Re: Overlap review for 57-7552

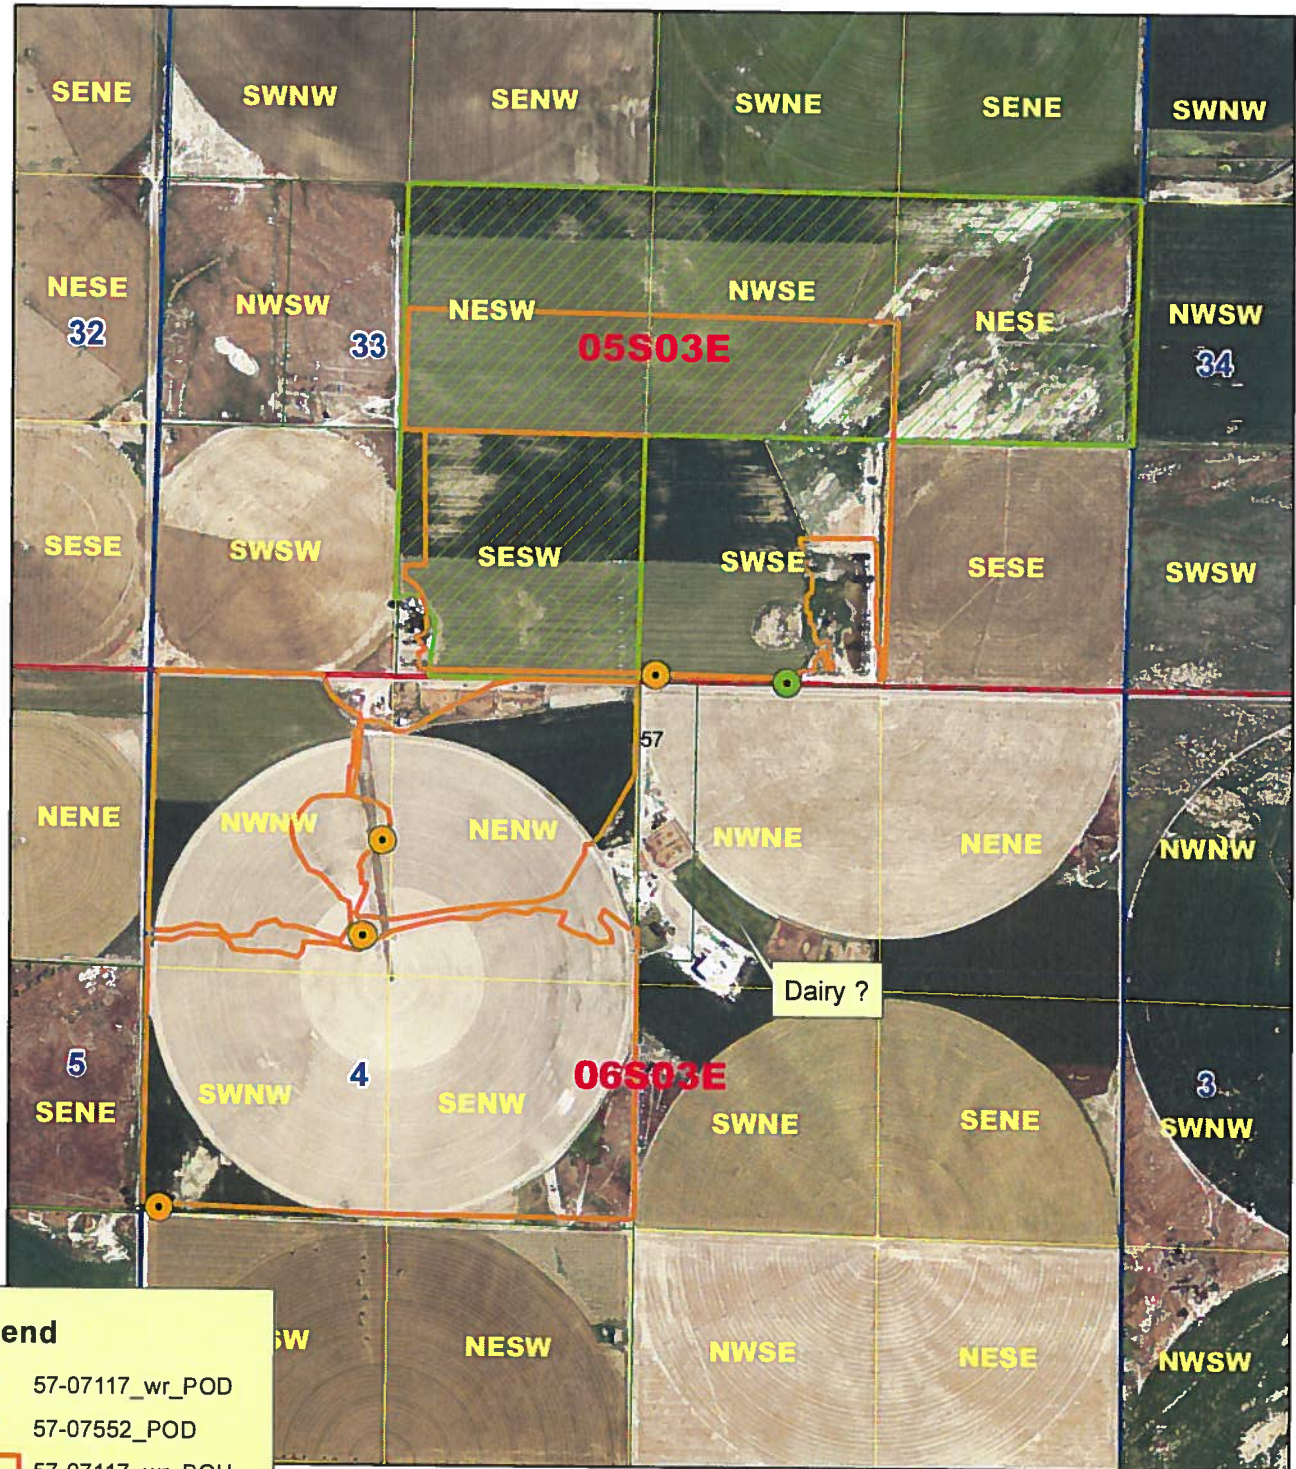

Overlap analysis on the beneficial use field examination report did identify overlap with 57-7117. The narrative identified the overlap consisting of 76 acres. However, addition of a combined use condition should be added to 57-7552 to address that overlap to prevent possible un-stacking or enlargement in the future.

The narrative indicated that the portion of 57-7117 that overlaps 57-7552 is supplemental in nature since it is a groundwater right. However, the groundwater right has an earlier priority date than 57-7552 and there are no supplemental conditions on 57-7117 identifying it as such. I think it is appropriate to add a combine use limit to 57-7552.

I suggest adding:

X35: Rights 57-7117 and 57-7552 when combined shall not exceed the irrigation of 332 acres.
