Subject: Re: Well tag number

Jean:
I have checked the well, and there is no tag welded on my well. It looks like there was a tag that was applied with an adhesive, however that tag is missing. The number I sent on the application was the number I got from your office. I dont know how to proceed from here. Can you please advise me what the next step should be.

Subject: Well tag number

Water Permit owner:

The Department of Water Resources is in the process of reviewing your water permit for licensing. Additional information is required in order to complete this.

The drilling permit number you referenced on your Statement of Completion is listed as being for a well in a different area. The information needed is the well tag number that should be welded to the side of your well.

As soon as I have this information, I can finish processing your license.

Thank you.
