Attention Kelly Christianson

Re: Spring Water Right 78-04053 & request to Split this water right (same property/ now two legal descriptions instead of one.) (Adams County)

Dear Mr. Christianson,

We spoke on the phone a couple of weeks ago and again today regarding us wanting to split the water rights to the spring noted above and I advised you that I would send you a packet outlining this request.

We purchased a 6 + acre parcel that had water rights to it from the above captioned spring located on BLM property that borders the westerly property line. This spring provided a water right for 4 acres of irrigation plus domestic use to this 6+ acre parcel. Prior owners were Clayton & Grace Hartwell.

In 2010, we split this 6+ acres parcel into two separate parcels.

Parcel A now being 5.225 Acres

Parcel B now being 1.009 Acres

Each parcel contains a dwelling and a shed on it.

Since the spring water right went to the entire plot of land, it is now necessary to split this same right to each individual parcel in accordance to the Dept. of Water Resources rules.

Per our conversation, this will not affect the priority date of the water right.

The Spring Water Right is 78-04053

There is a Right of Way Grant known as Serial number I-8092 from the Bureau of Land Management to this property for accessing and maintaining the spring and pipeline. I will also send them a letter notifying them of the change from one legal description to two legal descriptions.

Please note regarding the survey: So that there isn't any confusion, I'll provide you with what transpired and why there are several of record. You may not need this, but just in case you do, you'll have it.

Survey 1-1973 by Don Koskie; never recorded but the one Clayton Hartwell would have used when he purchased the property. This one shows the spring box and pipeline and we assume was used when Mr. Hartwell applied for and received the right of way grant from BLM. The water right was already in place for this property was established in 1947.

Page 2 Gleason spring water rights split 5-82012

Survey 2 -2001 /Rev 1-4-2002, recorded 1-15-2002 in instrument # 100992 by Rod Skifton when we purchased the property; this survey shows the west lot line further to the east.

Survey 3- July 2007 recorded 8-14-2007 instrument # 115007 by Rod Skifton when he corrected an error due to a road right of way issue. This brought the east boundary farther to the west. This is the survey that contains the corrected legal description prior to the split and equals 6.235 acres.

Survey 4- June 17, 2010 recorded 6-23-2010 in instrument # 120426 by Rod Skifton when we split the property. This is the final and most recent survey with each parcel having its own legal description. The total of both parcels together equal 6.234 acres.

When we spoke, you mentioned that you needed the dimensions of the house and shed especially on the 1.009 acre lot to appropriately split the water right. If it isn't an absolute necessity to subtract the square footage of the buildings from the acreage to determine what percentage of the right goes with that parcel, and if it is possible, it would seem like it would be a much cleaner split to give the 1.009 acre parcel the 1.009 right and the 5.225 right. This would keep it the same as the acreage rounding as appropriate. This would allow for the watering of additional space for parcel B should future owners decide to remove a building or replace an existing one with a smaller dimension. In my calculations, this would be 83.8% of the water right for Parcel A and 16.2 % of the water right for Parcel B. Since we own both parcels, this is the time to do this looking towards the future when there will be two different owners and where an owner could make changes to the building structures here. In computing out subtracting the buildings from the total land square footage, the acreage watered in parcel B appears to be almost 94% of the total parcel at this time.

To recap:

The objective and our request is to split the spring water rights # 78-04053 from the current parcel as a whole to the same parcel but to two separate legal descriptions since the whole parcel was split into two plots. This is shown by a survey recorded in the Adams County recorder's office June-23-2010 Instrument # 120426.

I have attached the following documents for your review. If there is anything else you need to complete this action, please call and let me know.
