

MEMORANDUM

Date: August 28, 2012
To: Water Right File 63-32242
From: medl
Re: volume

In my beneficial use report, I had recommended separate and different volumes for the cooling and heating uses. After consulting with my supervisor, I am issuing the license with the same volume for each use and that volume is also the total for the license.

It has been the Department's practice to license heating and cooling uses with a common volume. This practice avoids the problem of putting the right holder out of compliance with their water right during an extreme weather year.
