**Subject:** Additional Water Level Data for the Parkinson Hearing  
**Attachments:** Supplemental Water Level Data (Exhibit IDWR#8).pdf

Dear Parties:

During the hearing, I took official notice of certain water level measurements on file with the department and promised to make the data available shortly after the hearing. I explained that in 2009 IDWR had taken over the measurement of certain monitoring wells in the Big Lost River basin. The data for these wells available through the USGS website only includes up to 2009. The department's records includes water level measurements for 2009-present.

Up-to-date information was provided at the hearing for the two wells indentified in the Brockway Report (05N26E23CDA1 and 04N26E26DCD1). Attached is the 2009-2012 data for other monitoring wells identified by Kirby Jensen in his exhibits. Please note the department does not have any additional data for Well 04N26E34ABB1. This well is not part of the department's measurement route.

A copy of this email and attachment has been sent to Parkinson Farms and Darrell L. McDonald by US Mail.
