Steve,

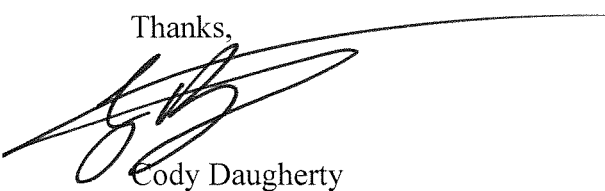

We are applying for a change in a diversion point. Does this application apply to be expedited with no advertising? Here are some reasons why.

Harvest Farms had a well go down do to tools stuck in the hole, They tried putting the pump back in the well to see if it would pump water and make it though the irrigation season, they have had no success trying this. As of now Harvest Farms does not have any water to irrigate there land on the south side of the road. Harvest farms as asked us to replace a well to the west of the one that as the tools stuck in the well. This well has pumped a lot of sand and was not a good water producer. We are proposing to move the well 400' to the east which will put us into a different 40. The land owner has drilled to the west of the existing well and has had no luck with finding any water in that $\frac{1}{4}$, $\frac{1}{4}$.

We are hoping that this form can be expedited so that the land owner does not lose his crops for this year due to the lack of water issues.

Attached is all the information that we have.

Thanks,

Cody Daugherty
