Subject: TRANSFER NO. 77052 - 4072.1

Steve,

As we discussed on the telephone yesterday, the federal public land condition should have been deleted from each of the rights in Transfer Approval 77052 pursuant to the Settlement Agreement with BLM and its alternative condition language. Additionally, I question why the following condition was included in the approval since the points of diversion and place of use are all on private land owned by the water right holder: "This right does not grant any right-of-way or easement across the land of another."

Thank you for your prompt attention to these matters, Dana
