Re: 35-7914 and 35-7973

Dear Mr. Cefalo:

It is desired by Lance Funk to correct the place of use of water rights 35-7914 and 35-7973. The attached transfer applications correctly define the location of where the water rights have been beneficially used for the past several years. The remaining portions of the pivots not fully covered by these water rights will be covered with rented water from the Idaho Water Supply Bank. A permanent source of water for the portions of the pivots not fully covered are in the process of being secured.

The ownership, POD, period of use and beneficial use for 35-7914 and 35-7973 will not be changing.

No ESPA model analysis was performed for 35-7914 and 35-7973 because the PODs are not changing. There will not be a change in the water diverted from the aquifer to model.

Please copy our office on all correspondence regarding this application.

Sincerely,

Greg Sullivan, M.S., E.I.T.

Cc: Lance Funk
