Department of Water Resources
Eastern Region

Department of Water Resources,

Ident NO 74-15889

We don't feel this Application will make any changes with the ESA Species Recovery. These ditches have been here for 50+ years. They have screens and Pumps above our property to prevent the fish from coming down the ditches. This Property had Decreed water for many years. That was Adjudicated. The deed says we must IRRigate and keep up the appearance for Agricultural and scenic values. Assisting in maintaining the culture and Economics of rural Communities. We need to IRRigate to grow grass, Flowers, and garden. It's the only way to Water to have grass for the horses.

Thank you

The Tracy's
