Re: Lance Funk Rentals

Dear Mr. Van Dyke:

Attached are the amended rental applications for 242.4 acres, 212.3 acres, 292.0 acres and 193.7 acres.

Due to excess depletions in the Neeley to Minidoka River reach, changes to the ESPA model analysis was required. The modeling change did not result in a change in any of the four attached rental application. I have email correspondence to you and Jeff Peppersack detailing the changes. All ESPA Model analysis will be placed on the IDWR ftp sight for review by IDWR staff. A summary of the final proposed water rights and acre amounts to be utilized in these rentals are shown in the attached Analysis Spreadsheet.

The changes required to meet the depletion concerns in the Neeley to Minidoka River reach required the rental of portions of water right 43-13595 and 43-13597. Water rights 43-13595 and 43-13597 have PODs in model cells 92070, 92069 and 93070 (see attached aerial maps). However, the version of the model that I have would not allow me to use any of the three model cells in my analysis. I took a conservative approach and identified model cell 91069, which is further away by distance from the Funk rental POU's, to be the location of the POD for these two water rights.

Please copy our office on all correspondence regarding these applications.

Sincerely,

Greg Sullivan, M.S., E.I.T.
