A. PURPOSE OF TRANSFER

1. ☐ Change point of diversion ☐ Add diversion point(s) X Change Place of use
   ☐ Change nature of use ☐ Change period of use X Other: Add PODs

2. Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label if **Part1A.2.** This transfer proposes to stack the points of diversion for all but one of the ground water rights (34-7037). The place of use for these ground water rights, as well as a surface water right, is already a combined place of use, but the shapefile prepared by IDWR in the SRBA does not equal the 1980 combined acres allowed under the above water rights. The shapefile has now been updated and rearranged slightly to show the correct acreage. The transfer is necessary to formalize the

historic irrigation practices on this farm since 1985, which has been to pump the so-called Island Wells up to 24.5 cfs when needed. See the attached field exam documents showing the Island Wells could divert 24.66 cfs. Water has been used in this manner without injury to other water users. The Applicant attempted to set aside SRBA partial decrees to document this usage through an accomplished transfer, and IDWR staff agreed with the evidence of this usage by issuing proposed amended partial decrees. However, ultimately the Presiding Judge of the SRBA determined that there was not a procedural avenue to amend the decrees on the basis of a clerical error made by one of the prior owners of the farm, Willard Bell, who developed the Island Wells and failed to include the Island Wells on the claims for the water rights that are currently only authorized to divert from the Airport Wells. The Applicant is also requesting the addition of a well drilled by Willard Bell in the early 1990s, but was not outfitted with a pump, referred to as "Big Hole." A recent pump test indicates that it may be a viable source of supply, but the pumping depth makes use of the well costly. The Applicant desires approval of this transfer to allow flexibility with how water is supplied to the property. There are no changes to the point of diversion for Water Right No. 34-7037, or to Water Right No. 34-7138 (surface water), other than the slight rearrangement of the place of use.

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future. Water diverted from the Airport Wells diverts into a private ditch system. Water diverted from the Island Wells is diverted into the Big Lost River Irrigation District system by virtue of a transport agreement. These wells have measuring devices and lockable controlling works. The Big Hole has no pump on it currently, but will be equipped with a measuring device and lockable controlling works.

b. Who owns the property at the point(s) of diversion? Applicant.

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: Water that is delivered through the BLRID system by virtue of a transport agreement.

c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? **If yes, X** Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6.** List the name of the entity and type of lien: Northwest Farm Credit FLCA (Mortgage) and Isom Acres Limited Partnership (Mortgage).

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation or legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer: Slight rearrangement of place of use in order to make shape file comport with decreed number of acres (1980).

e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) of use: None.

f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes	No	
☐	X	Undergone a period of five or more consecutive years of non-use,
X	☐	Currently leased to the Water Supply Bank,
☐	X	Currently used in a mitigation plan limiting the use of water under the right, or
☐	X	Currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe: As a short term measure, after the SRBA court ruling, a water bank lease is in place to allow up to 20 cfs to be diverted from the Island Wells. A condition of that water bank approval was to file this transfer application by April 30, 2012.

TRANSFER TOOL ANALYSIS SUMMARY

Telford Lands LLC

Because this is a "stacking" transfer where all of the Applicant's water rights are proposed to be authorized to divert from any point of diversion under Telford Land LLC's water rights, there is no clear guidance on how the transfer tool is to be run. As a general matter, 12.5 cfs is diverted early in the year from the Airport Wells, and when their production decreases, an increased amount is diverted from the Island Wells.

The first model run was therefore based on a worst case scenario of diversion of an additional 12.5 cfs from the Island Wells (where no water would be diverted from the Airport Wells). The amount per trimester was calculated by presuming a full inch to the acre, which for 12.5 cfs, would be 625 acres, and at a volume of 3.5 acre-feet per acre, would total 2187.5 acre-feet of additional water diverted from the Island Wells. This equates to 729 AF per trimester.

The model run showed a positive benefit on all reaches of the Snake River both above and below Milner.

The second model run is probably a more realistic representation of how water will be diverted, with some portion of the Airport water rights continuing to be diverted from the Airport Wells, and the remaining portion of the Airport water rights diverted from the Island Wells even during times when the Airport Wells are not producing as well. The amount used for this model run was 8 cfs. At a full inch to the acre, this would equate to 400 acres, and at a volume of 3.5 acre-feet per acre, would total 1400 acre-feet of additional water diverted from the Island Wells under the Airport Water Rights. This equates to 467 acre-feet per trimester.

The model run likewise showed a positive benefit on all reaches of the Snake River both above and below Milner.

No model run was made for the "Big Hole" because it is in an adjacent cell to the Airport Wells, and pursuant to IDWR policy, a model run is not necessary.

In reality, the wells will be used in various combinations depending on the situation. However, the above model runs fairly represent what impacts this transfer would have under the transfer tool. Overall, based on these model runs, the transfer will have a positive benefit to all reaches of the Snake River both above and below Milner.

A. PURPOSE OF TRANSFER

1. X Change point of diversion ☐ Add diversion point(s) X Change Place of use
   ☐ Change nature of use ☐ Change period of use ☐ Other: _____

2. Describe your proposal in narrative form, including a detailed description of non-irrigation uses to justify amounts transferred (i.e. number of stock, etc.), and provide additional explanation of any other items on the application. Attach additional pages if necessary and label if **Part1A.2.** This transfer proposes to stack the points of diversion for the ground water rights. The place of use for these ground water rights, as well as a surface water right, is already a combined place of use, but the shapefile prepared by IDWR in the SRBA does not equal the 1980 combined acres allowed under the above water rights. The shapefile has now been updated and rearranged slightly to show the correct acreage. The transfer is necessary to formalize the historic irrigation practices

on this farm since 1985, which has been to pump the so-called Island Wells up to 24.5 cfs when needed. See the attached field exam documents showing the Island Wells could divert 24.66 cfs. Water has been used in this manner without injury to other water users. The Applicant attempted to set aside SRBA partial decrees to document this usage through an accomplished transfer, and IDWR staff agreed with the evidence of this usage by issuing proposed amended partial decrees. However, ultimately the Presiding Judge of the SRBA determined that there was not a procedural avenue to amend the decrees on the basis of a clerical error made by one of the prior owners of the farm, Willard Bell, who developed the Island Wells and failed to include the Island Wells on the claims for the water rights that are currently only authorized to divert from the Airport Wells. The Applicant is also requesting the addition of a well drilled by Willard Bell in the early 1990s, but was not outfitted with a pump, referred to as "Big Hole." A recent pump test indicates that it may be a viable source of supply, but the pumping depth makes use of the well costly. The Applicant desires approval of this transfer to allow flexibility with how water is supplied to the property. There are no changes to the point of diversion for Water Right No. 34-7138 (surface water) other than the slight rearrangement of the place of use.

APPLICATION FOR TRANSFER OF WATER RIGHT
PART 1 Continued

5. General Information:

a. Describe the complete diversion system, including how you will accommodate a measuring device and lockable controlling works should they be required now or in the future. Water diverted from the Airport Wells diverts into a private ditch system. Water diverted from the Island Wells is diverted into the Big Lost River Irrigation District system by virtue of a transport agreement. These wells have measuring devices and lockable controlling works. The Big Hole has no pump on it currently, but will be equipped with a measuring device and lockable controlling works.

b. Who owns the property at the point(s) of diversion? Applicant.

If other than the applicant, describe the arrangement enabling the applicant to access the property for the diversion system: Water that is delivered through the BLRID system by virtue of a transport agreement.

c. Are the lands from which you propose to transfer the water right subject to any liens, deeds of trust, mortgages, or contracts? **If yes, X** Attach a notarized statement from the holder of the lien, deed of trust, mortgage or contract agreeing to the proposed changes on official letterhead signed by an authorized representative. Label it **Attachment #6.** List the name of the entity and type of lien: Northwest Farm Credit FLCA (Mortgage) and Isom Acres Limited Partnership (Mortgage).

It is the applicant's responsibility to provide notice to lien holder, trustee, mortgagor, or contract holder of the proposed changes that may impact or change the value of the water rights or affected real property. Any misrepresentation or legal encumbrance on this application may result in rejection of the application or cancellation of an approval.

d. Describe the effect on the land now irrigated if the place or purpose of use is changed pursuant to this transfer: Slight rearrangement of place of use in order to make shape file comport with decreed number of acres (1980).

e. Describe the use of any other water right(s) for the same purpose or land, or the same diversion system as right(s) proposed to be transferred at both the existing and proposed point(s) of diversion and place(s) of use: None.

f. To your knowledge, has/is any portion of the water right(s) proposed to be changed:

Yes	No	
☐	X	Undergone a period of five or more consecutive years of non-use,
X	☐	Currently leased to the Water Supply Bank,
☐	X	Currently used in a mitigation plan limiting the use of water under the right, or
☐	X	Currently enrolled in a Federal set-aside program limiting the use of water under the rights?

If yes, describe: As a short term measure, after the SRBA court ruling, a water bank lease is in place to allow up to 20 cfs to be diverted from the Island Wells. A condition of that water bank approval was to file this transfer application by April 30, 2012.

A. PLAT MAP (See Part 3A of instructions for application for transfer for complete requirements.)

X Attach a map of the diversion, measurement, control, and distribution system. Label it **Attachment #7a.**

X If the transfer application proposes to change the place or purpose of use of an irrigation right attach a Geographic Information System (GIS) shape file, or an aerial photo or other image clearly delineating the location and extent of existing acres and changes to the place of use. Label it **Attachment #7b.** If the place of use currently consists of a permissible place of use, then the attachment is not required if the application contains a clear statement that the boundaries for the place of use are not proposed to be changed by the transfer and the total number of irrigated acres within the place of use before and after the transfer is clearly stated.

B. CHANGES IN NATURE OF USE (Water Balance)

☐ If you propose to change the nature of use or period of use of all or part of the right(s) listed in this application, attach documentation describing the extent of historic beneficial use of the portion of the right(s) proposed to be changed. Also attach documentation showing that the portion of the right(s) to be changed will not be enlarged in rate, volume, or consumptive use through the proposed change. Label it **Attachment #8a.**

C. PLACE OF USE CHANGES TO SUPPLEMENTAL IRRIGATION RIGHTS

☐ If you propose to change the place of use of a supplemental irrigation right, answer below and attach supporting documentation. Label it **Attachment #8b.**
