Re Permit Nos. 63-11750 and 63-11875

Dear Mr. Norris:

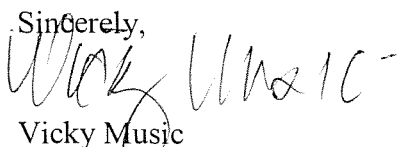

I conducted the licensing field exams on April 9, 2012, accompanied by your son, Douglas, for these two permits for irrigation from your drought well. Attached are maps of the irrigated acres that I will recommend being licensed for each right number. This letter is to inform you of a couple of items.

Permit 63-11750 was issued for 116 acres and 1.50 cfs. During the exam, I found 104 irrigated acres and will recommend the license be issued for 104 acres and 1.5 cfs. As I discussed with Douglas, it appears that permit 63-11750 was issued in your name for land owned by Clinton Norris. If the water right will be owned by you, IDWR will issue the license in your name. However, if your intent is that 63-11750 is to be owned by Mr. Clinton Norris, please fill out the attached assignment for permit and submit \$25. If the license is issued in your name, Mr. Clinton Norris will have to file a change of ownership with IDWR which also costs \$25; however, the assignment form is shorter and does not require the documentation required for a change in ownership.

Permit 63-11875 was issued for 83.2 acres and 0.70 cfs. During the exam I found 75 irrigated acres and will recommend the license be issued for 75 acres and 0.70 cfs. However, although this permit was also issued in your name, it appears that Clinton Norris owns the property in the NWSW of Section 12, shown on the attached map with the 25 irrigated acres. The pro-rated quantity for the 25 acres is 0.23 cfs. If you wish, this portion of the permit can be assigned to Clinton for an additional \$25. Your portion of 63-11875 would be 50 acres and 0.47 cfs. If this right is split later, it will be at least \$100, depending on the fees at that time.

The deadline for the assignments of permit is May 28, 2012. Please call me if you have questions. Thank you.

Sincerely,

  
Vicky Music  
Sr. Water Resource Agent
