Describe what work has been completed toward the development of this water right:
 (This must be filled out! If no work has been completed, show "none".)

A new hydropower plant has been installed and planning and design work has been completed for the new intake and transmission line.

Costing \$39,000±

The permit holder(s) has been unable to complete the remainder of the work for the following reasons:

Coordination with US Forest Service has added approvals and review issues related to full system development and created the recent need to re-locate the point of diversion downstream. Further delay is caused by remote location and limited work season.

Permit holder(s) request an extension to August 1, 20 17.
