An application to rent 75.8 acres of water from the Idaho Water Supply Bank is being submitted. The land to be irrigated and the well to be utilized is owned by Lance and Lisa Funk. Permit 35-14242 has been submitted to IDWR to provide irrigation to this property and is currently being processed. It is unlikely that 35-14242 will be processed and approved before the water will be needed for the 75.8 acres in 2012 because of protests to permit 35-14242.

ESPA model analysis was performed for the 75.8 acres by using a To well located at Cell 85091. The water rights and amounts proposed to be rented are 35-2824 for 25.8 acres from Cell 80122, 35-2553B for 8.3 acres from Cell 81108 and 35-2553A for 41.7 acres from Cell 80107.

An application to rent 563.0 acres of water from the Idaho Water Supply Bank is being submitted. The land to be irrigated and the POD is owned by Lance and Lisa Funk. Permit 35-14244 has been submitted to IDWR for processing on this 563.0 acres of land and has been protested. It is expected to resolve the protestants concerns within a one year period.

ESPA model analysis was performed for the 563.0 acres by using a To well located at Cell 84092. The water rights and amounts proposed to be rented are 35-14014 and 35-14015 for 266.3 acres from Cell 95118, 35-2351, 35-2553B and 35-7372 for 4.9 acres from Cell 81108, 35-2713 for 9.7 acres from Cell 80107, 35-7373 for 1.6 acres from Cell 80107 and 35-13609, 35-7246M and 35-7632A for 264.0 acres from Cell 78111. Rental of water from 35-14014 and 35-14015 is based on the combined diversion rate of two water rights of 8.5 cfs and not the combined volume of the two water rights.

An application to rent 659.0 acres of water from the Idaho Water Supply Bank is being submitted. The POU and POD for the 659.0 acres is owned by Lance and Lisa Funk. Water permit 35-14243 has been submitted to IDWR for processing for irrigation on this 659.0 acres of land and has been protested. This one year rental should allow sufficient time to resolve the protestants issues with permit 35-14243.

ESPA model analysis was performed for the 659.0 acres by using a To well located in Cell 84094. The water rights and amounts proposed to be rented are 35-2543 for 620.3 acres from Cell 83110 and 35-4246 for 38.8 acres from Cell 86106.
