900 N. Skyline Dr.
Suite A
Idaho Falls, ID 83402

Gary Spackman, Director,

We are writing this letter to protest the application for permit from the water source Bohannon Creek to the Lemhi River. This application was submitted by Malinda Tracy, Salmon, ID.

We protest this application due to the following:

1. On the application Mrs Tracy is asking for a January date for irrigation water and an ending date of December. Irrigation season does not start before March 15th and will end November 15th of the water year.
2. This would have a potential effect on the reconnect of Bohannon Creek with the Lemhi River for fish recovery.
3. Miss Tracy does not have an easement for the ditch that would be her point of use to her property. The ditch crosses two private property owners before it crosses her property boundary where the water would be her point of use.
4. Irrigation district 74C we feel at this time there is not enough water to fulfill this right or any others.
5. The ditch has potential weak spot that could flood an adjoining property and residence and more water could create a potential for damage.
6. Applicant does not own the land at the point of diversion which is approximately one and one-half miles from her property line.
7. The applicant is asking for stock water that is in the irrigation ditch during normal irrigation season. There is no stock water available after irrigation season because it would not be delivered to her property. Because of this we believe that stock water right should not be permitted because irrigation ditch runs water through her property during irrigation season and she would have free use of the water for stock.

Thank you for your consideration of our concerns regarding this application for permit.

Sincerely,

Boyd Stokes, Chairman
Water District 74C
445 Bohannon Cr Rd
Salmon, ID 83467
