CERTIFIED MAIL

EXAMINATION FEE NOTICE

Dear Permit Holder:

Department records show that proof of beneficial use has been submitted for the above-referenced permit, but that a field examination has not yet been conducted to determine the extent of beneficial use of the water for licensing purposes.

House Bill 671 (effective April 4, 1986) enacted by the 1986 Idaho Legislature requires the payment of a fee before this department can conduct the field examination needed to issue a license confirming use of water under the permit. This letter is notification that the license examination fee is due within sixty (60) days of the date of this letter. The examination fee information sheet (enclosed) must be returned with the fee.

As an alternative to submitting the fee, the department will accept a field examination report completed by a certified water right examiner from the private sector. If you choose to have the examination done by a certified water right examiner, you need not submit the license examination fee to the department, but you must within sixty (60) days of the date of this letter return to the department, the examination fee information sheet showing appropriate information together with a statement from the certified examiner to verify that you have retained a certified examiner to conduct the field examination. If you choose this alternative, a completed field examination report must be submitted within one year of the date of this letter. You cannot later change your decision to use this alternative and submit the fee needed for the department to conduct the field examination, but you may change to another certified examiner.

Certified water right examiners are licensed engineers, geologists, or land surveyors certified by the department to conduct water right examinations. The procedure for certifying examiners results from the recently enacted HB 671 and is being developed at this time. A listing

UNRECORDED

JAN 24 1987

of certified water right examiners will be available from this department when examiners have been certified.

If your permitted use, in fact, has already been examined by the department and you have not asked to have the examination repeated, the fee requirement is not applicable to your permit. If you believe this is the case, please contact the department.

The license examination fee is to be based on the amount of water you indicate you have developed, as listed in item 6 on the examination fee information sheet. The amount of water on which the examination fee is based can be less than the permitted amount, if less water has been diverted and beneficially used. The licensed amount of water, however, will not exceed the amount you claim on the examination fee information sheet. The enclosed license examination fee schedule shows a listing of applicable fees.

FAILURE TO SUBMIT WITHIN THE SIXTY (60) DAY PERIOD, THE FEE OR THE STATEMENT THAT A CERTIFIED EXAMINER HAS BEEN RETAINED TO MAKE THE FIELD EXAMINATION, WILL BE CAUSE TO ADVANCE THE PRIORITY OF THE PERMIT ONE DAY FOR EACH DAY THAT THE FEE SUBMITTAL IS LATE.

FAILURE TO SUBMIT THE FEE OR THE COMPLETED FIELD EXAMINATION REPORT WITHIN A YEAR WILL BE CAUSE TO CONSIDER THE PROOF OF BENEFICIAL USE TO BE INCOMPLETE AND TO LAPSE THE PERMIT.

The attached examination fee information sheet and the fee may be submitted to the following department offices.

Re: Application for Permit No. 27-7326, Permit No. 27-7325 and
License No. 27-2118

Dear Mr. Shoemaker:

I have received and reviewed your letter dated September 26, 1985, which explains the inter-relationships among License No. 27-2118, Permit No. 27-7325 and Application for Permit No. 27-7326 and the respective locations of the wells.

Based on your letter and a review of Department files, the Department will change the location designation shown on the well log from the NW $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 3, Twp. 3S, Rge 36E. To further identify the well log in question, the log shows that the well was drilled by Barrus Drilling with work starting on February 28, 1982 and completing on March 27, 1982. The log also shows a sixteen-inch diameter hole drilled to 100 feet.

As indicated in previous correspondence on this matter, the application for permit was not included in Idaho Power Company's lawsuit against later-in-time water users. Also by letter dated July 2, 1985, Tom Nelson, an attorney representing Idaho Power Company, has indicated that the benefits of the SB 1180 contract would be extended to Application No. 27-7326.

If you could obtain a written disclaimer or similar information from Idaho Power Company relative to your application and provide a copy to this Department, we would then know that Idaho Power Company does not protest issuance of a permit on Application No. 27-7326.

Assuming Idaho Power Company provides the information you seek, there are several other factors to consider before the Department can issue a permit including potential readvertisement to comply with amended

Outside of the disclaimer described above, there does not appear to be any Department requirements for you to pursue at this point in time.

If you have questions or if this office may be of assistance to you, please contact us.

Re: Application for Permit No. 27-7326

Dear Mr. Saxton:

Thank you for your letter of September 9, 1985.

You have rejected our previous explanation of error because application #27-7325 shows a water source from that exact location. The subject application shows a change of water source from License #27-2118 for 100 acres, and the application for 75 acres under application #27-7326.

Application #27-7325 was intended to use the well which was originally under license 27-2118. No new well has been drilled for application #27-7325.

After talking to you on the phone, I noted that the mentioned aerial photo was dated 1978 - that was before the subject application was submitted. At that time, the water was diverted from the well under license #27-2118. Your field inspection is correct. The well log carried the wrong legal description, for which I apologize.

I trust this information will clarify the matter.

Sincerely,

J. Blaine Shoemaker

Gentlemen:

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

The 1982 Idaho Legislature added a requirement that as a permit holder you must commence the excavation or construction of diverting works within one year of the date the permit was issued, and you must proceed diligently until the project is completed. The enclosed blue card must be completed and returned to this office as soon as you commence construction, no later than one year from the date the permit was approved.

We have enclosed instructions entitled "Making Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a license.

Be sure to note the special condition requiring you to install a measuring device, or an access port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the access port.
