G. NARRATIVE/REMARKS/COMMENTS

Application for permit was filed on July 18, 1995 for a domestic well and was permitted for the diversion of up to 0.04 cfs. Proof of Beneficial use was submitted by the applicant on October 15, 1996.

On June 5, 2012, Jana Reeder and I met with Dennis Lish at his residence and conducted the licensing field exam. The well is located on the applicant's property in the front yard of his home, and the ½ hp Water Ace pump is located inside his garage. The well is primarily used for house hold use and supplements the applicants sand point well used for irrigation of the yard and garden. The applicant stated that the sand point well is approximately 14 to 20 feet in depth with a 2 hp Water Ace pump and is used when the applicants 1 ¼ MID water shares are delivered and fills the sand point. I asked Mr. Lish if he wanted to amend the permit and add the sand point as a second point of diversion and he stated that he did not want the added expense and wanted to identify the sand point as an unrecorded domestic use. The applicant is currently irrigating ½ acre consisting of his lawn and garden area. I called the applicant on 8/13/2012 to clarify information concerning the two wells and the applicant inquired about adding a second sand point. I asked Allen Merritt about a second sand point and he said it would be allowed but the applicant would be limited to 0.04 cfs and ½ and acre irrigation between all three points of diversion.
