Describe the reason for the proposed changes: Irrigation management practices on the ranch have changed from gravity flow flood irrigation to diversion of water nearer the area of use into pressurized pipe systems that convey water to sprinkler systems. Much of the ranch has already been converted to a pressurized system over the past 15 years and the owners are planning to augment this method of irrigation. Applicant feels these practices will conserve water, reduce labor costs, and improve production

on the ranch thereby improving the viability of ranching operations into the future. The proposed changes in water rights will also facilitate the enhancement of stream connectivity, flow and habitat conditions for ESA listed fish species in Lemhi Big Springs Creek, Big Eightmile Creek, Lee Creek, and the Lemhi River. Applicant will be irrigating the same acreage with less water, thereby improving flows for other water users.

To Whom It May Concern:

As representative of Northwest Farm Credit Services, I am writing this letter to acknowledge and consent to the application being made by Beyeler Ranches, LLC to move their point of diversion on the ranch that is known as the Cottom Ranch with IDWR.

NFCS currently has a mortgage with the Beyeler's on this ground. They have always been good stewards of the land. They would not make any changes to their operation if it wasn't going to benefit the ranching operation as well as the environment.

If you have any questions or need to discuss this further, please call me at 208.552.2300.

Thank you,

A handwritten signature in dark ink, appearing to read "Cody Hendrix", written over a horizontal line.

**STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES**

**APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued**

5. General Information:

- a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future:
The diversions; L-57, L-58 and Lee Creek, all have lockable control structures and water measuring device. L57 and L58 have metal measuring weirs and Lee Creek has an in-line water meter. If necessary, applicant is willing to install a water measuring device and lockable control structure at the Slough Springs point of diversion
- b. Who owns the property at the point(s) of diversion? L57& L58-Ellsworth Ranch, Lee Ck-McConnell, Slough Sprngs-Beyeler
 If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system:
The landowners allow applicant access to the Lee Ck, L-57 and L-58 diversions for maintenance of the ditch and head-gate structures.
- c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts?
If yes, ☒ Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it Attachment #6. List the name of the entity and type of lien: Northwest Farm Credit Services, 2225 W. Broadway St., Idaho Falls, Idaho (208) 552-2300 (Cody Hendrix) - mortgage
- It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation of legal encumbrance on this application may result in rejection of the application or cancellation of an approval.
- d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer:
Pressurized irrigation will improve water conservation and agricultural production by diverting nearer the area of use. The management changes will also eliminate labor cost associated with ditch maintenance and flood irrigation and better reflect how the ranch is currently being irrigated. The changes will also enhance critical habitat for ESA listed fish species.
- e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) use:

- f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:
