Subject: Re: Application for Exchange T77809 - East Fork Land and Cattle

Jeff,

The map from us shows the location of the **existing diversion** in Township 9N, Range 17E, SE of the SW, Section 33. The new POD is also in Township 9N, Range 17E, SE of the SW, Section 33. It looks like the Water Right paperwork shows it as NWSWSE. This is **NOT** accurate as the **existing POD** and the proposed is only 300-500 feet apart. In the interest of making this accurate, I would suggest we amend this to show the correct location POD for the Little Wicki Up. If it were a transfer, that would be an amended transfer. Since it is an exchange, that changes the scenario a bit doesn't it? If I complete a Transfer of the POD separately that goes out at the same time as this for advertisement, is it an additional fee? and can I do this? Homer Saye has provided that Jim Bennetts can sign the paperwork so I can meet with Jim on Monday and get this done. Let me know how to proceed.

Karma-

Could you clarify the actual location for the proposed POD? The application indicates it is in the NWNE of TWP 9N RNG 17E S. 33 but the map shows it in the SWSE of the same TWP, RNG, and Section. Thank you!
