3. csaxton 7/31/2012 Volume

Comment: Diversion volume for Aesthetic and Recreation uses is the same diversion volume licensed under 63-11440 for Fish Propagation since it is essentially the same water. 63-12159 just identifies different uses that the 145 AF of water can be used for.

A combined use limit condition for storage with 63-11440 was added to clarify the overall volume authorized for storage between the two rights. It is not probably needed because the capacity of pond at the time of the development period was 64.5 Af. Storage of 7.2 AF already authorized under 63-11440. 63-12159 licensed for the difference. But the condition helps clarify the cumulative nature of the licensed storage volumes.

4. csaxton 7/31/2012 Ownership

Comment: An assignment of permit was received July 27, 2012, and cannot be processed because the permit holder of record did not sign the assignment. The representative for Premier Industrial LLC discovered that the permit holder of record has passed away. However, along with the assignment of permit, Premier Industrial LLC submitted a change of ownership for 63-11440 and provided everything we need to change ownership on 63-12159. Since fees were paid for the assignment, we can update the ownership of 63-12159 to Premier Industrial LLC at licensing.
