A. DESCRIPTION OF WATER SOUGHT FOR RENT

1. Maximum Flow Rate (cfs) Maximum Volume (ac-ft) Nature of Use Period of Use
.668 10 Mineral Exploration 6/1/2012 to 12/15/2012
 _____ to _____
 _____ to _____
 Total: .668 10

2. Source of water Grimes Creek and unnamed tributary tributary to Mores Creek

3. Point(s) of Diversion:

Twp	Rge	Sec	Lot	¼	¼	¼	County
8N	6E	18		NE	SW	NE	Boise
8N	6E	8		SE	NW	SW	Boise
8N	6E	19		SE	SE	NW	Boise

4. Lands to be irrigated or place of use:

Twp	Rge	Sec	NE ¼				NW ¼				SW ¼				SE ¼				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
8N	6E	17					X	X	X	X	X	X	X	X					
8N	6E	18	X	X	X	X									X	X	X	X	

If the use is for irrigation, show total number of acres proposed through rental. Total Acres 320

B. OWNERSHIP

1. Do you own the land at the proposed point of diversion? Yes ☐ No ☒
 If no, list owner, contact information, and provide documentation of the authority to use the proposed point of diversion. U.S. Forest Service, Finding of No Significant Impact, letter attached
2. Do you own the land at the proposed place of use? Yes ☐ No ☒
 If no, list owner, contact information, and provide documentation of the authority to use the proposed place of use. U.S. Forest Service, Boise National Forest

C. MAP

Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described by this application in section A. Include legal description labels.

D. GENERAL INFORMATION

1. Please provide a description of the proposed diversion system. Pump water into tanker trucks from Grimes Creek and unnamed tributaries
2. Describe any other water rights diverted through the same point(s) of diversion or used for the same purpose(s) as described above. TP-63-118, TP-63-119, TP-63-120
3. Will the proposed place of use receive water from any other source? Yes ☐ No ☒
If yes, describe. Drilling Mineral Exploration holes within W1/2 of Sec. 17 R. E and E1/2 of Sec. 18 R. 6E
4. If the proposed use is not for irrigation, please provide a detailed description of the proposed use and how you determined the amount of water required. Attach additional sheets if needed. Mineral Exploration Core drilling
5. Are there any other applications pending before the Department, such as an application for permit or transfer, for the same use(s) proposed by this rental? Yes ☒ No ☐
If yes, describe. Temporary Permits already approved by IDWR
6. Was this rental application submitted in response to a Notice of Violation or a pending Notice of Violation? Yes ☐ No ☒
If yes, describe. _____

E. RENTAL TERM

1. Do you wish to rent water from the Board's bank for more than one (1) year? Yes ☒ No ☐
If yes, please specify the number of years desired through proposed rental. 5

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

If this application is approved, the applicant agrees to the following:

1. The use of water under this agreement shall be subject to the provisions of Section 42-1766, Idaho Code.
2. Renter shall comply with all applicable state and federal laws while using water under this agreement.
3. Renter shall hold the Board, the Director, and the state of Idaho harmless from all liability on account of negligent acts of the renter.
4. The Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
5. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
6. Renter is not authorized to use water proposed by this application until the rental fees are paid in full and the renter receives an executed copy of the agreement signed by the Director.

Greetings:

Enclosed is the Decision Notice/Finding of No Significant Impact (DN/FONSI) for the CuMo Exploration project. You are receiving this letter because you provided comments during the 30-day notice and comment period on the proposed action for the project (as documented in the environmental assessment (EA) last summer, or otherwise expressed interest in the project. The DN/FONSI documents my decision to implement Alternative B (Reduced Roads Alternative).

Key features of my decision are outlined below:

- Mosquito Gold Corporation (Mosquito) will conduct a 5-year mineral exploration project on the CuMo claim block (Project Area), under a Plan of Operations, including terms and conditions, approved by the Forest Service. More specifically, the exploratory operation will focus on delineating the extent of a copper/molybdenum mineral deposit that will allow subsequent modeling of the subsurface geology and associated structure and mineralization.
- The exploration drilling program will be result-driven, so that holes will be drilled to expand and complement the existing database. Consequently, it is difficult to predict the exact sequence of events, exact road locations/alignments, when any particular hole might be drilled, or at what orientation. It is possible that not all of the temporary roads and/or drill pads in the design will be constructed. Additionally, the exploration program may end earlier than anticipated. Nonetheless, my decision captures our best estimate of the sequence and location of actions.
- The operating season will be approximately April 15 to December 15. The Forest Service will review special circumstances that may require date adjustments.
- Up to 10.2 miles of new temporary roads will be constructed, and 4.7 miles of previously-constructed road will be permitted as temporary road, for a total of 14.9 miles of temporary road. A total of 16 stream crossings will be used, including four new crossings on the new temporary roads to be constructed, five on the 4.7 miles of previously-constructed temporary road, and seven on existing NFS roads. In constructing temporary roads, natural routes and topographic features would be utilized and temporary roads would be located on ridges wherever possible.
- A total of 60-80 percent of the proposed temporary roads will be constructed and operational at any one time. As a result, the total length of the temporary roads in service at any given time will be reduced by 20 to 40 percent. Concurrent reclamation (final reclamation conducted during exploration operations) and interim stabilization will be implemented in order to remain within 60-80 percent threshold for permitted temporary roads open at one time.
- Up to 137 drill pads will be developed. At each drill site, a small drill pad and mud pit will be developed so that equipment and vehicles are able to access each site and drill fluids can be retained onsite. Appropriate erosion control and Best Management Practices (BMPs) will be installed around drill pads. Drill holes will either be vertical or angled holes designed to best investigate the subsurface geology. Holes will range in length from 1,500 to 3,000 feet.

Caring for the Land and Serving People

Printed on Recycled Paper

- Up to 259 drill holes with various orientations and inclinations will be drilled from the drill pads, utilizing a truck, wagon, or skid-mounted diamond coring machine. The drilling will be completed in a series of stages, initially with wide-spaced drilling followed by infill drilling for reserve definition. Although most of the proposed drill holes will be vertical, geology may dictate angled drilling. Most drill pads will have more than one hole drilled from them. Drilling operations will be conducted on a 24-hour schedule.
- The primary access to the project area will be from NFS roads 380F, 382B, 382C, and 382C4 on the southwest side of the project area. Access to the project area via NFS road 397B will be for emergency use only.
- All temporary roads will be reclaimed (10.2 miles of newly constructed and 4.7 miles of existing) as close as practical to their original topography, and affected areas would be revegetated to forest standards, by the end of the reclamation period (e.g., up to 2 years after the 5-year exploration period).
- Reclamation or obliteration of the temporary roads and drill holes will consist of earthwork and revegetation of all surface disturbances to stabilize the reclaimed areas and to achieve post-exploration land use pursuant to 36 CFR §294.12(b)(7). As described above, reclamation of the mud pits will include backfilling and recontouring the pits as drilling is completed. Temporary roads constructed on steep slopes will be backfilled and recontoured to the approximate original contour. Temporary roads constructed on moderate and shallow slopes will be reclaimed using a combination of partial contouring and ripping as site conditions warrant. All disturbed areas will be seeded with a combination of range and reclamation species that are suitable for soil stabilization and reclamation projects in the Boise NF.

In making my decision, I carefully considered your comments, along with the environmental analysis documented in the EA, which showed the difference in environmental effects between Alternatives A and B. After deliberation, I concluded that Alternative B meets Mosquito's need to acquire detailed geologic data within the CuMo molybdenum prospect in order to determine the extent of mineral resources, while reducing potential impacts to other resources, especially erosion and sedimentation. The "Rationale for Making this Decision" section of the DN/FONSI summarizes how I considered public comment, with more detail provided in Attachment B of the DN/FONSI.

The DN/FONSI is also available at the Boise National Forest Web site (<http://www.fs.usda.gov/boise> - click on "Cummo Mineral Exploration" in the right-hand bar) or by contacting the Boise NF at the address and phone number above.

For further information, contact Jeff Alexander, Forest Minerals and Engineering Officer, Boise National Forest, 1249 South Vinnell Way, Suite 200; Boise, ID 83709; or phone 208-373-4100.

Sincerely,

 CECILIA R. SEESHOLTZ
 Forest Supervisor

RE: Temporary Permit Nos. TP-63-118 thru 120

Dear Applicant(s):

Your applications for Temporary approval of Water Appropriation has been granted and assigned number TP-63-118, TP-63-119, & TP- 63-120.

Please be advised that THE PERMIT IS SUBJECT TO THE EFFECTIVE DATES AND CONDITIONS STATED ON PAGE TWO OF THE APPLICATION.

If you have any questions regarding this matter, please call me at 208-334-2190.

Sincerely,

A handwritten signature in blue ink that reads "John Westra". The signature is written in a cursive, flowing style.

John Westra

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that the department has examined this application for temporary approval to use water under the provisions of Section 42-202a, Idaho Code, and has determined that:

- ☒ a) The application for temporary approval should be approved, since
1. The temporary approval can be properly administered.
 2. Other water sources are not readily available.
 3. The approval is in the public interest.
 4. The approval will not injure known public values associated with the water source or any known water rights.
 5. Basins 77, 78, & 79- the location is not in the Wild & Scenic River Designation
- ☐ b) The application for temporary approval should be denied.

This application is therefore hereby:

- ☐ a) DENIED
- ☒ b) APPROVED, subject to the following conditions:
1. Diversion and use of water under this approval is subject to all valid existing water rights.
 2. The applicant assumes all risk the use of the water under this approval may injure other water rights.
 3. This approval authorizes a maximum diversion rate of 50 cfs/gpm
 4. This approval does not grant a right-of-way across the land of another, does not create a continuing right to use the water and may not be used in connection with a use which requires a continuing water supply.
 5. The department may cancel this approval at any time if the department identifies injury to other water rights.
 6. This approval expires on 12/31/12.
 7. This approval does not create a continuing right to use water.
 8. The holder of this temporary permit shall not divert at a rate or in a manner that will significantly reduce the flow in the water source or otherwise adversely affect fish, wildlife or other public values. At no time shall the diversion exceed 25% of the total creek flow
 9. ¼ inch mesh screen shall be installed on the pump intake
 10. Direct discharge of waste water/slurry into rivers, creeks, or streams is not authorized.
 - ☒ 11. The water use approved herein is subject to and shall conform to the terms of the Forest Service approved Plan of Operations for this location.
 - ☒ 12. Mitigation for water losses will be the rental of 2.5 acre foot of water from the Boise River Rental Pool, contact Rex Barrie, Watermaster, phone 208-908-5480
 - ☒ 13. Temporary Appropriations TP-63-119 and TP-63-120 combined shall not exceed 5 acre-feet total in volume.
 - ☒ 14. Site activities must comply with Idaho Water Quality Standards

DATED this 10th day of May, 20 12.

BOISE RIVER RENTAL POOL LEASE AGREEMENT
FOR 2012

ENTERED

MAY 14 2012

STATE OF IDAHO
WATER DISTRICT #63

The Committee of Water District No. 63 being authorized pursuant to Idaho Code Section 42-1765 to lease stored water which has been provided to the Boise River Rental Pool by water users who own reservoir space and have excess supplies for the current year, does agree to sell Mosquito Mining (entity), 10 A.F. of water requested for Mineral Exploration (use). This agreement is subject to the adopted Rules and Regulations of the Boise River Rental Pool and execution of same by the party herein named.

Upon receipt of \$ 140.00 and the information requested below, the Boise River Watermaster will release to you from storage, at the rate you specify 10 A.F. of stored water between May 11st and Dec. 31st of 2012.

Description of point of diversion:

Located in 1/4 1/4, Sec. , T. , R. ;
Other Charlotte Creek & Headwaters of Grimes Creek
