RE: Foster Applications for Transfer.

Dear Blake:

Enclosed for processing are two related *Applications for Transfer of Water Rights* owned by Brad and Sharol Foster and Foster Land & Cattle in Bingham County. These Applications serve several purposes. First, we are moving some acres to cover land that was previously irrigated without a water right. Second, Fosters are planning on installing some new pivots and removing a pivot from land that was not very productive so we are rearranging the place of use to account for that. These two applications are meant to be processed together.

The first application splits off 83.6 acres from 12 water rights and transfers them to cover potential violations to the north. These 83.6 acres should be stacked with the four water rights at the new place of use, which already have a combined place of use limitation. The second application merely rearranges the place of use for the remaining acres of the 12 water rights from which a portion was split in the first application.

Given the number of water rights and points of diversion involved, for purposes of analysis under the groundwater transfer tool, we are providing the model results that show the transfer from the points of diversion that are located furthest away from each other. We did run the model 8 times to check all of the different scenarios and in each case no mitigation was required. I have attached the results of each model run with the data input into the mitigation analysis tool which shows that for each scenario no mitigation was required. We have also prepared GIS shape files for the new proposed places of use, and will email these to you at your convenience.

If you have any questions regarding these applications, do not hesitate to contact me.
