Vallivue School District No. 139
5207 S. Montana
Caldwell, ID 83607

Re Water Right Permit No. 63-31889

Dear Sir or Madam,

IDWR is working on licensing a water permit associated with the Vallivue Middle School in Caldwell, Idaho. A field exam is required by Idaho law to verify the water use developed before a license can be issued. The license is documentation that a water right exists for the water use. On June 5, 2012, I conducted a field exam, accompanied by David Hayes, Director of Maintenance for the School District.

The Department must have additional information about the fire protection system before a license can be issued. Please provide the following:

- 1 – An as-built diagram of the fire protection system and how it is piped to the various buildings;
- 2 – Pump information for the fire protection pump only (not booster pumps), such as a pump curve, specs and depth at which the pump is set in the well; and,
- 3 – Pump tests results performed on the fire protection well, such as the results of the 2011 or 2012 test of the fire system performed by Simplex Grinnel.

Please submit the requested information by July 13, 2012. Failure to submit the needed documentation may result in a license issued for less than the permitted use.

More IDWR information is available at www.idwr.idaho.gov. Thank you for your assistance and please call me at 208-334-2190 if you have any questions.

Sincerely,

Vicky Music
Sr. Water Resource Agent
