Sandy,

On the google earth map (I believe that may be where it is from), can you send me the section adjacent to the right side of that map? The spring is off to the right of the section you sent. With regard to the topo map, that would include where the spring is located, but the map is so blurred that I don't think it would be a good map to use. That map indicates two creeks. The lower creek does not in fact exist, although perhaps underground that is where water is concentrated as it moves downhill. I would be pretty sure that "our" spring is located in the upper reaches of where that creek is placed on the topo.

So if you can send me the adjacent google map, I am pretty sure we can nail down the location of the spring. (I have been to the spring a number of times, and my nephew, Alex, has been there many times.)

thanks

John

John,

Thank you so much for your email.

Attached are both maps scanned, but in the event you have difficulty opening them, I have sent a copy screen shot under separate emails to ensure that they will be received, since our department limits the sizing of attachments we can send and receive.

Please mark, label, and return the maps as soon as possible so I can make the corrections.

Thank you,

Sandy Hemenway

Sandy,

Thanks for being willing to take the time to make the needed corrections in the license. As I mentioned on the phone, the map shows the wrong cabin on our property which uses the water. The water is used at our main cabin, which is the structure at the far south end of the airstrip. It is not the in the area which is enclosed by the yellow boundary line shown on the map. If you are not sure which structure is the main cabin, I can indicate it on the map. This is the cabin which uses the water from the spring, and has probably used it for 30 years.

Also, the spring would be located in the bottom right corner of the map. I can also indicate that on the map if you wish.

As I mentioned on the phone, if you wish, we can probably give you GPS locations, although I probably would not be able to get those for you until my next visit to the ranch, which will probably be in August.

Again, thanks for your help. Just let me know what you want me to do next.
