Attachments: 25-12776 Map.pdf

Danni,

I made a map using the Bing layer, and it looks like there is a pipeline originating in the SWNW of Section 32 serving the NWSW and SWSW of Section 32. We may also have problems with the POU.

Danni, I checked the micro fiche and this is what it says:

POD: 4S 43E 32 SWNESW

POU: 4S 44E 31 NESE NWSE SWSE SESE
32 NESW NWSW SWSW SESW

Hope this helps. Have a nice day.

No hurry, but would you look at the claim on microfiche and see if the POD is 43E or 44E and let me know. Thanks PD says 43E

Danni,

Does the proof report match the PD?

- If no, edit the workflow record to reflect the PD.
- If yes, call Eastern if that is most efficient to review the claim file. See if there was an error between the paper & the database. Then we can decide what's next.

Got the PD scanned. I can pull back the file, but may be easier to have the region look at the microfiche and make sure it is an error. Let me know if you want me to call Eastern

Danni,

Please work with Carter to verify the claim/partial decree in error or not. If it is, but the owner is not current, perhaps we'll just add comments to the record. See where it goes & let me know.

Hi Pam,

The first thing to do would be to pull the partial decree to make sure it matches the water right data. If it does, then we should pull the original claim file back from storage to see if the error is on our part in data entry, or if the claimant claimed the wrong range in the first place. However, I see by Ernie's comment that there was some confusion with the legal descriptions from the start.

We will also need to contact the right owner to make sure he is in agreement that the POD should be corrected. And, it looks like the partial decree owner is not the current land owner, which further complicates the matter.

Carter,

I can't see anything except the proof report of the decreed record for this basin 25 right. I think it's obvious an typo occurred in the POD description. What do you recommend for correction?

Gary,

Thank you for identifying this probable error. We will look into the source of the problem & find a solution to correct the record. I think you are correct that the spring source is probably in 44E near the place of use.

Good afternoon -

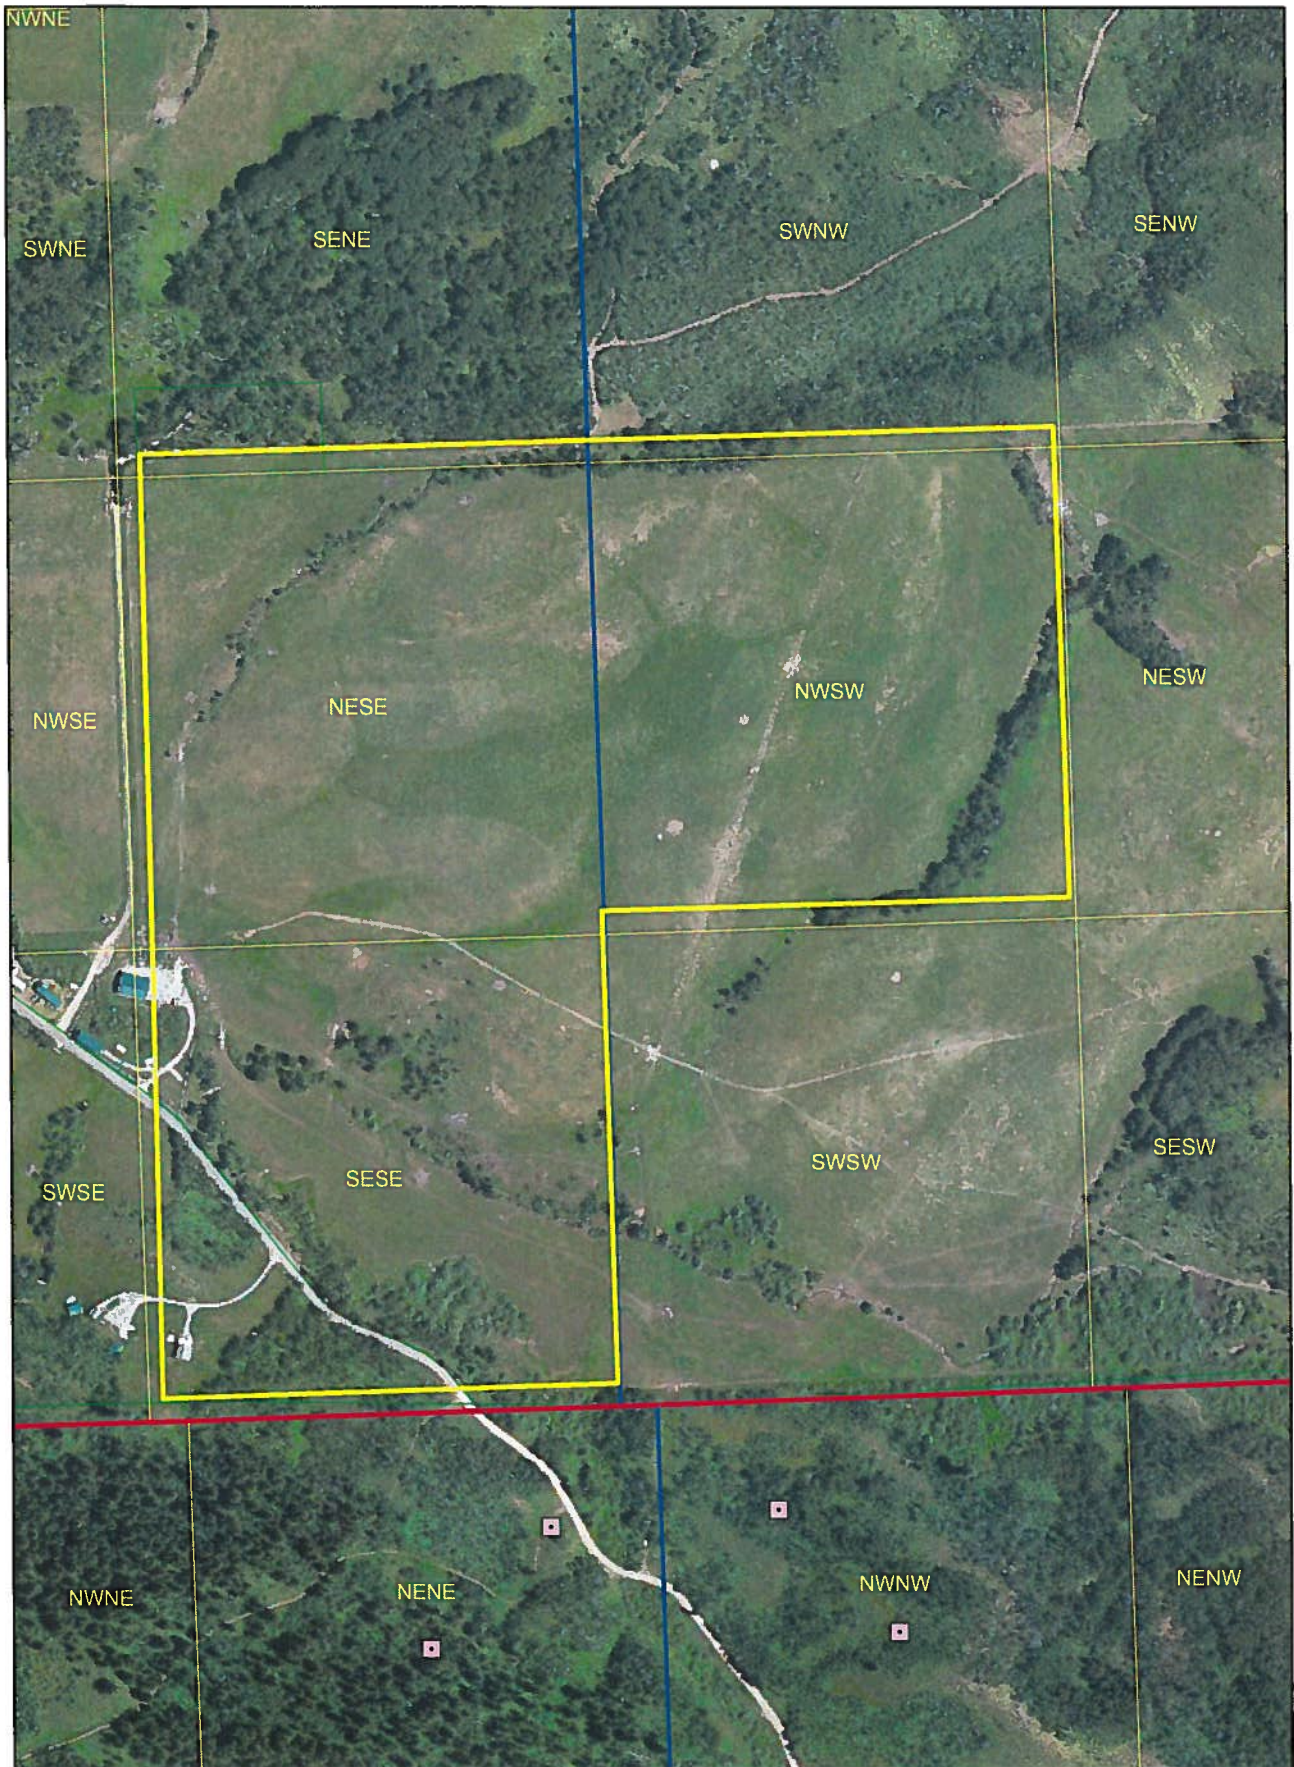

I don't know if it is an oversight, but I couldn't find an image of the water right decree using your online water right search

I was interested in this water right because your GIS data indicated that its point of diversion is located in Gray's Lake. But since the place of use is 6 miles away, I am betting that there is an error in the range field of the point of diversion - - it's probably 44E, not 43E?
