RE: Amended Application for Transfer for Telford Lands LLC.

Dear Blake:

Enclosed for processing is an *Amended Application for Transfer*. As we discussed, the amended application clarifies a couple of points, and also includes additional model runs which you requested. We have not included extra copies of the attachments you already have that were submitted previously.

If you have any additional questions or concerns, please let me know.

Best Regards,

Robert L. Harris

RE: *Application for Water Right Transfer Submitted on Behalf of Telford Lands LLC.*

Dear Blake:

Enclosed for processing is an *Application for Transfer* for Telford Lands LLC. As referenced in the narrative of this Transfer Application, these water rights have a long procedural history in the Snake River Basin Adjudication, the end result of which was a reversal of the amended partial decrees. To the extent you have any questions, you may refer to some of those documents that have been scanned and are available on the Departments website. The transfer is necessary to formalize the historic irrigation practices of this particular property ever since at least 1985.

The reason the SRBA proceedings are important is that the current water right reports for Telford Lands LLC show the updated partial decrees. We have included copies of the original partial decrees issued to Charles Isom, which is how the water rights will look now that the SRBA Court has ruled. If you have any questions regarding this process, please let me know.

Also, the land to which the water rights are appurtenant is subject to two mortgages, which are held by Northwest Farm Credit and Isom Acres Limited Partnership. We have the signed consent from Northwest Farm Credit, but are in the process of obtaining the consent from Isom Acres Limited Partnership. They have an issue that needs to be clarified with the Secretary of State's office regarding their entity, and once that is done, they have represented that they will consent to the transfer.

Additionally, we have prepared a GIS shape file that depicts the slightly amended 1,980 acre place of use. Upon email request, we will send it to you when you need it.

Lastly, enclosed is a filing fee of \$1,460.00 for a transfer amending water rights in the amount of between 12-13 cfs. While the water rights will be stacked, the primary move is 12.5 cfs of water rights to the Island Wells. In filing the transfer, we also wanted to make slight

adjustments to the place of use, which total a shifting of six (6) acres because one other water (34-7138) is a surface water right with a common place of use. Water Right No. 34-7037 will be stacked (which will allow it, in theory, to be pumped from the Airport Wells), but as a matter, will be diverted at the Island Wells, so this water right also needs its place of use I confirmed with James Cefalo that this was the appropriate way to calculate the filing fee.

If you have any questions or concerns, please let me know.

Best Regards,

Robert L. Harris
