Craig

I sent the field exams over to be put in the vault so they wouldn't get lost over here.

We will do the licensing in eastern. James is reviewing one of them now!

Subject: 23-11387 & 23-11418

Hey Dave,

I have a couple of files in the name of Aleixo. They hit my desk because we received a beneficial use field examination report from Paul Scoresby. Both 23-11387 & 23-11418 have draft licenses created on the database and 23-11387 has your tracks in it back in May.

All I am wondering is if you are working on these, or if I need to put them on my list of things to do?

Either way is fine. I just don't want to duplicate work if you know all about them, or conversely, file them back in the vault and forget about them when we should be issuing the license out of this office.

Thanks,
c
