RE: **Request for Information** on Water Right Permit Nos. 37-21479 and 37-21480

Dear Permit Holder(s):

The Idaho Department of Water Resources (IDWR) is in the process of reviewing permits 37-21479 and 37-21480 that authorize the use of water for 9 homes in the Magic Village Subdivision.

A field examination is the next step in the water appropriation process and unfortunately I was unable to contact you when I was in your area a few weeks ago to conduct an examination. However, I did visit the subdivision and was able to locate both wells that appear to be associated with your permits and see that you have put water to use in some manner.

At this time, I will need information from you regarding the distribution system so I can understand what water uses you have developed. Please submit information regarding the type of motors and pumps that are used in conjunction with the two wells that provide water pursuant to the two permits. The following information would be very helpful in completing your water right licenses: horsepower, pipe size, manufacturer, where the pump set, and/or discharge size. In addition, if you have any engineering plans, or any other schematics that detail the distribution system that would be extremely useful.

Once the Department gathers all the pertinent information, your licenses can be issued, which is the last step in the appropriation process.

Please let me know if you have any questions regarding this matter and I look forward to finalizing your permits. You may contact me at (208) 287-4944 if you have any questions regarding this matter.

Sincerely,

Cherie Palmer, Sr. Water Resource Agent
Water Allocation Bureau
