Re: Water Permit No. 63-32602

Dear Sir:

The Idaho Department of Water Resources (IDWR) conducted a field examination of the above referenced permit and can issue a license after one issue is clarified. The findings include the following elements:

- source – shallow ground water tributary to the Boise River, mitigated by retired surface water shares from the Pioneer Ditch Company
- point of diversion – two points in NESW Section 18 (1 is center of pond, 1 is irrigation pump)
- beneficial use – irrigation and wildlife/aesthetic/recreation storage
- amount of water – 0.38 cubic feet per second to irrigate 19 acres (maximum duty of water), and 215 acre-feet for non-irrigation storage
- place of use – irrigation in SWNE, SENW, NESW, NESE, NWSE; storage in same tracts except NESE.

A map of the field exam findings is enclosed for your consideration. Yellow perpendicular lines designate section $\frac{1}{4}$ $\frac{1}{4}$ lines, red outlines property boundaries based on current data from the Ada County Assessor, dark blue illustrates three irrigated areas, and light blue shows the pond.

Please note the cross-hatched areas. This includes the north end of the pond and three irrigated acres on property apparently owned by Orion Holdings LLC (see enclosed contact information). To protect your property rights and allow IDWR to license the full extent of development under your permit, please

Permit No. 63-32602
November 29, 2011
Page 2

provide documentation confirming one of the following ownership solutions:

1. your ownership of the cross-hatched area; or
2. your authority to own and operate a water right on the Orion Holdings land.

Licensing will proceed based on a reply at your earliest convenience. Please contact me if you need more information in this regard. Thank you for your attention to this matter.

Sincerely,

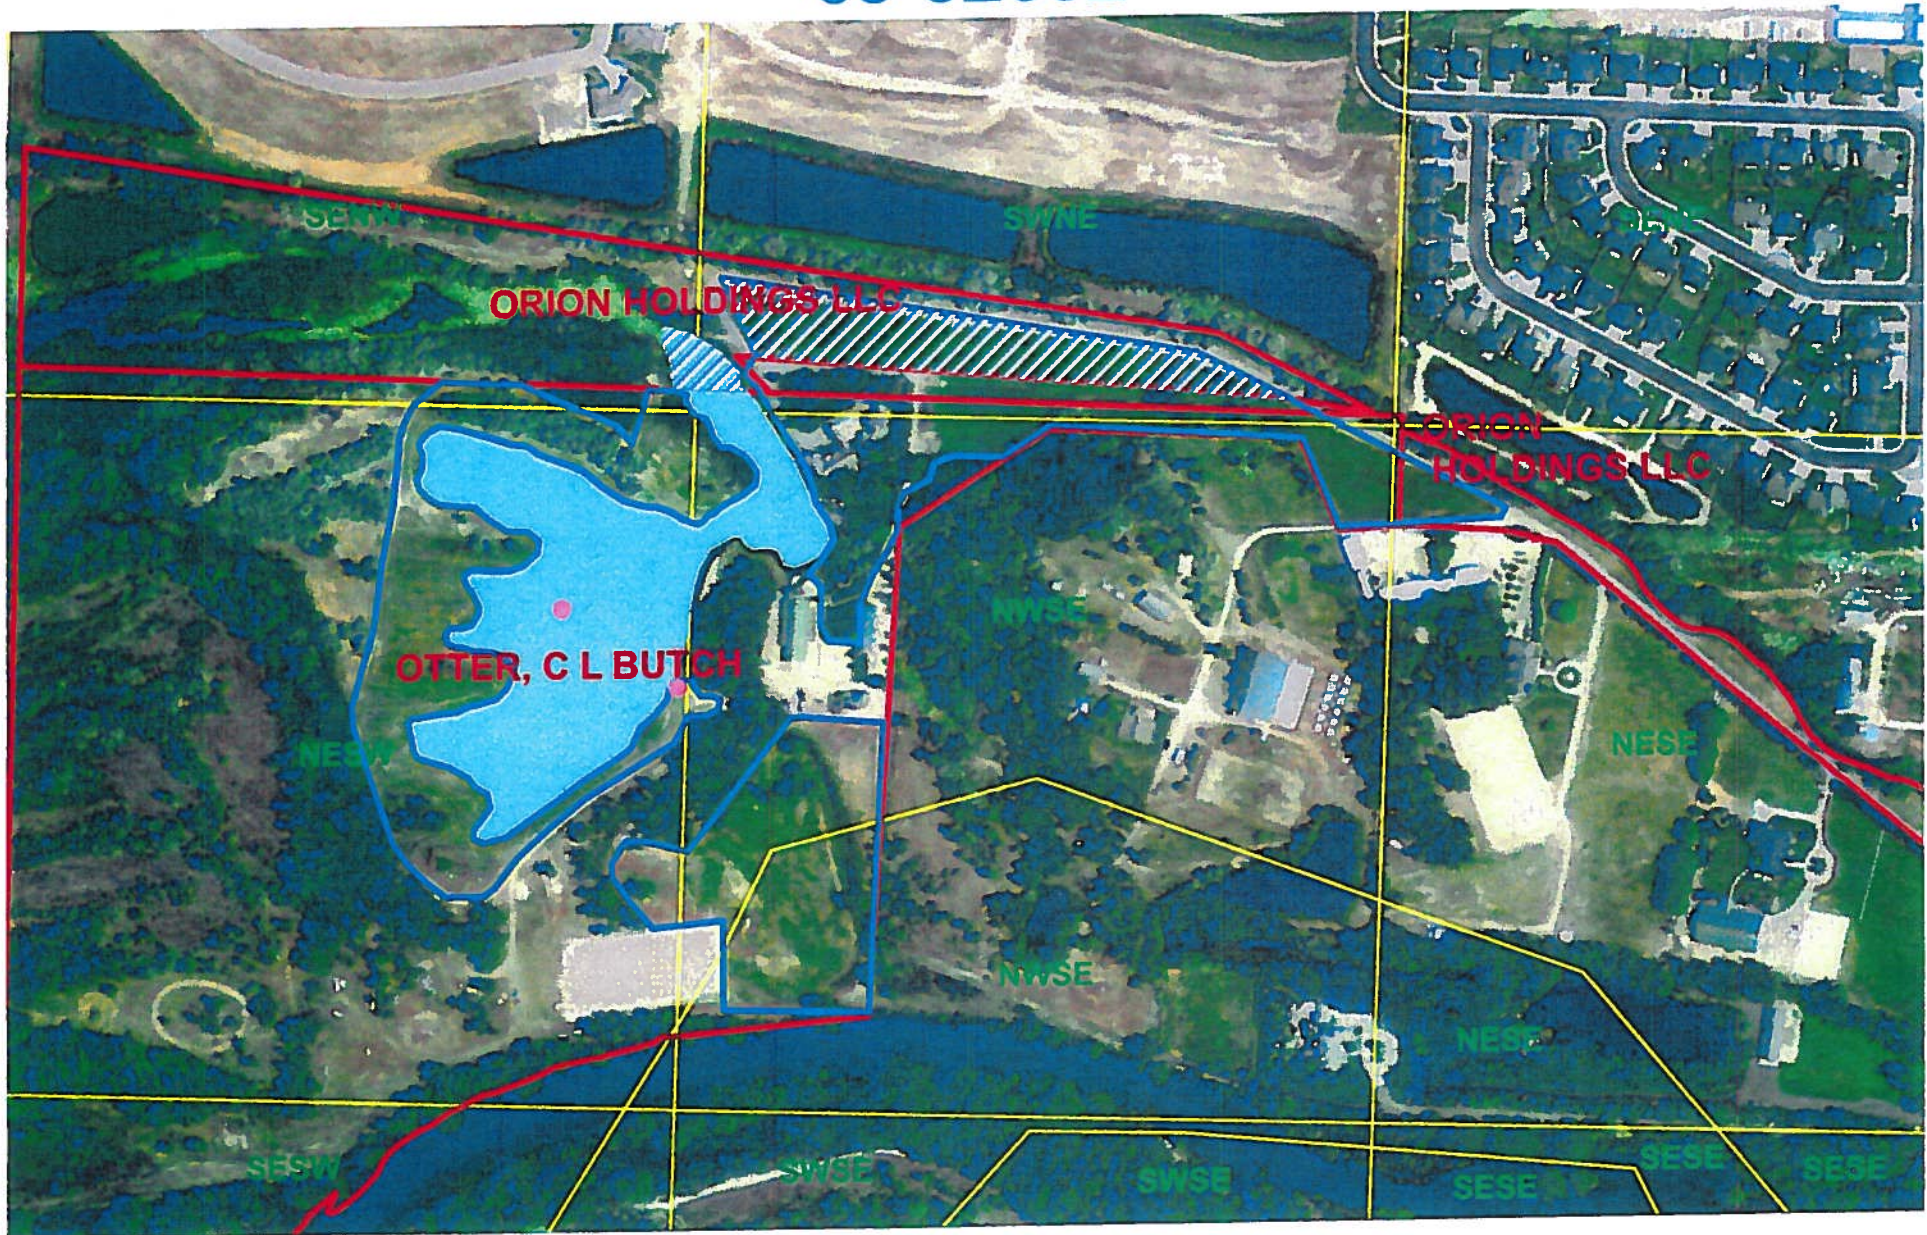

A handwritten signature in blue ink, appearing to read "Steve Lester", with a stylized flourish at the end.
