WATER RIGHT DEDICATED.

The contract of sale of water right and the certificates of shares of stock in the corporation to be formed as hereinbefore provided, shall each upon being issued to the purchaser or holder of land under the said irrigation works, be made to indicate and define in the contract or certificate, as the case may be, the amount of water, to-wit, one-eightieth of a cubic foot per second of time, allotted to each acre represented thereby, and a carrying capacity in the canal sufficient therefor, such water to be delivered from the canal during each and every irrigation season, and to be measured at or within one-half mile of the quarter section in which the land is situated, in such quantities and at such times as the condition of the soil, crops and weather may determine, but according to such rules and regulations, based upon a system of distribution of water to the irrigators in turn and by rotation, as will best protect and serve the interests of all users of water from such canal system. It is agreed that such system of distribution by rotation shall be devised by said party of the second part and used (if necessity arises) by the said Glenns Ferry Canal Company, Limited, during the period while it has the man-

MICROFILMED

agement of the said system; said system of rotation, however, to be approved by the State Engineer.

The sale or contract of water rights to a purchaser shall be a dedication of the water to the land to which the same is to be applied, and the water right so dedicated shall be a part of and shall relate to the water right belonging to the said system of canal.

XI.

MEASUREMENT OF WATER AND CHARGES FOR DELIVERY.

The party of the second part agrees to construct the said irrigation system so that water conducted through its canals may be available at points not to exceed one-half mile, measured in a direct line, from each quarter section of land described in said segregations, and to be irrigated and reclaimed by water conducted through said canals. That it will construct and place in position, all head-gates, flumes, weirs and other devices for the control and measurement of water in the main canals and in the main laterals, it being intended that the settlers shall, under the direction of the Chief Engineer of the second party, build and furnish one gate or measuring device for his use, but that all other gates, weirs and measuring devices in the main canals, main or subordinate laterals, shall be furnished and constructed by the second party. Plans for measuring devices, head-gates and weirs are to be approved by the State Engineer.

MICROFILMED

No charge shall be made to the purchaser for the delivery of water for said lands, or lands adjacent thereto, prior to the first day of April, 1909. For each succeeding year thereafter, while the second party retains the control of the said Glenns Ferry Canal Company, Limited, said Company may charge and assess the purchasers of water rights in said irrigation system not to exceed the sum of Sixty Cents (60¢) per acre for each acre of land for which a water right has been purchased, the same to become due at the beginning of each irrigation seaon, if the water is ready for delivery at the beginning of such season, and such water must be available for use at a point within one-half mile of each quarter section of such land. If the sum so raised shall be insufficient for the purpose of maintaining, operating and keeping in repair the said system and paying the expenses for the management thereof, then the said party of the second part will furnish all the additional funds necessary to supply such deficiency.

A main lateral, within the meaning of this contract, is a lateral taken from the main line of the canal. A subordinate lateral, within the meaning of this contract, is a lateral built for the purpose of conducting water from a main lateral to a point within half a mile of the place of intended use. A coulee or draw used as a main lateral or a subordinate lateral shall also be included within these terms.

MICROFILMED

XII.

INCREASE OF CAPACITY OF CANAL.

The party of the second part shall be entitled at any time within three years from the date hereof to increase the appropriation of water from the Malad River at the point of diversion herein described, and to increase the capacity of the said canal or any laterals thereof, and to use the same so enlarged or increased for the purpose of carrying any water belonging to the said party of the second part under present appropriations or such additional appropriations; provided, however, that such use shall be allowed only upon the making of such reasonable arrangements as to expenses of care and maintenance of the canal and irrigation system as may be agreed upon between the said party of the second part and the said Board of Land Commissioners of the State of Idaho, or the said corporation to be formed as hereinafter provided. Any rights acquired by the party of the second part under the provisions of this section shall be at all times held, used and employed subject and subordinate to the rights of the purchasers of shares of stock or water rights to the use of water for irrigation purposes, as provided in this contract; and there shall be conveyed and transferred to the said Glenns Ferry Canal Company, Limited, out of the water appropriations of second party, so much of such appropriations as may be necessary to deliver to each and every purchaser of water rights or shares of stock in said Glenns Ferry Canal Company, Limited,

MICROFILMED

the amount of water required to be delivered under the several contracts of purchase made with second party, when measured at the points of measurements as hereinbefore fixed, and the balance of such appropriations is reserved to second party to be utilized or sold for power or other purposes.

XIII.

COMPLETION OF CANAL.

Said party of the second part agrees to immediately commence the work of constructing the said canal and irrigation system and to continue to prosecute such work of construction diligently and continuously to completion, unless temporarily interrupted by snow, rain or cold weather, and there shall be no cessation of work for more than sixty days, without the consent of the Board, and the said irrigation works shall be entirely completed within three years from this date, and at least one-third of the construction work shall be completed within one year from the date hereof, and at least two-thirds of such construction work shall be completed within two years from the date hereof.

It is understood that changes and alterations in the plans and specifications heretofore prepared and filed, may be made at any time, with the consent of the State Board of Land Commissioners.

XIV.

FORFEITURE.

MICROFILMED

The said party of the second part agrees, upon failure on its part to begin the construction of said canal within the time specified in this contract, or upon failure to proceed with or prosecute such work of construction as in this contract provided, after receiving sixty days' notice from the State Board of Land Commissioners, that the portions of said canal which may have been constructed and any and all rights which the party of the second part may have in or to the said canal or irrigation system, shall be at once forfeited to the said party of the first part, the State of Idaho, and the said party of the first part, acting through its State Board of Land Commissioners, may declare all the right, title and interest of second party hereunder and in the said canal system forfeited and proceed to enforce the bond filed by second party, and take possession of the said canal and irrigation works and all the rights which the said party of the second part may have acquired therein, in accordance with the provisions of the laws of the State of Idaho, and particularly Section 13 of an Act approved March 2nd, 1899, Session Laws 1899, Page 287.

XV.

MORTGAGE.

The right, title and interest of the second party in the said works and irrigation system and in the said lands may be mortgaged, as provided by the said Act of Congress and the laws of the State of Idaho, hereinbefore referred to; the form of such mortgage to be approved by the Attor-

MICROFILMED

ney General of Idaho.

XVI.

ESTIMATED COST.

The estimated cost of the proposed irrigation works is Five Hundred Thousand ($500,000.00) Dollars, and the price at which water rights are fixed herein and for which liens are authorized against the separate legal subdivisions of land herein described, is deemed necessary in order to pay the costs and expenses of reclamation and interest thereon.

XVII.

EXISTING LAWS PART OF CONTRACT.

It is hereby understood and expressly agreed that this contract is made and entered into by virtue of the provisions and subject to all of the conditions of an Act of Congress, commonly known as the Carey Act, approved August 18th, 1894, and the acts amendatory thereof, and the laws of the State of Idaho accepting the terms and provisions of the said Carey Act, and the contract between the United States and the State of Idaho segregating from the public domain the lands herein designated as Carey Act lands, and that such laws and contract are as much a part of this contract as if specifically herein set forth; and the said agreement of May 6th, 1904, between first party and the said Glenns Ferry Land & Irrigation Company, Limited, and the said agreement of January 22nd, 1908, between the parties hereto, are

MICROFILMED

superceded by this agreement, and the parties hereto shall from henceforth be governed and their respective rights and equities be determined by this agreement and by said contract between the United States Government and the State of Idaho, and by the laws of the State of Idaho and Acts of Congress above mentioned. This agreement, however, shall not be construed or understood as destroying any right or property gained or acquired by the said Glenns Ferry Land & Irrigation Company, Limited, under the said agreement of May 6th, 1904, or by the party of the second part under the said agreement of January 22nd, 1908, but is intended to preserve and protect all such rights and property and to create other rights in addition thereto in second party.

XVIII.

HIGHWAYS.

Entries of land are understood to be made subject to a right of way, without compensation to the entrymen, for roads upon all exterior section lines and also upon ann all half-section lines, which may be designated by the Board of County Commissioners, as may be provided by law; and such entries shall likewise be subject to such rights of way for such other roads, not exceeding fifty (50) feet in width, as second party may deem necessary; subject, however, to the approval of the State Board of Land Commissioners.

XIX.

DELIVERY OF WATER TO USERS.

MICROFILMED

It is agreed that the said Glenns Ferry Canal Company, Limited, shall not deliver water to or permit the use thereof from said irrigation system by persons who have not purchased water rights or who are not holders of stock in said Glenns Ferry Canal Company, Limited, or who are not otherwise entitled thereto under this contract.

XX.

WATER SUPPLY FOR CITIES AND TOWNS.

It is understood and agreed that so much water as may be necessary for the use of cities and towns and the inhabitants thereof, which cities and towns must necessarily take their water supply from said system of canals, shall be furnished from said canal system to said cities and towns and the inhabitants thereof, upon such terms of sale or rental as may be agreed upon by the party of the second part and said cities and towns, or the owners of the lands upon which the same are established, or the residents therein. Said cities and towns must contribute to the maintenance and support of said irrigation system in proportion to the amount of water used by them, and shares of stock of the Glenns Ferry Canal Company, Limited, shall be issued for the amounts of water represented by said use to the trustees of any village or the mayor of any city, in trust, for the use and benefit of the towns and cities and the inhabitants thereof.

XXI.

AMENDMENTS.

This contract may be altered and amended by second

MICROFILMED

party with the consent of first party, for the purpose of carrying out the objects of the contract, and for the purpose of meeting any conditions now unforeseen.

XXII.

BOND.

The said second party agrees to furnish a good and sufficient bond for the faithful performance of the within contract.

THIS AGREEMENT is executed in duplicate, one copy thereof to be filed with the party of the first part, and the other to be delivered to the party of the second part.

IN WITNESS WHEREOF, the said party of the first part, the State of Idaho, has caused this agreement to be signed by its Governor and President of the State Board of Land Commissioners of the State of Idaho, and the said party of the second part has hereunto caused its corporate name to be subscribed by its President and its corporate seal affixed, attested by its Secretary, the day and year first above written.

DEPARTMENT OF RECLAMATION
C. A. 7-8

AMENDMENT TO CONTRACT.

THIS AGREEMENT, Made and entered into, in duplicate, this 25th day of February, 1910, by and between the STATE OF IDAHO, through its State Board of Land Commissioners, party of the first part, and the KINGS HILL IRRIGATION & POWER COMPANY, a corporation organized and existing under the laws of the State of Nevada, party of the second part, WITNESSETH, THAT,

WHEREAS, The Kings Hill Irrigation & Power Company did on the 1st day of May, 1908, enter into a contract with the State of Idaho, wherein and whereby said Kings Hill Irrigation & Power Company agreed to construct a certain irrigation system in said contract particularly described and designed for the reclamation of certain lands in said contract of May 1st, 1908, particularly described and referred to; and,

WHEREAS, The State Board of Land Commissioners of the State of Idaho did, at a meeting of the said Board held on the 1st day of February, 1910, pass the following resolution, which has been duly entered in the minutes of said Board, to-wit:

> "RESOLVED, That the petition of the Kings Hill Irrigation & Power Company for permission to extend its canal from the terminus as fixed in the contract between th said Company and the State of Idaho, dated May 1st, 1908, so as to reclaim therefrom lands situated in Townships 5 and 6 South and Ranges 9 and 10 East, B. M., commonly known as the Craster Flat Lands, aggregating about 1,667 acres, more or less, be granted,

MICROFILMED

and the said contract of May 1st, 1908, between said Company and the State of Idaho, is hereby amended accordingly; and the proper officers of this Board are hereby authorized to execute an amendment to said contract in order to fully carry out the purpose of this resolution and of said petition."

NOW, THEREFORE, In consideration of the premises, it is agreed between the parties hereto that the Kings Hill Irrigation & Power Company may extend its canal from the terminus as fixed in the said contract between the said Company and the State of Idaho, dated May 1st, 1908, so as to reclaim therefrom the lands described in Exhibit "A" attached hereto and made a part hereof. It is further mutually agreed that plans and specifications for the canals, flumes, pipe lines, bridges and other structures and works to be constructed by the party of the second part hereunder, shall be filed with the State Engineer of the State of Idaho, and the said plans and specifications and the work to be constructed hereunder shall be approved and accepted by the State Engineer of the State of Idaho and the State Board of Land Commissioners in the manner provided in the said contract of May 1st, 1908, and all the terms and provisions of said contract of May 1st, 1908, not in conflict with the provisions of this amended agreement, shall remain in full force and effect and shall apply to the work to be constructed hereunder and to the sale of water rights for the lands described in Exhibit "A" attached hereto, as fully as if said provisions had been incorporated herein and made a part hereof.

IN WITNESS WHEREOF, The said party of the first

MICROFILMED

part, the State of Idaho, acting by and through its State Board of Land Commissioners, has caused this instrument to be executed by its Governor and President of said Board, and the seal of said Board to be hereunto affixed, attested by the Register of said Board, and the party of the second part, the Kings Hill Irrigation & Power Company, has caused its corporate name to be hereunto subscribed by its President and its corporate seal affixed, attested by its Secretary, all of which is done the day and year first above written.

STATE OF IDAHO,

Gentlemen:

Herewith are Claim to a Water Right and Application for Transfer of Water Right, both made by King Hill Irrigation District. Please file the Claim and the Application in your office.

Our check in the amount of $55.00 is herewith in payment of the $20.00 fee for filing the Claim and the $35.00 fee for filing the application for change of point of diversion.

Please notify the Idaho Water Resource Board that the Claim and the Application have been filed.

Yours very truly,

ANDERSON, KAUFMAN, ANDERSON & RINGERT

NOTICE OF CLAIM TO A WATER RIGHT NO. 37-4112

Notice is hereby given that King Hill Irrigation District, King Hill, Idaho has filed a claim to a water right established by diversion and application to beneficial use of 370 cubic feet per second of water from Malad River tributary to Snake River with point of diversion in the NW¼NW¼, Sec. 35, Twp. 6S, Rge. 13E, B.M., Gooding County.

The water is claimed to be used from January 1 to December 31 for domestic and stockwater and from March 1 to October 31 for irrigation purposes of 11,606 acres within the service area of the King Hill Irrigation District with a priority of March 26, 1902.

Any exception to this claim of water right may be filed with the Idaho Department of Water Resources, 1041 Blue Lakes Blvd. North, Twin Falls, Idaho, 83301.

July 12, 1989

King Hill Irrigation District
Attn: Gary Stiehl
P.O. Box 428
King Hill, Idaho 83633

Dear Mr. Stiehl:

The department acknowledges receipt of your statement of resumption of beneficial use on June 8, 1989, and your letter accompanying the statement dated June 1, 1989.

Idaho Code § 42-222 states that "[i,]f the use of the water has not been resumed and report thereon made on or before the date set for resumption of use such rights shall revert to the state and again be subject to appropriation, as provided in this section." Section 42-222 may raise a question about whether a statement of resumption of beneficial use received by the department on June 8, 1989 qualifies as a "report thereon made on or before the date set for the resumption of use . . .." The department will not pursue the matter at this time, however.

The statement of resumption of beneficial use states that the date water was resumed is "continuous." I do not understand the response, unless it is meant to represent that the water has always been used as set forth in the water right. Please clarify what was meant.

Finally, your letter requests a continuation of the extension because of several acres which have been enrolled in CRP and other programs. Idaho Code § 42-222 protects a water user from forfeiture if his land is included in the set aside program. A water right cannot be forfeited while land it is appurtenant to is in a set aside program.

The department cannot expressly extend the time within which water use must resume, however. If there are acres which are not enrolled in the set aside program, and are not irrigated at the present time, there is a possibility the water right on those lands has been forfeited.

If you have any questions, I would be happy to visit with you.

Sincerely,

Gary Spackman

GARY SPACKMAN, Manager
Water Right Permits Section

Gentlemen:

Re: Water Right No. 37-4112

The King Hill Irrigation District would like to have this extention continued as there are several acres in our District that have been set aside in CRP and other programs.

Also this 65 cfs of water is part of our original King Hill Water and Power Company we need to hold on to these rights in order to continue to receive power credit on our agreement with Idaho Power Company.

Best regards,

Gary Stiehl

Re: Water Right No. 37-4112

NOTICE TO RESUME WATER USE

One of the conditions of approval of the Application for Extension of Time to Avoid Forfeiture of a Water Right and subsequent order, is that diversion and use of water be resumed on or before June 1, 1989. Enclosed is a form when submitted, will notify the department that you have again established beneficial use to the extent indicated on the form.

Failure to resume the use of water and to notify the department will be cause for the water to revert back to the state and be again available for appropriation.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

RITA I. FLECK
Secretary/Records Manager

Re: King Hill Irrigation District, Application to Sell or Lease a Water Right to the Water Supply Bank

Dear Mr. Uhling:

The purpose of this letter is to follow up on our meeting of November 6, 1984, regarding the above-referenced application. As I recall, you were going to look into two matters. First, King Hill Irrigation District must identify what lands will cease to be irrigated if existing water rights are removed. Second, the current statute does not authorize rental of water rights established by diversion and beneficial use.

At this time we are holding the application in our file pending further action. Please advise regarding any information that you have found relating to our two concerns.

Sincerely,

NORMAN C. YOUNG
Administrator, Resources Administration Division

NCY/DRT/ls

MICROFILMED
SEP 30 1988

b. Item 10 of the Application for Extension of Time to Avoid Forfeiture of a Water Right, for Claim No. 37-4112, which was Approved on December 14, 1983, states that:

> The District converted from gravity flow to pumping in 1978-79. The pumps have a total capacity of 305 cfs. Additional pumps will have to be installed in order to divert the 65 cfs difference between the capacity of the gravity system and the capacity of the pumps now installed. It is estimated that five years will be required for planning and construction. The total capacity of the gravity system was 370 cfs.

c. Item C(4) of the Water Supply Bank Application asks the applicant to describe if the present place of use will no longer receive water from any source. In response to this question the applicant states that, "The present place of use may receive water from the existing King Hill Irrigation system because of increased efficiency."

In essence, the application suggests a conveyance of 65.0 cubic feet per second of water under Water Right No. 37-4112 from KHID to the Water Bank. The application suggests that the rate of flow is available but indicates no corresponding reduction in acreage irrigated.

4. The water right that is proposed to be leased by KHID contains only one of the three parameters needed to identify a proper water right. Because only a rate of flow is identified, and not a volume or consumptive use (which could be identified by specification of acres proposed to be removed from irrigation), the application at this time should be deemed unacceptable. If another entity were to obtain the 65.0 cubic feet per second rate of flow water right and were to irrigate additional acres with that rate of flow, the provisions of Section 42-1763, Idaho Code, would be violated since the total quantity as measured by volume diverted and consumptive use would be increased, and the use of water would be expended beyond that authorized under the original beneficial use water right.

5. The Framework for Final Resolution of Snake River Water Rights Controversy, which was signed by the Governor of the State of Idaho, the President of Idaho Power Company, and the Attorney General of the State of Idaho, provides in Provision No. 4 that "The State should encourage the establishment of an effective water marketing system." Based on this provision we may be reviewing

MEMORANDUM

TO: Glen Saxton

FROM: Dave Tuthill DT

DATE: October 19, 1984

RE: Application to Sell or Lease a Water Right to the Water Supply Bank in the Name of King Hill Irrigation District

The above-referenced Application, which was received by this office on October 16, 1984, has been routed to me for review and comment. Based on a review of (1) the Application, (2) Claim to a Water Right No. 37-4112, (3) Water Supply Bank Rules and Regulations dated October, 1980, and (4) Sections 42-1761 through 42-1766, Idaho Code, the following comments are provided:

1. This Department has long held and fully supported that an irrigation water right consists of three, equally important, parameters. Rate of flow, volume diverted, and volume consumptively used are the three parameters of a water right, whether explicitly stated in the water right definition, or implied based on the extent of developed use. All three of the parameters are examined when a change in nature of use or change in place of use is proposed.

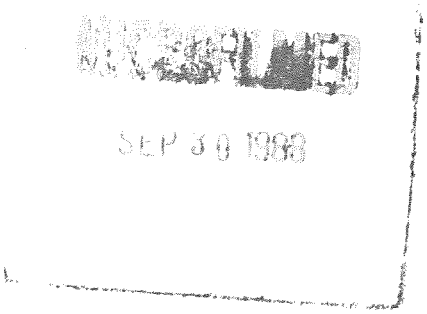

2. Section 42-1763, Idaho Code, provides the reasons that the Director of the Department of Water Resources may reject or refuse approval for a proposed lease or rental under the Water Supply Bank. These reasons include two that are germane to this analysis. The Director may reject or refuse approval for an application which will either (1) "reduce the quantity of water available under other existing water rights," or would (2) "cause the use of water to be expanded beyond that authorized under the water right to be leased."

3. The Application to Sell or Lease a Water Right to the Water Supply Bank submitted by the King Hill Irrigation District (KHID) is clear in intent.

MICROFILMED
SEP 30 1988

a. Exhibit "A" states in part that "The water is available out of the Malad River in which King Hill Irrigation District previously utilized through their gravity flow system [sic]."

applications to sell or lease water rights to the Water Supply Bank with increased frequency. It is important that the initial rulings regarding water rights that are proposed to be placed in the Water Supply Bank be consistent with established principles of Idaho Water Law. Therefore, only water rights which are complete and viable should be allowed to be admitted to the Water Supply Bank. Based on this analysis, it is my recommendation that the water right proposed to be placed in the Water Supply Bank be judged incomplete and unacceptable for the transaction proposed. If KHID desires to remove currently irrigated acres from production, then it is possible that some water could be placed in the Water Supply Bank, on an acre-for-acre basis.

Total number of acres to be irrigated _____

B. DESCRIPTION OF PORTION OF RIGHT FOR SALE OR LEASE (If the entire right is for sale or lease, omit part B.)

1. Amount of water: a. _____ cubic feet per second
&/or
b. _____ acre feet per annum

2. Point of diversion _____ ¼ _____ ¼, Section _____ Township _____
Range _____, B.M., _____ County
Additional points _____

3. Place of use:

TWP.	RANGE	SEC.	NE¼				NW¼				SW¼				SE¼				TOTALS
			NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	NE¼	NW¼	SW¼	SE¼	

Total number of acres to be irrigated _____

C. ADDITIONAL INFORMATION ABOUT RIGHT, OR PORTION THEREOF, FOR SALE OR LEASE

1. Explain how the right, or portion thereof, was acquired and attach a copy of the deed to the land to which it is appurtenant or other evidence of ownership of the right.

See Claim No. 37-4112

2. Describe the frequency of water use under the right, or portion thereof, during the past 5 years. Attach watermaster records, pumping power bills, or other evidence to demonstrate that the right has not been lost through abandonment or forfeiture:

See the Application for Extension of Time to avoid forfeiture of a water right file with the Department of Water Resources. (Attached hereto and incorporated by reference is a true and correct copy of said extension).

3. Describe the relative availability of water to fill the right, or portion thereof. Attach evidence to support this description:

See information contained in #2 above and Exhibit "A".

4. Describe any other water rights with the same purpose and place of use as the right, or portion thereof. Will the present place of use no longer receive water from any source?

No other water rights with the same purpose and place of use. The present place of use may receive water from the exisiting King Hill Irrigation system because of increased efficency.

5. Describe the anticipated effect of this sale or lease upon other water users.

There is no anticipated effect on other water users with a right senior to King Hill Irrigation District.

MICROFILMED
SEP 30 1988

6. List any assessments, charges or fees currently being paid for the use of the water.

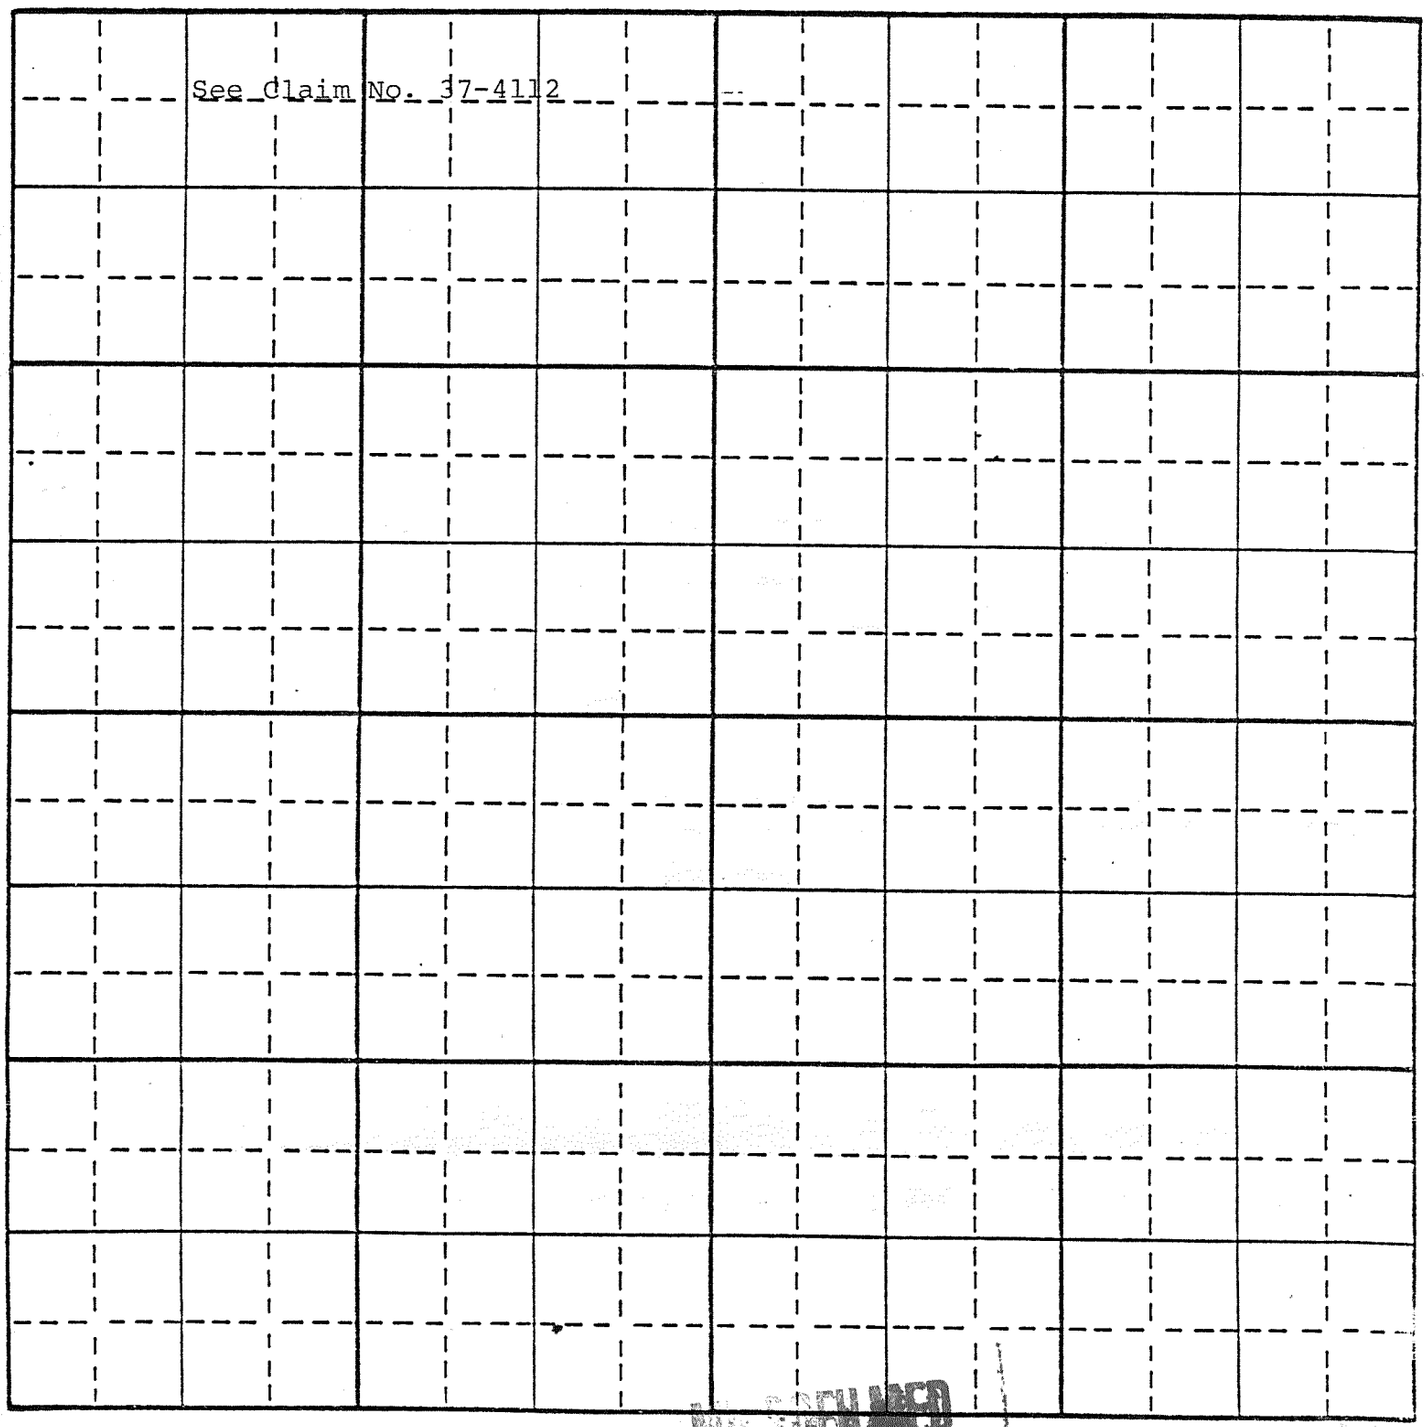

No assessments are being levied against water users.

7. If the water right is a permit, describe the work accomplished toward developing the right.

See Claim No. 37-4112

8. If the right to the use of the water or the use of the diversion works or irrigation system is represented by shares of stock in a company or corporation, or if such works or system is owned or managed by an irrigation district, a written consent of the sale or lease must be attached.

9. Draw a map indicating the point(s) of diversion and place of use of the right, or portion thereof. Show clearly the land involved by section, township and range.

SCALE. 2 inches equal 1 mile. Draw plan in ink.

A G R E E M E N T

THIS AGREEMENT, Made this 5th day of February, 1979, between KING HILL IRRIGATION DISTRICT (hereinafter referred to as the "District"), organized, existing and operating under the laws of the State of Idaho, and IDAHO POWER COMPANY (hereinafter referred to as "Idaho"), a corporation, organized and existing under and by virtue of the laws of the State of Maine, duly qualified and doing business in the State of Idaho.

W I T N E S S E T H:

WHEREAS, the District is the successor in interest to the King Hill Irrigation and Power Company, and Idaho is successor in interest to the Malad Power Company; and,

WHEREAS, said predecessors in interest entered into an agreement dated the 9th day of February, 1909, relating to, among other things, a siphon (now commonly referred to as the Head Siphon and hereinafter referred to as the "Head End Siphon"); and

WHEREAS, the District owns and operates said Head End Siphon, which crosses the Snake River from Lot 2 to Lot 3, Section 27, Township 6 South, Range 13 East, Boise Meridian, Gooding County, Idaho; and,

WHEREAS, the Head End Siphon was damaged and rendered inoperative during the 1978 irrigation season by movement of the land mass on the West bank of the Snake River on which the support bridge and the outlet end of the Siphon are located; and,

WHEREAS, the District has determined that its most satisfactory alternative for restoring its irrigation system to operation is to discontinue use of the Head End Siphon and to construct five (5) river pumping stations and related facilities,

MICROFILMED SEP 30 1988

or construct only four (4) river pumping stations, if the District decides not to construct a river pumping station specifically to serve only that land owned by Eugene and Aurora Ascuena, husband and wife, (hereinafter referred to as the "Ascuenas") and Idaho. Said river pumping stations, along with related facilities, shall be constructed to pump water from the Snake River into the canal and laterals of the District; and,

WHEREAS, The District, on the date hereof, is in the process of determining whether it can substantially reduce the cost of restoring its irrigation system, by constructing a river pumping station, specifically to serve only that land owned by the Ascuenas and Idaho; and,

WHEREAS, Idaho has made application to the Idaho Public Utilities Commission for a Certificate of Convenience and Necessity and plans on making application to the Federal Energy Regulatory Commission for a License to construct the A J Wiley Project, the reservoir pool from which would extend upstream beyond the current site of the Head End Siphon requiring the removal or raising of said Head End Siphon; and,

WHEREAS, the parties hereto recognize the rights, duties, obligations and limitations of the February 9, 1909 Agreement heretofore referred to; and,

WHEREAS, the District's urgent concern for restoring its irrigation system to operation, as soon as possible, and Idaho's plans to make application to the various Federal and State regulatory agencies for permission to construct the A J Wiley Project, which construction would require the removal or raising of the Head End Siphon as currently located, are conditions which render it

MICROFILMED
SEP 30 1988

appropriate for the parties to resolve certain matters at this time, rather than awaiting final action on those applications made by Idaho with respect to the A J Wiley Project; and,

WHEREAS, Idaho wishes to insure that it will have no liability to the District, any individual, partnership or corporation, which is a landowner in said District, or to any third party for any injury, death or property damage, resulting from or with respect to the District's irrigation system, including, without limitation, those injuries, deaths or property damages, resulting from or with respect to the District's irrigation system, located upstream from that dam which is to be part of the A J Wiley Project, caused as a result of or in any way related to the existence of and/or action of the water in the pool created as a result of the construction of the Wiley Dam; and,

WHEREAS, Idaho wishes to insure that, if the District constructs a river pumping station specifically to serve only that land owned by the Ascuenas and Idaho, it will have no liability to the District, to any individual, partnership or corporation, which is a landowner in said District (including, without limitation, the Ascuenas and their heirs, successors and assigns) or to any third party, resulting from or with respect to the proposed inundation or the inundation of the District's pumping station, serving the Ascuenas and Idaho or their heirs, successors and assigns, said inundation caused as a result of or in any way related to the creation of the Wiley pool.

WHEREAS, Idaho wishes to insure that it will have no liability to the District, to any individual, partnership or corporation, which is a landowner in said District or to any third

MICROFILMED
SEP 30 1988

party for any injury, death or property damage, including, without limitation, any environmental damage, arising out of or caused by the removal of the Head End Siphon, including, without limitation, the pipe, the support bridge and the piers, whenever and however said piers are removed and that pipe to be removed on the East bank of the Snake River.

WHEREAS, Idaho wishes to obtain the use of all of the District's water, for power generation purposes, through Idaho's Lower Malad power plant and a portion of the District's water, for power generation purposes, through its Bliss power plant. Idaho also wishes to obtain the use of said water, for power generation purposes, for any future hydro plants, which Idaho may construct, on that stretch of the Snake River, lying between and including the current locations, on the date hereof, of Idaho's Lower Malad and Bliss power plants, including, without limitation, the A J Wiley power plant, which future power plant or plants can use all or any portion the District's water.

WHEREAS, Idaho proposes to make certain credits (hereinafter referred to as the "Credit Amount"), to the District's irrigation accounts established for each of the five (5) river pumping stations that the District will construct or four (4) if the District decides not to construct a river pumping station specifically to serve only that land owned by the Ascuenas and Idaho, said Credit Amount to be given as compensation for the use of the District's water for power generation purposes; and,

WHEREAS, Idaho proposes a reduction of the Credit Amount given to the District as compensation for the use of the District's water under the following circumstances. If the A J Wiley Project

MICROFILMED
SEP 30 1988

is not constructed, and if either of Idaho's Lower Malad or Bliss power plants, but not both, ceases to operate due to lack of regulatory authority, the Credit Amount shall be reduced by that percentage, which represents the ratio that the energy generation gained at that power plant, which ceases to operate, bears to the total energy generation gained at the Lower Malad and Bliss power plants. Said energy generation gained was determined by computing the energy generation gained by Idaho due to the use of the District's water, for power generation purposes, pursuant to this Agreement, under median water conditions. If the A J Wiley Project is constructed, and if Idaho's Lower Malad power plant ceases to operate due to lack of regulatory authority, then that reduction of the Credit Amount, resulting from the loss of power generation at Idaho's Lower Malad power plant, shall be reduced by that percentage, which represents the ratio that the energy generation gained by Idaho, as a result of the A J Wiley Project, bears to the total energy generation gained by Idaho, as a result of the use of the District's water, for power generation purposes, at Idaho's Lower Malad, Bliss and A J Wiley power plants under median water conditions; and

WHEREAS, Idaho proposes that the Credit Amount, given to the District, as compensation, for the use of the District's water shall, if the A J Wiley Project is not constructed, terminate when Idaho ceases to operate both its Lower Malad and Bliss power plants, due to lack of regulatory authority, and shall, if the A J Wiley Project is constructed, terminate when Idaho ceases to operate its Lower Malad, Bliss and A J Wiley power plants due to lack of regulatory authority.

WHEREAS, the District proposes that the right of Idaho

MICROFILMED
SEP 30 1988

to use the District's water, for power generation purposes, shall terminate when Idaho ceases to operate its Lower Malad, Bliss and A J Wiley power plants due to lack of regulatory authority.

WHEREAS, the District proposes to use electric power and energy obtained from Idaho for operating the District's pumping installations.

NOW, THEREFORE, the parties hereto, in consideration of the premises and mutual covenants and conditions herein contained, agree as follows:

PART I

THE DISTRICT AGREES:

1. To immediately and completely remove before that consideration, as hereinafter specified in Part II, Paragraph 1 of this Agreement, will be paid by Idaho to the District, the District's Head End Siphon, as hereinafter specified, currently crossing the Snake River at that location hereinbefore specified, including, without limitation, the pipe and the support bridge, which are part of said Head End Siphon, but excepting from this immediate and complete removal, pursuant to the conditions hereinafter specified in this same paragraph, those piers upon which the support bridge rests. The District agrees that if Idaho is permitted to construct the A J Wiley Project, and if any governmental agency, either local, state or federal requires either the partial or complete removal of said piers, to remove said piers to the elevation and by whatever method said governmental agency requires. The District agrees that if Idaho is permitted to construct the A J Wiley Project, and no local, state or federal agency requires the removal of said piers, to remove said piers,

MICROFILMED
SEP 30 1988

when Idaho so desires, to an elevation equal with Two Thousand, Seven Hundred Seventeen (2,717) feet above sea level. Said removal may be accomplished by whatever method the District desires, so long as said method does not violate any local, state or federal law or regulation. The District agrees that if prior to the construction of the A J Wiley Project, or if the A J Wiley Project is not constructed, if any governmental agency, either local, state or federal, requires either the partial or complete removal of said piers, to remove said piers to the elevation and by whatever method said governmental agency requires. The District agrees and acknowledges, by the execution of this Agreement, that the consideration hereinafter stated in Part II, Paragraph 1 of this Agreement, which Idaho will pay to the District, includes payment for the removal of said piers, whenever, however and to whatever elevation said piers are required to be or are in fact removed, pursuant to the conditions hereinbefore specified in this same paragraph.

2. To immediately and completely remove, before that consideration as hereinafter specified in Part II, Paragraph 1 of this Agreement, will be paid by Idaho to the District, the District's unused pipe on the East bank of the Snake River, which pipe, connected with the Head End Siphon, crossing the Snake River. Said unused pipe shall be removed up to an elevation equal with Two Thousand, Seven Hundred Fifty-two (2,752) feet above sea level.

3. That Idaho shall not be liable to the District, any individual, partnership or corporation, which is a landowner in said District, or to any third party, including, without limitation, any governmental agency, for any injury, death or

MICROFILMED
SEP 30 1988

property damage, including, without limitation, any environmental damage or judgment, whatever its nature, arising from or resulting because of an environmental lawsuit, which injury, death or property damage arises out of or is any way related to the existence of and/or removal of those piers upon which the support bridge of the Head End Siphon rests.

4. That it will not use the Head End Siphon or that portion of the canal upstream from the Wiley Dam site for transmission of the District's irrigation water during the existence of this agreement. The District may install pipelines in the canal in order to deliver water by pumping to lands upstream from the Wiley Dam site.

5. That the future expansion of irrigation services, under the existing water rights of the District, shall be limited, during the existence of this Agreement or any part hereof, to One Thousand, Five Hundred (1,500) acres more than that land area irrigated by the District in the year 1978, under the District's water rights. Said One Thousand, Five Hundred (1,500) acres shall, with the exception of Forty (40) acres, be irrigated only by water pumped from the Snake River downstream from the current location, on the date hereof, of the Bliss Dam. The District, in the year 1978, irrigated Ten Thousand, Six Hundred Fifty (10,650) acres.

6. That Idaho has no liability for failing to provide electric service to anyone or all of the District's pumping stations by a specific date, including, without limitation, the start of the irrigation season in the year 1979, whatever the reason for said failure including, without limitation, the following:

MICROFILMED
SEP 30 1988

a) failure to obtain the necessary easements and rights of way, as shall be necessary to enable Idaho to extend service lines or other facilities to the District's pumping stations; and

b) failure to obtain and/or install such equipment as is necessary in order to enable Idaho to provide electrical service to the District's pumping stations.

7. To reimburse Idaho for all monies expended in obtaining the rights of way and easements necessary in order to enable Idaho to extend service lines or other facilities to the District's pumping stations.

8. To pay on demand, protect, defend, indemnify and hold harmless Idaho and Idaho's officers, directors, shareholders, employes, agents, contractors, and servants, and their successors and assigns (the foregoing being herein referred to individually as "Indemnitee" and collectively as the "Indemnitees"), from and against all liabilities, claims, penalties, causes of action, suits, cost and expenses (including without limitation, attorney's fees and expenses) or judgments of any nature arising from or relating to (a) any injury, death or property damage to the District, to any individual, partnership or corporation, which is a landowner in said District or to any third party arising out of the construction, operation, maintenance, use or existence of any facilities of the District's irrigation system, including, without limitation, any injury, death or property damage to the District, any individual, partnership or corporation, which is a landowner in said District or to any third party resulting from or with respect to the District's irrigation system located upstream from the Wiley Dam caused, as a result of the existence of and/or action of the water in the pool created as a result of the construction of

MICROFILMED
SEP 30 1988

the Wiley Dam; (b) any injury, death or property damage, including, without limitation, any environmental damage or judgment, whatever its nature, arising from or resulting because of an environmental lawsuit, to the District, any individual, partnership or corporation, which is a landowner in said District, or to any third party, including, without limitation, any governmental agency, which injury, death or property damage arises out of or is in any way related to the removal of the Head End Siphon, as hereinbefore specified, and to the existence of and/or removal of those piers upon which the support bridge of the Head End Siphon rests; (c) any injury, death or property damage to the District, any individual, partnership or corporation, which is a landowner in said District or to any third party resulting from Idaho's failure to provide electric service to any one or all of the District's pumping stations by a specific date, including, without limitation, the start of the irrigation season in the year 1979; and (d) if the District constructs a river pumping station specifically to serve only that land owned by the Ascuenas and Idaho, any injury, damage or costs to the District, any individual, partnership or corporation, which is a landowner in said District (including, without limitation, the Ascuenas or their heirs, successors, and assigns) or to any third party, resulting from or with respect to the proposed inundation or the inundation of the District's pumping station, serving the Ascuenas and Idaho or their heirs, successors and assigns, said inundation caused as a result of or in any way related to the creation of the Wiley pool. If any action, suit or proceeding arising from or relating to any of the foregoing is brought against any indemnitee, the District shall, at the District's expense, resist and defend such action, suit or

MICROFILMED
SEP 30 1988

proceeding or cause the same to be resisted and defended by counsel, designated by Idaho, and acceptable to the Indemnitee and the District. Any indemnitee shall have the right to employ separate counsel for any such action, suit or proceeding and to participate in the defense thereof, but the employment of such counsel shall not be at the District's expense unless (i) the employment of such counsel has been specifically authorized by the District in writing or (ii) the District shall not employ counsel to have charge of the defense of such action, suit or proceeding, or (iii) there is a conflict of interest which would prevent counsel for the District from representing both the District and the Indemnitee, in any of which cases the District shall not have the right to direct the defense of such action on behalf of the Indemnitee, it being understood that, regardless of whether such counsel is representing all of the parties entitled to the indemnification hereunder, the District shall not be liable under clause (iii) above, for the fees and expense of more than one separate counsel, who shall be approved by Idaho. The District shall not be liable to indemnify any Indemnitee for any settlement of any such action, suit or proceeding effected without the District's consent. The obligations of the District hereunder shall survive this Agreement and shall be binding on the successors and assigns of the District.

9. That Idaho shall not be liable to the District, or any individual, partnership or corporation, which is a landowner in said District, or to any third party for any injury, death or property damage, resulting from or with respect to the District's irrigation system, including, without limitation, those injuries,

MICROFILMED
SEP 30 1988

deaths or property damages, resulting from or with respect to the District's irrigation system, located upstream from the Wiley Dam, caused as a result of or in any way related to the existence of and/or action of the water in the pool created as a result of the Wiley Dam.

10. That Idaho shall have the non-consumptive use of all of the District's water, for power generation purposes, through Idaho's Lower Malad power plant and a portion of the District's water, for power generation purposes, through its Bliss power plant. Idaho also shall have tne non-consumptive use of the District's water, for power generation purposes, for any future hydro plants Idaho may construct on that stretch of the Snake River, lying between and including the current locations, on the date hereof, of Idaho's Lower Malad and Bliss power plants, including, without limitation, the A J Wiley power plant, which future power plant or plants can use all or any portion of the District's water for power generation purposes.

11. To divert its water, during the irrigation season only and in such a manner, that to the extent the presently existing capacity of Idaho's Lower Malad and Bliss power plants can use the District's water, for power generation purposes, water other than that diverted by the District for irrigation, during the irrigation season only, and being applied directly on that land upstream from a point opposite the District's Black Mesa River pumping station, will be available to Idaho for use at Idaho's Lower Malad and Bliss power plants and for any future hydro plants Idaho may construct, on that stretch of the Snake River, lying between and including the current locations, on

MICROFILMED
SEP 30 1988

the date hereof, of Idaho's Lower Malad and Bliss power plants, including, without limitation, the A J Wiley power plant, which future hydro plant or plants can use all or any portion of the District's water for power generation purposes.

12. To close and screw down its gate, in the flume located at that point immediately adjacent to Idaho's point of diversion, off the flume, for its Lower Malad power plant. Said gate shall be closed in such a manner so as to insure that there will be no leakage of water.

13. That Idaho shall be permitted to maintain its A J Wiley Project boundary, including, without limitation, the water level in the Wiley pool, at points within the District's lands and/or easements, including, without limitation, that easement heretofore occupied by the Head End Siphon or any pipe connecting thereto on either the East or West bank of the Snake River, if said lands or easements fall within the A J Wiley Project boundary, as hereinafter defined, and/or any future amendment thereto. Pursuant to 18 CFR §4.41, Exhibit K (1)(iii), "project boundary" is defined as follows:

> "(iii) Except with respect to lands necessary or appropriate for recreation purposes, for which it is recognized that additional project area will generally be required, the project boundary shall be no more than 200 feet (horizontal measurement) from the exterior margin (in general, high-water level) of reservoirs, nor shall the width of the project area for canals, ditchs, pipelines, transmission lines, roads, and other so-called continuous structures exceed 200 feet, unless satisfactory reasons are given to the contrary."

14. Not to oppose Idaho in its pursuit of regulatory permission to construct the A J Wiley Project and the Dike Project on the Snake River and to support, by a favorable

MICROFILMED
SEP 07 1988

resolution of the Board of Directors of the District, any support reasonably requested by Idaho in connection with its attempt to seek regulatory permission to construct said projects; and

15. To support Idaho in its efforts to obtain a renewal or extension of its license or a new license for its Bliss hydro electric generating plant, when the license for said plant terminates and to support Idaho in its current efforts to obtain a new license for its Lower Malad hydro electric generating plant, said support to be in the form of a favorable resolution of the Board of Directors of the District and any other support reasonably requested by Idaho; and

16. To seek the authorization and approval of the Board of Directors of the District to enter into this Agreement, said authorization and approval to be in the form of a resolution, which resolution shall specify, by name or office, those officers and directors of the District authorized to sign this Agreement on behalf of the District; and

17. To reimburse Idaho for those costs, which Idaho will incur in order to serve the District's pumping plants, including, without limitation, line extensions, substation costs and other related facilities. This total cost, and thus the amount of the reimbursement payable to Idaho, by the District, shall be reduced by three (3) times that amount of money, which represents the difference between the total guaranteed annual revenue Idaho would receive from the District, based upon the applicable rate schedule in effect on February 1, 1979, and the sum of One Hundred Eighty-five Thousand, Seven Hundred Dollars ($185,700.00).

MICROFILMED
SEP 30 1988

18. To make application to the Idaho Department of Water Resources to change its point of diversion, from that point on the Malad River, where said water was diverted, during the calendar year 1978, or if permissible under the Idaho law, to obtain supplemental points of diversion to those points on the Snake River, which points correspond with the location of the District's five (5) river pumping stations or four (4) river pumping stations if the District decides not to construct a river pumping station specifically to serve only that land owned by the Ascuenas and Idaho, which locations have been reviewd and approved by Idaho.

19. That it will not sell, transfer or otherwise divest itself of water, the right to which the District has to divert for irrigation purposes, as of the date hereof, if said sale, transfer or divesture would, in any way affect Idaho's right to the use of the District's water, for power generation purposes, pursuant to this Agreement, at Idaho's Lower Malad and Bliss power plants and at any future hydro plant or plants Idaho may construct, on that stretch of the Snake River, lying between and including, the current locations, on the date hereof, of Idaho's Lower Malad and Bliss power plants, including, without limitation, the A J Wiley power plant.

20. If the District constructs a river pumping station specifically to serve only that land owned by the Ascuenas and Idaho, Idaho shall not be liable to the District, any individual, partnership or corporation, which is a landowner in said District (including, without limitation, the Ascuenas or their heirs, successors and assigns), or to any third party, resulting from

MICROFILMED
SEP 30 1988

or with respect to the proposed inundation or the inundation of the District's pumping station serving the Ascuenas and Idaho or their heirs, successors and assigns, said inundation caused as a result of or in any way related to the creation of the Wiley pool.

PART II

IDAHO AGREES:

1. To pay to the District, upon completion of construction of the District's pumping stations and related facilities, and upon removal of the Head End Siphon and unused pipe, as hereinbefore specified in Part I, Paragraphs 1 and 2 of this Agreement, and upon obtaining evidence of the necessary approvals and orders, as hereinafter specified in Part III, Paragraphs 7 and 8 of this Agreement, the sum of One Million Dollars ($1,000,000.00) in consideration of the covenants and obligations of the District.

2. To credit to the District's five (5) irrigation accounts or four (4) irrigation accounts, if the District decides not to construct a river pumping plant specifically to serve only that land owned by the Ascuenas and Idaho, the Credit Amount. Said accounts are the only accounts subject to this Agreement. Said credit shall be made March 1 of each year, beginning with the calendar year 1979, during the life of the Energy portion of this Agreement, or any reduction thereof, as hereinafter defined in Part III, Paragraphs 3, 4 and 5 of this Agreement, as consideration for the use of the District's water, for power generation purposes, the sum of One Hundred Eighty-five Thousand, Seven Hundred Dollars ($185,700.00) (hereinbefore and hereinafter referred to as the "Credit Amount"). This Credit Amount shall be proportionally allocated to each of

MICROFILMED
SEP 30 1988

the District's five (5) river pumping stations or four (4) river pumping stations, if the District decides not to construct a river pumping station specifically to serve only that land owned by the Ascuenas and Idaho, which accounts are the only accounts subject to this Agreement. Said allocation to be represented by that percentage that the horsepower of each pumping station bears to the total horsepower of the five (5) river pumping stations or four (4) river pumping stations, if the District decides not to construct a river pumping station specifically to serve only that land owned by the Ascuenas and Idaho. In the event the Idaho Public Utilities Commission orders an adjustment in the rate or charges of that rate schedule, applicable to the District's river pumping installations, said Credit Amount shall be increased or decreased by that percentage, which is determined to be the average for all Idaho customers under said rate schedule. This adjustment will be made effective in accordance with said Commission Order making such adjustment. In the event any regulatory agency adjusts, either by increasing or decreasing any applicable tax refund, the above Credit Amount will be decreased by an amount, which reflects the tax refund increase as to the Credit Amount, or the above Credit Amount will be increased by an amount, which reflects the tax refund decrease as to the Credit Amount. When an adjustment is required because of a rate or tax refund change, an addendum shall be executed by the parties hereto reflecting the change in the Credit Amount.

3. As currently planned, and if approved, that dam, which will be part of the A J Wiley Project, shall be constructed at a point in the East sides of Lots 3 and 8, Section 12, Town-

MICROFILMED
SEP 30 1988

ship 6 South, Range 12 East, Boise Meridian, in Gooding and Twin Falls Counties, Idaho. Attached hereto and identified as Exhibit "A" is a map which reflects the location of said dam. By virtue of its attachment and by this reference, said Exhibit "A" is hereby made a part of this Agreement.

4. That the District may, if it so desires, construct a pumping plant upstream from the proposed site of the Wiley Dam, to pump water from the Snake River to serve those lands, served by water supplied by the King Hill Irrigation District, during the calendar year 1978, which lie between the Head End Siphon and the proposed site of the Wiley Dam, and are owned by the Ascuenas and Idaho, on the express and strict condition that, if such pumping plant is constructed at or below the high water line of the Wiley pool, Idaho shall have no responsibility to move or pay for the moving of said pumping plant and shall not be liable for damages to said pumping plant, if said plant is inundated by the Wiley pool, and further that Idaho may use its flooding easements for the Wiley pool regardless of whether such pumping plant is at or below the high water line.

PART III

THE PARTIES AGREE:

1. That the proposed sites and construction plans for the District's five (5) river pumping plants, or if the District decides not to construct a river pumping station specifically to serve only that land owned by the Ascuenas and Idaho, then the proposed sites and construction plans for the District's four (4) river pumping plants, as selected by the District shall be presented to Idaho for Idaho's approval, which approval shall not be unreason-

MICROFILMED
SEP 30 1988

ably conditioned or withheld, and which approval or denial shall be given as promptly as is reasonably possible. This is necessary so as to enable Idaho to evaluate the feasibility and practicability of constructing those facilities necessary to enable Idaho to deliver electrical energy to the District's pumping plants.

2. That they are still bound by the rights, duties, obligations and limitations, as specified in that February 9, 1909 Agreement.

3. That the Energy portion of this Agreement is the obligation of Idaho to credit to the District's five (5) irrigation accounts or four (4) irrigation accounts, if the District decides not to construct a river pumping plant specifically to serve only that land owned by the Ascuenas and Idaho, that Credit Amount, as hereinbefore specified in Part II, Paragraph 2 of this Agreement. Said Credit Amount is representative of the value of Fourteen Million (14,000,000) kilowatt hours, determined pursuant to the applicable rate schedule, as of March 1 of each calendar year, when said Credit Amount is credited or as thereafter adjusted, pursuant to Part II, Paragraph 2 of this Agreement. Said Credit Amount may be reduced pursuant to Part III, Paragraphs 4 or 5 of this Agreement or terminated pursuant to the provisions hereinafter stated in this same paragraph. The obligation of Idaho to credit said Credit Amount to the District's five (5) irrigation accounts or four (4) irrigation accounts, if the District decides not to construct a river pumping plant, specifically to serve only that land owned by the Ascuenas and Idaho, shall terminate, if Idaho does not construct its A J Wiley Project, when Idaho ceases to operate both its Lower Malad and Bliss power plants due to lack

MICROFILMED
SEP 30 1988

of regulatory authority. If Idaho does construct its A J Wiley Project, then Idaho's obligation to credit said Credit Amount shall terminate when Idaho ceases to operate its Lower Malad, Bliss and A J Wiley power plants due to lack of regulatory authority. Said termination shall not entitle Idaho to a refund, rebate or reimbursement of any portion of said sum of One Million Dollars ($1,000,000.00), to be paid by Idaho to the District.

4. That the obligation of the District to allow Idaho the use of the District's water, for power generation purposes, and the obligation to cease use of the Head End Siphon and the canal, shall terminate when Idaho ceases to operate its Lower Malad, Bliss and A J Wiley power plants due to lack of regulatory authority.

5. If Idaho does not construct its A J Wiley Project, and if Idaho is not issued a new license, authorizing power generation at Idaho's Lower Malad power plant, which power plant ceases to operate due to lack of regulatory authority, or Idaho's license, authorizing power generation at its Bliss power plant terminates and no new license is issued, which power plant then ceases to operate due to lack of regulatory authority, then that Credit Amount, specified in Part II, Paragraph 2 of this Agreement, shall be reduced by that percentage, which represents the ratio that the energy generation, gained as a result of the use of the District's water for power generation, under median water conditions, at that power plant, which ceases to operate, bears to the total energy generation gained as a result of the use of the District's water for power generation, under median water conditions, at Idaho's Lower Malad and Bliss power plants. If it is the Lower Malad power plant which ceases to operate, due to lack

MICROFILMED
SEP 30 1988

of regulatory authority, then the Credit Amount shall be reduced by Seventy-two percent (72%). If it is the Bliss power plant which ceases to operate, due to lack of regulatory authority, then the Credit Amount shall be reduced by Twenty-eight percent (28%).

6. If Idaho is not issued a new license, authorizing power generation at its Lower Malad power plant, which then ceases to operate, due to lack of regulatory authority, and if Idaho constructs the A J Wiley Project and begins the generation of electricity, either before or after Idaho's Lower Malad power plant ceases to operate, due to lack of regulatory authority, then that reduction of the Credit Amount by Seventy-two percent (72%), resulting from loss of power generation, at Idaho's Lower Malad power plant, as hereinbefore specified in Part III, Paragraph 5 of this Agreement, shall be reduced by Seventy and eight-tenths percent (70.8%), which is representative of the ratio that the energy generation, gained by Idaho as a result of the A J Wiley Project, bears to the total energy generation, gained by Idaho as a result of the use of the District's water, for power generation purposes, under median water conditions, at Idaho's Lower Malad, Bliss and A J Wiley power plants. The reduction of the initial reduction of Seventy-two percent (72%) by Seventy and eight-tenths percent (70.8%), results in an effective reduction of the Credit Amount by Fifty-one percent (51%).

7. That this Agreement, and its rights, duties, and obligations are subject to the approval of the Board of Directors of both parties. Should this Agreement not be approved by the

MICROFILMED
SEP 30 1988

Board of Directors of both parties, then this Agreement and its rights, duties and obligations are null and void and of no further force or effect.

8. That this Agreement and its rights, duties and obligations are subject to the approval of any state or federal regulatory agencies, having jurisdiction over Idaho on this matter, including, but not limited to, the Idaho Public Utilities Commission and the Federal Energy Regulatory Commission. Should this Agreement not be approved, by an Order satisfactory to Idaho, in its terms and conditions by all of the state or federal regulatory agencies, having jurisdiction over Idaho on this matter, then this Agreement and its rights, duties and obligations are null and void and of no further force or effect.

9. This Agreement, and its rights, duties and obligations shall be binding upon the parties hereto and their successors and assigns.

10. The rights, duties, and obligations of the parties hereunder are intended to be several and not joint or collective, and neither of the parties shall be jointly or severally liable for the acts, omissions or obligations of the other. Nothing herein contained shall be construed to create an association, joint venture, partnership or impose a partnership duty, obligation or liability.

11. That all electric power and energy used by the District shall be subject to the relevant rates, rules and regulations of Idaho, approved as of the date hereof, or as they may be hereafter modified and approved by the Idaho Public Utilities Commission.

MICROFILMED
SEP 30 1988

12. The District will not waste water, the right to which the District has to divert and is diverting for irrigation purposes, wherever and however said wasting is occurring. Idaho's only remedy, if the District is wasting water, is Specific Performance of that duty and obligation of the District to not waste water.

13. That the District shall build only five (5) river pumping stations or four (4) if the District decides not to construct a river pumping plant specifically to serve only that land owned by the Ascuenas and Idaho. Any additional pumping stations or any increase in the horsepower of any of the five (5) river pumping stations or four (4) if the District decides not to construct a river pumping plant specifically to serve only that land owned by the Ascuenas and Idaho, over and above the original installed horsepower, shall not be subject to this Agreement and any rights, obligations and duties hereof. It is agreed by both parties hereto that Idaho will attach hereto, marked as Exhibit "B", Idaho's Work Order maps, which will reflect the location and horsepower of each of the District's river pumping plants, as reviewed and approved by Idaho, pursuant to Part III, Paragraph 1 of this Agreement. By virtue of its attachment and by this reference, Exhibit "B" is hereby made a part of this Agreement. Any additional facilities requested by the District or any individual, partnership or corporation, which is a landowner in said District, shall be handled pursuant to the applicable extension policy of Idaho, as approved by the Idaho Public Utilities Commission.

IN WITNESS WHEREOF, the parties have hereunto caused

MICROFILMED

RE: Claim No. 37-4112

King Hill Irrigation District
Box 428
King Hill, ID 83633

Gentlemen:

Enclosed is a copy of your approved Application for Extension of Time to Avoid Forfeiture of Water Right No. 37-4112.

You should be aware that approval of the Extension of Time does not confirm the validity of the items identified in the claim.

These items must be confirmed through the adjudication process or other court action. At this point it appears that the amount claimed is in excess of 0.02 cfs/acre.and without the claimant showinggjustification for the excessive rate, the amount claimed may not be valid.

This information is provided to inform you of possible items which may impact your efforts toward developing additional capacity.

If you have any questions on this matter, please let us know.

Sincerely,

JIM JOHNSON
Water Distribution Supervisor

SIGNATURE

NOTICE OF APPLICATION FOR EXTENSION OF TIME TO

AVOID FORF TURE OF A WATER RIGHT

PURSUANT TO IDAHO CODE Section 42-222

Notice is hereby given that King Hill Irrigation District, P. O. Box 428, King Hill, Idaho 83633, has applied to the Department of Water Resources for an extension of time to avoid forfe ture through non-use, of a portion of the following described water right:

CLAIM No. 37-4112 (Transfer 2315)

Source: Malad River tributary to Snake River

Priority: March 26, 1902

Amount: 370 cfs

Points of Diversion: NW¼NW¼, Sec. 35, T6S, R13E, Gooding county; NW¼SW¼, Sec. 12, T6S, R12E, Twin Falls county; NW¼SW¼, Sec. 9, T6S, R11E, Elmore county; NW¼SE¼, Sec. 12, T5S, R10E, Elmore county; SW¼NW¼, Sec. 28, T5S, R10E, Elmore county

Place of Use: Lands within the King Hill Irrigation District (11,606 acres)

Extension of time to avoid forfieture is requested for 65 cfs of water.

REASON FOR EXTENSION:

The irrigation system was converted from gravity to pumps having a capacity of 305 cfs in 1978 - 1979. Extention is requested to allow 5 years for planning and construction to divert the remaining 65 cfs.

Any protest against the approval of the above proposed change described above must be filed with the Idaho Department of Water Resources, 1041 Blue Lakes Blvd. North, Twin Falls, Idaho 83301, on or before August 1, 1983.

Re: Notice of Application for Extention of Time to Avoid Forfeiture of a Water Right

Gentlemen:

Enclosed you will find a legal notice which we wish to have published once a week for two consecutive weekly issues of your newspaper. We have inserted the publication dates allowing ample time for you to submit us a galley proof for review before publication.

After sending us a galley proof, proceed with the publication on the dates we have inserted, assuming the notice is correct. If we have any corrections, we will notify you before the first publication. If you cannot publish the notice on the proposed dates, please contact us immediately.

In order to receive payment, an affidavit of publication must be submitted to the Department along with the publication bill.

Sincerely,

Mary A. Newby
Sec/Office Coord

Re: King Hill Irrigation District
Claim No. 37-4074

Gentlemen:

Enclosed is an Application for Extension of Time to Avoid Forfeiture of a Water Right, made by King Hill Irrigation District, with respect to 65 c.f.s. of its water rights in the Malad River.

Enclosed, also, is the District's check in the amount of $50.00, in payment of the statutory fee.

Please file and process the Application, and notify me of your action.

Please advise if any additional information is required in connection with the Application.

Yours very truly,

ANDERSON, KAUFMAN, RINGERT & CLARK

N REMARKS - WATER IS DELIVERED THROUGH THE IRRIGATION SYSTEM TO FARMS AND
N HOMES WITHIN THE IRRIGATION DISTRICT FOR DOMESTIC AND LIVESTOCK
N USE. THE AMOUNTS SHOWN ABOVE FOR DOMESTIC AND LIVESTOCK USE ARE
N ESTIMATED MAXIMUM QUANTITIES REQUIRED OUTSIDE THE IRRIGATION
N SEASON FOR DOMESTIC AND LIVESTOCK PURPOSES.
N DIVERSION MEANS - DIVERSION DAM TO FLUME, SIPHON TO CANALS, LATERALS,& PIPELINES.

Re: 9230 ID-01 5042
King Hill Irrigation District

Dear Mr. Bibles:

Enclosed are copies of the claim to a water right and transfer of a water right filed by the King Hill Irrigation District.

The District filed the claim to record evidence of its water right and filed the application for transfer to change the point of diversion to the new pumping plants.

The list of lands served and exhibits filed with the claim are not enclosed since they are quite lengthy, however, these can be supplied if you need them.

Very truly yours,

LOREN O. HOLMES

Dear Sir:

We are currently trying to make a determination as to the extent of rehabilitation that will be necessary along the public lands included in the King Hill Irrigation District's existing canal right-of-way. As you are aware the inverted siphon and head-end area of their canal were destroyed this past Summer by a landslide. Since that time they have relocated their points of diversion with pumps at various points downstream from the original head-end area.

Could you please inform us as to the current status of their water right - in particular, their current point of diversion? Has it changed? If so, what is the legal description of the new point or points of diversion?

Your assistance and cooperation in this matter would be greatly appreciated.

Sincerely yours,

D. Dean Bibles,
District Manager

NOTICE OF PROPOSED CHANGE OF WATER RIGHT

NO. 37-4112

Notice is hereby given that King Hill Irrigation District of King Hill, Idaho, has applied to the Department of Water Resources for a change of the point of diversion of the waters of Malad River tributary to Snake River. The right sought to be changed is evidenced by Claim No. 37-4074 and is recorded as follows:

Amount: 370 cfs Priority: March 26, 1902

Point of Diversion: NW¼NW¼, Sec. 35, Twp. 6S, Rge. 13E, B.M., Gooding County. The water is used for domestic and stockwater from January 1 to December 31 and for irrigation purposes of 11,606 acres within the service area of the King HIll Irrigation District.

TO BE CHANGED AS FOLLOWS:

Point of diversion:

NW¼NW¼, Sec. 35, Twp. 6S, Rge. 13E, B.M., Gooding County
NW¼SW¼, Sec. 12, Twp. 6S, Rge. 12E, B.M., Twin Falls County
NW¼SW¼, Sec. 9, Twp. 6S, Rge. 11E, B.M.,
NW¼SE¼, Sec. 12; SW¼NW¼, Sec. 28, Twp. 5S, Rge. 10E, B.M., Elmore County

Any protest against approval of the above proposed change of water right must be filed with the Idaho Department of Water Resources, 1041 Blue Lakes Blvd. North, on or before May 7, 1979.

Re: Claim No. 37-4112

Gentlemen:

The Department of Water Resources has completed the advertising of your claim to a water right, and no further action is authorized under Section 42-243 and 42-244, Idaho Code. Your claim will be retained in our files and will be available at any time for use by you or the court.

The filing and advertising of the claim does not confirm the water right claimed, but will serve to record and preserve the information and the evidence which you included in your claim.

If, at a later date, you find that you have additional information or supporting evidence that you would like to have included with the claim, you may have that information or evidence added at any time. Please refer to the claim identification number when corresponding with this office.

We are enclosing a copy of your claim for your records. If you have questions, or if this office may be of further assistance, please feel free to contact us.

P. O. Box 1617
Boise, Idaho 83701

Dear Mr. Goodson:

As per your request, please find enclosed copies of the Claim to a Water Right and Application for Transfer filed by the King Hill Irrigation District, together with a portion of the land list filed with the claim showing lands irrigated within Sections 13, 14, 23, and 24, Twp. 5S, Rge. 10E.

Please remit $3.25 to cover the cost of copies.

If you desire any other information please do not hestiate to contact us.

Sincerely,

LOREN O. HOLMES
Southern Region Supervisor
