Re: Applications for Transfer 35-14162 (Combined for ESPA Mitigation Purposes)

Dear Mr. Jordan:

Please find attached certain corrections to the off-setting water right transfers seeking to split Idaho Water Company water right 35-14162 as identified in your e-mail received on June 26, 2012. The revisions included are as follows:

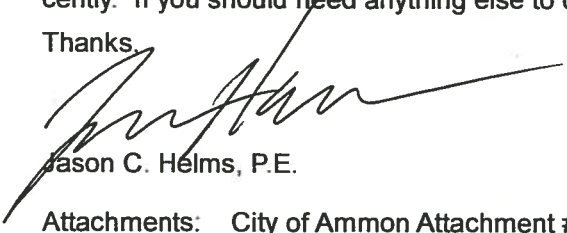

Transfer #1 (City of Ammon): I have attached a map showing the proposed place of use and points of diversion associated with the existing water rights which are not to be changed by the transfer.

Transfer #2: I have revised the County Line Farms transfer to include the existing water rights (35-14046 & 35-14052) in order to correct the current listed point of diversion to agree with the actual well location as drilled. This change increases the total transfer amount from 1.19 cfs to 2.74 cfs and have attached an additional check for \$80 to match the increased fee which was \$580 and now appears to be \$660.

Transfer #3 (Jefferson County Lake): I have revised Attachment #7a to show the proposed active irrigation place of use associated with the 2.5 acres of irrigation being transferred to the property.

I understand that Del Kohtz has also dropped off the agreement for the Country Club Hills transfer recently. If you should need anything else to continue processing the transfers please let me know.

Thanks,

Jason C. Helms, P.E.

Attachments: City of Ammon Attachment #7a: Proposed P.O.U./P.O.D.
Revised Application for Water Right Transfer (2.74 cfs)
Idaho Water Co. Ck# 1585 (\$80)
Jefferson County Attachment #7a: Proposed P.O.U./P.O.D.

Re: Applications for Transfer 35-14162 (Combined for ESPA Mitigation Purposes)

Dear Reviewing Agent:

Please find attached four applications for water right transfer prepared on behalf of Idaho Water Company. The transfers seek to change the place of use for fractions of existing water right 35-14162 leaving 20 acres remaining at the existing place of use. The entire water right is currently held in the water supply bank so forfeiture should not be an issue.

While three of the four transfers require ESPA mitigation due to increasing reach impacts, the combination of transfers provide adequate mitigation through off-setting impacts. An ESPA combined mitigation analysis is attached demonstrating the mitigating effects of the combined transfers.

The water rights should remain in the name of Idaho Water Company until the transfers are completed at which time ownership change applications will be filed as necessary.

If you have any questions regarding any of the transfers, please don't hesitate to contact me at your earliest convenience.

Thanks,

Jason C. Helms, P.E.

Attachments: ESPA Impact Analysis Report
Application for Water Right Transfer 0.23 cfs (City of Ammon Ck# 30343 \$500)
Application for Water Right Transfer 1.19 cfs (County Line Farms Ck# 19288 \$580)
Application for Water Right Transfer 0.21 cfs (Idaho Water Co. Ck# 1547 \$500)
Application for Water Right Transfer 0.04 cfs (Jefferson County Ck# 03669 \$200)
